By SAMUEL BUTLER, D.D. F.R.S., &c. &c.

ARCHDEACON OF DERBY,

AND MAND MASTER OF THE ROYAL FREE GRAMMAR SCHOOL OF SHRIWSBURY.

THE EIGHTH EDITION.

#### LONDON:

PRINTED FOR

LONGMAN, REES, ORME, BROWN, AND GREEN,
PATERNOSTER-POW.

1828.

### PREFACE

### TO THE SEVENTH EDITION.

In the present edition of this little work, the author has made some very important additions, chiefly in the modern part of it. He has endeavoured to condense a great quantity of matter, derived from scattered but interesting documents, into as small a compass as might be consistent with perspicuity, without altering the nature of an elementary treatise.

The quantity actually added appears to be about thirty pages, but is in fact considerably more, as he has adopted a different form of printing, which allows a greater quantity of matter in every page. At the same time, he feels so desirous of contributing, as far as he can, to facilitate the means of education, and testify his gratitude to the public for their favourable reception of his labours, that he makes no increase of price for the increased size and materials of the volume.

He begs also to observe that he has added a map of the West Indies to the modern, and of Mauritania, Numidia, and Africa propria to the antient atlas without any increase of price.

Shrewsbury, April 6, 1825.

## CHRONOLOGICAL TABLE

	B.C.	
į	4004	Creation of the world.
	2348	The deluge.
	2217	Tower of Babel built, and confusion of languages.

#### NOTE

ON THE CHRONOLOGICAL TABLE.

The dates in this table are taken from Blair's Chronology, and contain the principal events of antient history, most of which were selected by Dr. Lempriere in the introduction to his useful and popular work the Classical Dictionary.

In order to find the year of the Olympiad, or the year of Rome in which any event happened, of which we know the date in years before Christ, we have to consider that the first Olympiad took place 776 years before Christ, and that Rome was founded 753 years B.C.

Hence we get the following rules.

To find the Olympiad; subtract the given year before Christ from 776, divide the remainder by 4, and to the quotient add 4 for the current Olympiad, and 1 for the current year of it.

Thus, the battle of the Granicus was fought B.C. 334. Therefore,

From 776
Take 334

4)442

110 . 2

1. 1

111. 3

That is, the battle of the Granicus was fought in the third year of the 111th Olympiad.

Observe that as an Olympiad is a space of 4 years, in dividing the sum which remains after subtraction, by 4, there will be either no remainder or a remainder of 1, 2, or 3; if there is no remainder, then adding 1, we shall find that the event took place in the first year of the Olympiad, which we have previously found; if a remainder of 1, 2, or 3, by adding the 1 for the current year in each instance, it will have happened in the 2d, 3d, or 4th year. In the instance above given there was a remainder of 2 after division, adding 1 to which shows the event to have happened in the 3d year of the Olympiad (111) previously found. To find the year of Rome; subtract the given year B.C. from 753; to the remainder add 1 for the current year, and it will give the year of Rome — or subtract the given year B.C. from 754, and it will give the year of Rome without any addition.

Thus Cæsar was killed B.C. 44.

From 755
Take 44

Remains 709
Add 1
710. A.U.C.
or from 754
take 44
710. A.U.C.

Conversely. — Multiply the Olympiad by 4, to the product add the current year or years of the Olympiad, and from the whole subtract 5 \*—then subtract the remainder from .776, and the remainder will be the year B.C. required.

Thus O	1.111. 3
	4
	444
Add	
Ada	3
	447
	441
Subtract	5
	442
Then, from	776
take	442
	<del></del> '
Remains	334 B.C.

or, without subtracting the 5, take the years of the Olympiad found as above from 781, and you get the year B.C. required.

I have given the longer rules in these cases for the sake of showing the principle — the shorter are better for practice.

For events in the Roman history after the birth of Christ we have only to add the given year of our Lord to 753, to get the year of Rome; or subtract 753 from the given year of Rome to get the year of our Lord.

Thus Varus was defeated A.D. 10
753
763 A.U.C.
or Varus was defeated A.U.C. 763
753
10 A.D.

Because the one current Olympiad is 4 years, and the current year is one year.

### PART I.

### A SKETCH

o**p** 

## MODERN GEOGRAPHY.

### CHAPTER I.

Maps of Dr. Butler's Atlas referred to in this Chapter are, Modern Geography (M.G.), Plates I. II. III. XVIII.

Geography implies a description of the earth, being derived from the Greek word γη the earth, and γράφω to describe.

The form of the earth is very nearly spherical; the polar axis being only about 38 miles shorter than the equatorial, which, in a diameter of nearly 8000 miles, can produce no sensible difference.

The principal circles on the globe (Pl. I.\*) are, the Equator, the Ecliptic, the Tropic of Cancer, the Tropic of Capricorn, the Arctic and Antarctic circles. Every circle, whether greater or less, is divided into 360 degrees; for the antients supposed that the Ecliptic, or circle which the sun appears annually to describe in the heavens, was completed in 360 days. Each day's advance in this circle they called a gradus, or step, or

<sup>\*</sup> The references are made to the maps, as numbered in the Index to them.

degree, and applied the same mode of division to circles in general. Each degree is subdivided into 60 minutes, and each minute into 60 seconds. Degrees, minutes, and seconds, are marked thus, °, ', "; thus 23° 40′ 52" means 23 degrees, 40 minutes, 52 seconds. The half of 360 is 180, and the half of 180, or the fourth part of 360, is 90. Hence if the whole circle contains 360°, a semicircle will contain 180°, and a quadrant, or quarter of a circle, will contain 90°, or an angle called a right angle. Hence it will be seen that the Equator dividing the earth equally, must divide it into two semicircles, containing 180° above and 180° below, or, reckoning by quadrants, into two quadrants of 90° each above, and two of 90° each below the Equator.\*

\* A straight line passing through the centre of any circle till it meets the circumference in two points, is called the diameter of the circle, because it διαμετρεί-measures through it. Half this diameter (or a line drawn from the centre to the circumference in one point) is called the radius of the circle. And it is a property of the circle to have all its radii, or diameters, of equal length. If a circle be supposed to turn round on its diameter, it will generate a solid figure called a sphere. Such is the figure of the earth very nearly. The diameter on which the circle revolves is called its axis. The extreme points of this diameter are called its poles, from πολεῖν - to turn round. A great circle is any circle described on a sphere. whose diameter is equal to the diameter of the sphere. The Equator and Ecliptic are called primary great circles. A secondary is a great circle whose axis is at right angles to the axis of the primary: the poles, therefore, of the secondary will be 90° from the poles of the primary. An arc is any part of the circumference of a circle contained between two radii, and is denominated from the number of degrees it contains. Thus 50° of the circumference, contained between two radii, is called an arc of 300; a quadrant is an arc of 900; a semicircle is an arc of 1800. Parallels are lesser circles which every where keep at the same distance from the primary circle, and so run, as it were, map annias - by the side of each

The Ecliptic, or circle which the sun appears to describe in the heavens, sets out from the Equator, and continues to rise, through the first quadrant, to the Tropic of Cancer; it then turns, or declines, towards the Equator, for the second quadrant, till it again meets the Equator 180° from the place at which it set out; it then descends, for the third quadrant, below the Equator to the Tropic of Capricorn, from whence it turns upwards towards the Equator, for the fourth quadrant, till it reaches the point from which it set out. Thus we see a change in the direction of the Ecliptic, with respect to the Equator, at every quadrant.

The Equator, or Equinoctial, is so called because on the two days on which the sun is in the Equator, in the signs of Aries, and Libra, noctes aquantur, or the time of day and night, is exactly equal all over the world.

The Ecliptic is so called because all ἐκλείψεις, or eclipses of the sun or moon, can only take place when the moon is in or near that circle.†

The Tropics are two parallels to the Equator drawn through the Ecliptic, at those points where the Ecliptic is at the greatest distance from the Equator; this is found to be about 23° 30' from the Equator, on either side.

The Polar circles are those circles which are supposed to be described by the Poles of the Ecliptic revolving round the poles of the Equator. Hence they must be the

other. The remaining greater and lesser circles of the globe are omitted, as unnecessary to be described here.

<sup>\*</sup> Hence the name of Tropic, from τρέπειν, to turn.

<sup>†</sup> An eclipse of the sun is caused by the moon intervening between the sun and earth, so that the moon's real or faint shadow falls on the earth. An eclipse of the moon is caused by the earth intervening between the sun and moon, so that the earth's shadow falls on the moon.

same distance from the poles of the Equator, as the plane of the Ecliptic from the plane of the Equator, or 23° 30′, which is the distance of the Tropics from the Equator.

The Zones are so called from ζωναὶ, belts or girdles, being those spaces contained between the several principal circles we have described. Thus, between the Poles and Polar Circles are the two Frigid Zones, between the Frigid Zones and the Tropics are the two Temperate Zones, and between the two Tropics, the Torrid Zone, deriving these appellations from the temperature of the atmosphere.

Longitude is the distance of any place from a given spot, generally the capital of the country, measured in a direction east or west, either along the equator or any circle parallel to it.\*

Thus the English measure their longitude East or West of London (or rather Greenwich, which is about 5'.37" East of London), the French, East or West of Paris. †

Latitude is the distance of any place from the Equator, north or south, and is measured along a secondary to the Equator, supposed to be drawn through the place.

Meridians or circles of Longitude are so called from meridies, or mid-day; because, as the Earth makes one

- The antients (who knew more of the earth from the Straights of Gibraltar to the Euphrates, and beyond it, i. e. from West to East, than from the Barbary Coast to the Baltic, i. e. from South to North,) called the greater dimensions the Longitude, or length, and the smaller the Latitude, or breadth. Hence the origin of the terms Longitude and Latitude, as applied to distances on the earth's surface; the former being measured in a direction East or West from a given point, the latter in a direction North or South.
- † The antients measured their longitude from one fixed meridian, which passed through the Fortunatæ Insulæ, or Canary Islands.

complete revolution round its own axis in 24 hours, every part of its surface must in the course of that time be directly opposite to the sun. The sun, therefore, will then appear at its greatest altitude to the inhabitants at that point; and will afterwards appear to descend for as long a time as he appeared before ascending: in other words, it will be mid-day or noon. It is, therefore, evident that there may be as many meridians drawn as there are points in the Earth's equator: for the sake of convenience, they are generally drawn at 10° distance from each other in maps of the world, and at 5°, or less, in maps containing a smaller portion of the Earth's surface.

Parallels of Latitude are smaller circles drawn parallel to the Equator. As the circumference of the Earth's surface is greatest at the Equator, and decreases continually towards the Poles, it is evident that the circles of latitude, which are parallel to the Equator, must also continually decrease in like manner; therefore, the number of miles in each parallel of latitude must continually decrease. But the number of degrees in every circle, whether greater or less, is always 360°; therefore, the number of miles in each of these 360°, or in every degree of longitude, must continually decrease from the Equator to the Poles. We may, therefore, consider the Equator as the greatest of all the circles of latitude. \*

The Longitude of any place, therefore, being its distance from a given point, measured along the Equator

<sup>\*</sup> It is evident that the number of miles in the meridians, or circles of longitude, which are all great circles, is every where the same; therefore the number of miles in a degree of latitude is every where very nearly the same.

in a direction East or West, and the latitude of the same place being its distance from the Equator, measured in a direction North or South, if we know both the latitude and longitude of a place we know its exact situation on the Globe. To exemplify this in the Map of the World (see also the Map of Europe, Pl. II.), on the right hand, or Eastern Hemisphere: every place from the top to the bottom of the map, lying under the meridian marked 30 on the Equator, is in the thirtieth degree of longitude East of London: I should find Alexandria, in Egypt, and Petersburg, in Russia, both in this degree of longitude, but I know not their relative distance from each other; they may lie one under the Equator, the other under the North or South Pole, or in any other possible position on the meridian marked 30 from the top of the map to the bottom of it; but when I find the latitude also, I have their exact position, both with respect to each other and all other known places on the globe: thus I find also, that the sixtieth degree of North latitude passes through St. Petersburg, and about the thirty-first degree of north latitude through Alexandria, or that Petersburg is 60°, Alexandria 31°, North of the Equator; consequently I now know their exact situation with regard to each other, to London, and to every place on the Earth's surface. We say, therefore, that Petersburg is in 60° N. lat. (North latitude), and 30° E. long. (East longitude), and that Alexandria is in 31° N. lat. and 30 E. long.

Every degree contains 60 geographical, or 69½ English miles. \* In the Map of the World the divisions of lati-

<sup>\*</sup> It has been thought expedient to adopt the latter measure, when speaking of square miles in the subsequent Chapters of this work.

tude and longitude are made at 10° distance, as the most convenient: but it is evident, that the more minute the divisions can conveniently be made, the more accurately will the situations of places be ascertained. In the Map of Europe the divisions are at every 5° of lat. and long.; in the Map of England (Pl. III.), at every degree, and each degree is subdivided into six equal parts; each, therefore, contains ten geographical miles. Hence, although it is not easy in a small Map of the World to ascertain the situation of places within perhaps a degree, in the Map of Europe we may do it with tolerable accuracy to the half or quarter of a degree, and in the Map of England almost to the precision of a single mile. It may be necessary here to caution the young student, that the exact situation of a place is to be taken from the small spot or circle, which is made near, and generally at the beginning of the name. \*

\* It may be remarked, that the latitude is to be reckoned on . either side of the map; and the longitude at the top or bottom, according as the reference may be made with the greatest convenience. The learner may farther observe, that when the figures increase in value from the bottom to the top of the map, the portion of the globe described in the map is wholly in North latitude; when they decrease in value, wholly in South latitude; when it is partly in North and partly in South latitude, the figures increase apwards on the North and downwards on the South side of the cypher. - Sec the Map of the World, of Europe, and of Africa. There is no map in common collections used at schools comprising a part of the globe wholly in Southern latitude: South America contains the greatest portion of it. Also, when the figures continually increase to the right at the top or bottom of the map, all the places in it are in East longitude; when they continually increase to the left, in West longitude; when they partly increase to the right and partly to the left

It may be an useful Exercise to describe the latitude and longicude of the following places in the Map of Europe:—

London	Warsaw
Edinburgh	Berlin
Dublin	Moscow
Paris	Petersburgh
Madrid	Stockholm
Lisbon	Bergen
Brussels	Copenhagen
Amsterdam	Dresdon
Vienna	Prague
Bern	Frankfort
Turin	Genoa
* Rome	Venice .
Naples	Geneva
Constantinople	Hamburgh
Buda	

### Also the following places in the Map of England: -

London	Cambridge	Portsmouth
Manchester	Lincoln	Chester
Liverpool	Durham	Canterbury
York	Exeter	Norwich
Birmingham	Plymouth	Lcicester
Bristol	Lizard Point	Shrewsbury
Oxford	Land's End	

Oxford Land's End

### Of turning Degrees of Longitude into Time.

As the Earth makes one complete revolution on its axis, in a direction from West to East, in 24 hours, any

of the cypher, the places are situated partly in East and partly in West lengitude.—See the Maps of Germany, Ireland, and Europe. In most maps, unless the contrary be expressed, the top of the map is the North, the bottom the South, the right side the East, and the left side the West.

one point of the Earth's surface must have been carried through 360° in that time; or if we suppose a fixed meridian above the Earth, like the brazen meridian of a globe, every part of the Equator, containing 360°, must have passed under that meridian in 24 hours. Hence, if we divide 360 by 24, we shall find how many degrees pass under this meridian in one hour, which will be 15. Now, as the Earth really revolves in a direction from West to East, it is continually, as it were, falling below the heavenly bodies on the Eastern, and rising above those on the Western horizon; hence, those bodies appear to rise in the East, and set in the West, because they come into sight as the Eastern edge of our horizon falls below them, and are hid from view as the Western. edge rises above them. If the sun, therefore, appears to rise at six o'clock at London, it will be yet an hour before it appears to rise at a place 15° West of London; two hours before it appears to rise at a place 30° West of it, and so on. In like manner, it will have already appeared to have risen one hour at a place 15° East of London, two hours at a place 30° East, and so on. Therefore, when it is twelve o'clock at noon at London, it is one o'clock in the afternoon at all places 15° East of London; and only eleven o'clock in the forenoon at all places 15° West of London. The following questions may serve to exercise the young student: -

It is eleven o'clock in the morning at Vienna (Pl. II.) —Where is it noon, where is it one in the afternoon, and where is it ten in the morning?

When it is mid-day at London — Where is it midnight?

When it is two o'clock at Kingston in Jamaica, (Pl. XVIII.) — What o'clock is it at Shrewsbury? (Pl. III.)

Suppose an eclipse of the sun takes place at three in the afternoon at the place where I am, and I see by the almanack that it took place at half-past twelve in London—In what longitude am I^

#### CHAPTER II.

M.G. Plates I. II. VI.

THE Map of the World (Pl. I.) is divided into two Hemispheres. The right, or Eastern Hemisphere, contains the three Continents of Europe, Asia, and Africa, commonly called the Old World, as having been known to the antients. The left, or Western Hemisphere, contains the two Continents of North and South America, called the New World, having been only discovered by Columbus, in the year 1492.

Europe, Asia, Africa, and the two Americas, are commonly, but absurdly enough, called the *Four Quarters\** of the World, bearing, as we shall see hereafter, a very great relative disproportion to each other.

If the word Quarter be taken in its proper sense for an equal fourth part, the term is absurd when applied to the divisions of the globe; but not if we use it in the sense of division, or region. Thus we speak of the quarters of an orange, of quartering ground, &c.; and we say, In these quarters, for In these regions, or In this part of the World. Still the division of the world into four quarters is inconvenient, as it leaves us at a loss to which we must assign New Holland and the Islands in the South Seas.

Some recent geographers have divided the World into six, or rather seven portions: Europe, Asia, Africa, and the two Americas, Australasia, containing New Holland and the adjacent Islands, and Polynesia (from  $\pi o \lambda \dot{v}_5$  and  $v \ddot{\eta} \sigma o_5$ ), comprising the numerous Islands in the Pacific Ocean. It is not probable, however, that this more scientific distribution will supersede the vulgar division, sanctioned by the general usage of preceding ages.

#### EUROPE.

Or the four generally received divisions of the World, Europe (Pl. II.) is the smallest, comprising in its greatest breadth about 3300, and in its greatest length about 2350 British miles. It is bounded on the North by the Arctic or Frozen Sea, on the West by the Atlantic: an imaginary line, drawn through the Mediterranean, separates it from Africa, on the South; and it is divided from Asia, on the East, by another imaginary line, drawn through the Archipelago, the Black Sea, the Sea of Azoph, continued along the River Don, or rather perhaps along the Volga, and Kama, and thence bent Eastward towards the Uralian Mountains, and from thence continued till it reaches the

Arctic Sea, under Nova Zembla; but the Eastern line of separation is not well agreed on, or defined.

The Island of Great Britain is in the West of Europe, comprising the Kingdoms of England and Scotland, and the Principality of Wales. The Southern part of Great Britain to the Solway Firth on the West, where the island is narrowest, and Berwick upon Tweed on the East, is called England; above \* it is Scotland; and on the West, Between the Bristol Channel and Chester, is Wales. West of Great Britain is Ireland, and above Ireland is Iceland.

Below Great Britain is France, and below France to the West is Spain, and still to the West of Spain is Portugal. Below France, to the Eastward is Switzerland, at the South-west of which is the lake of Geneva and City of that name, and below it Italy, which resembles a Boot. The lower part of Italy is called the Kingdom of Naples. At the top of Italy, to the West, is Genoa; and above, Piedmont, in which is Turin, the Capital of the King of Sardinia's Continental Dominions. At the top of Italy, on

<sup>\*</sup> The words above and below are used in their familiar sense, with reference to the appearance of the places in the maps, and not in their more scientific one, with respect to elevation, or distance from the coast.

the East, is Venice, giving name to the Gulf of Venice, which separates Italy from Turkey in Between Piedmont and Venice is Lombardy. That part of Turkey in Europe which lies along the top of the Archipelago, is Rumelia, below this is Greece, the lowest part of which is called the Morea, antiently the Peloponnese. Immediately above the Gulf of Venice is the Tyrol, and Carinthia, Istria, and Carniola, provinces of Austria; and above Turkey in Europe is Hungary, West of which is Austria, and North of this, Bohemia. The two last named 'countries, together with a considerable tract lying East of France, and North of the Alps, were comprised under the general name of Germany, containing formerly several petty States, and recently several newly-erected Kingdoms and Principalities, the chief of which are Saxony and Hanover in the North of Germany, Wirtemberg and Bavaria in the South. The parts on the Coast, North of France, are the Netherlands, or Low Countries, sometimes called by their antient name of Belgium, and forming, together with Holland and its confederate States, a recently erected Kingdom. Next to these are Holstein, Sleswic and Jutland, forming part of the Kingdom of Denmark; then Prussia, lying above Germany on the Coast of the Baltic. To the East of Germany, above Hungary, was formerly the Kingdom of Poland, divided in 1793 between

Prussia, Russia, and Austria; and the whole remainder of Europe, from the Black Sea upward to the East and North-east, forms a part of the immense Empire of Russia; that part of it which is contained between the Black Sea and the Sea of Azoph is called the Crimea, or Little Tartary. On either side of the Gulf of Bothnia is Sweden. and to the West of Sweden is Norway. Above the upper part of Norway, Sweden and Russia, is Lapland, divided into Danish (or Norwegian), Swedish, and Russian Lapland; and between the Gulfs of Bothnia and Finland, is Finland, divided between Russia and Sweden. The Kingdom of Denmark consists of Jutland in the Continent, and several Islands in the Baltic, of which Zealand and Funen are the chief. Norway is now subject to the Crown of Sweden.\* Between the Island of Zealand and the Coast of Sweden is the celebrated passage called the Sound, where a toll is claimed from all ships which pass, by the King of Denmark.

The principal European Islands are the Islands of Great Britain and Ireland, above which is Iceland. About midway between Europe and America, off the Coast of Portugal, are the Azores, the most remote of the European Islands.

<sup>\*</sup> Denmark and Norway, which had been sometimes under the same, and sometimes under different sovereigns, were united into one kingdom in 1417, and so continued till 1814, when Norway was ceded to Sweden.

In the Mediterranean are Yvica, Majorca, and Minorca, off the Coast of Spain. Under Genoa is Corsica, with Sardinia below it. At the foot of Italy is Sicily, and below it the small but celebrated Island of Malta. Below the Morea, to the East, is Candia, and still Eastward is Cyprus. Of the Islands in the Baltic, the principal is Zealand, in which is Copenhagen, the Capital of Denmark. And in the Arctic Sea is Nova Zembla.

The following are the Capitals of the principal European States, with their lat. and long. The learner is desired not only to look for them in the Map of Europe, but in the maps of the several countries to which they belong:—

		Latitude.	$oldsymbol{L}$ ongitude.
England	London	51° 30′ N.	0° 0′ *

Poitiers	46 35		. Celebrated for the battle of Poitiers,
Agincourt		2 10	September 19. 1356; in which the Black Prince, Son of our King Edward III., with 8000 English, defeated 50,000 French, and took John King of France prisoner.  The battle of Agincourt was fought near the castle of that name, not far from Hesdin in French Flanders, Oct. 25. 1415; in which Henry V. defeated the French with great slaughter. The French left on the field the Constable d'Albert of France, 3 Dukes, the Archbishop of Sens, 1 Marshal, 5 Earls, 92 Barons, 1500 Knights.
Cressy	50 16	1 58 E.	
Rheims	49 16	4 6	Where the Kings of France were form- erly crowned.
Versailles	48 48	2 7	Near Paris, the residence of the Kings of France.
Orleans	47 54	1 54	Giving its title to the Duchy of that name, which was always held by a Prince of the Blood Royal.

The principal Rivers are the Seine, which rises a little North West of Dijon in Burgundy, and flows by Paris and Rouen, into the English Channel at Havre, after a course of about 420 miles. The Loire rises in the Mountains of Cevennes, in the district of Haute Loire, and receives the Allier, another considerable river which rises not far from it. Its course is near 550 miles; it flows by Tours and Orleans, and enters the Bay of Biscay beyond Nantes. The Rhone rises in the Glacier of Furca in Switzerland, and passing by Lyons and Avignon enters the Mediterranean to the East of Nismes and Montpelier. Its whole course is about 450 The Garonne rises in the Pyrenees, receives miles. the Dordogne, and after a course of about 350 miles: passing by Bourdeaux, falls into the Bay of Biscay, not far from the Isle of Oleron.

The principal Mountains are the South Eastern boundary of the Alps, and North of them the smaller chain of Jura and Vosges, forming an Eastern barrier; and in the South West the Pyrenees, which separate it from Spain.

The extent of France is about 204,300 square miles, including Corsica. Its population in 1821 was 30,616,053. Its chief products are wines; and its chief manufactures, silk, cambrics, lace, fine woollen cloths, tapestry, and porcelain.

In the Netherlands (PLJX\*\*\*1.), formerly called also the Low Countries, and Belgium, the following are, the principal Cities:—

	N. La.	E.Lo.
Ghent	51° 3'	3° 45
Antwerp	51 14	4 22
Ostend	51 15	2 55
Namur	50 29	4 51
Louvain	50 53	4 41
Malines, or Mechlin	51 2	4 29

About ten miles South of Brussels is the village of Waterloo; and about two miles farther South is the evermemorable plain where the Emperor Napoleon was utterly defeated by the Duke of Wellington, June 18. 1815.

The chief Rivers are the Scheldt, which rises in France, South of Cambray, and passing by Valenciennes and Antwerp, after a course of about 200 miles falls into the German Ocean near Flushing. The Meuse or Maese, rises in France a little North of Langres, and has a course of about 400 miles, flowing by Namur and Liege; it receives the Waal, a branch of the Rhine, in passing through Holland, and falls into the North Sea, below Rotterdam. Its banks, in the Netherlands, are eminently beautiful and picturesque. There are no Mountains in the Netherlands.

#### In Holland are -

	N. La.	E.Lo.	
Leyden	52° 9′	4° 29′	Celebrated for its University.
Rotterdam	51 55	4 29	The birth-place of the illustrious Erasmus, A.D. 1467.
The Hague	52 4	4 18	The residence of the King of the Netherlands, alternately with Brussels.

The principal Rivers are, the Rhine, hereafter to be described, with its branches, the Waal and Yssal, and

Meuse, all which flow into the North Sea. There are no Mountains in Holland. The Netherlands, and the States of Holland now form one Kingdom, the Extent and Population of which is as follows:—

-	Sq. Miles.	Pop.
The Netherlands, with Luxemburg,	13,400	3,226,000
Holland and its provinces,	11,000	2,000,000
Total	24,400	5,226,000

The chief produce of the Netherlands is grain; of Holland, butter and cheese. The principal manufactures are linen, lace, leather, and some silks. The Dutch also carry on a vast trade in fisheries, particularly that of herrings, for the curing of which they are highly celebrated.

The German States (Pl. VIII) may be divided into Northern and Southern, by the Mayne, which falls into the Rhine at

The chief Cities in the Northern States are -

		N# $La$	E. $Lo$ .
In Saxony	Leipsic	51° 19'	12° 21′
In Hanover	Gottingen	51 51	9 55
In HESSE CASSEL	Cassel	51 19	9 35
On the MAYNE is	Frankfort	50 7	8 36
At its mouth is	Mayence or \ Mentz	<b>\$</b> 0 0	8 11

In Germany, South of the Mayne, we have the following Cities: --

		N. La.	E. Lo.	
In BAVARIA	Ratisbon	49° 0'	12° 3'	
	Manheim	49 29	8 28	
In Wirtemberg	Stutgard	48 46	9 11	

The chief Rivers in Germany are, the Elbe, which rises in the Sudetic Mountains on the confines of Silesia and Bohemia, and, flowing by Dresden, Magdeburg, Hamburg, and Altona, enters the German Ocean, after a course of about 700 miles. West of this is the Weser, which rises in the territory of Saxe Coburg, and flowing by Minden and Bremen, falls into the German Ocean, after a course of about 330 miles. Still West is that noble river the Rhine, almost forming the Western barrier of Germany. It rises in Switzerland, on the North East side of Mount St. Gothard, flows through the Lake of Constance, and passing by Basle, receives the Maine, a little West of Frankfort, on the side of Germany, and a little North of this the Moselle, on the side of France, at Coblentz. It then passes by Cologne, and after entering the kingdom of the Netherlands, turns sharply to the West, divides itself into two branches, the Southern and largest of which is called the Waal, the Northern becomes subdivided, and only a small and comparatively insignificant stream retains the name of the Rhine, and flows into the sea West of Utrecht and Leyden. Its course is about 800 miles. In the South of Germany, the Danube rises in the grand duchy of Baden in Suabia, and passes by Ulm to Vienna, receiving the Iser, the Lech, the Inn, all great rivers, and many others; after which it receives the Tiess on the North. and a little below it the Save on the South side, at Belgrade, and continues its course through Wallachia, till it esters the Black Sea in Bessarabia. Like the Rhine. the Nile, and many other great rivers, its mouths are much choaked by the quantity of deposit which it brings down. Its course is about 1800 miles. The principal Mountains are, the Hartz, in the North; the Erzgeburg,

or Metallic Mountains, running between Bohemia and Saxony; the Mountains of the Black Forest, in Wirtemberg; and the Mountains of Bavaria and Salzburg, which are continuations of the Swiss and Tyrolese Alps.

Germany contains four kingdoms, Saxony, Hanover, Bavaria, and Wirtemberg, besides several smaller states. The empire of Austria, together with several of its dependencies, are Germanic, but may be considered separately.

The Kingdom of Saxony contains about 7226 square miles, and in 1818 had 1,232,077 inhabitants; they are probably increased to at least 1,300,000 by the present time. Its principal produce are minerals of many kinds, especially silver, tin, iron, cobalt, and lead. Its great manufactures are porcelain, woollens, linens, and various metallic articles.

Hanover contains about 14,000 square miles, and 1,300,000 inhabitants. Its principal productions are corn, madder, flax, and hemp. It is rich in mines, of which the iron and silver mines are the most productive.

Bavaria contains about 40,000 square miles, and about 4,500,000 inhabitants. Its chief produce is corn and wine. Its chief mineral riches salt and iron mines.

Wirtemburg contains about 8,200 square miles, and about 1,400,000 inhabitants. Its great produce is wine and corn. Its manufactures, linen, silk, and porcelain. It abounds in forests and minerals, the chief of which are silver, copper, and iron.

The smaller German states are about 35 in number, including the four free cities. It is impossible to enumerate them in so small a work: their extent is about 32,800 square miles, and their population about 4,380,000.

In the Austrian Dominions (Pl. VII.) are the following Cities: —

N. La. E. Lo.

Prague 50° 5' 14° 25' Which is the capital of Bohemia.

Presburg 48 8 17 10 Which is the modern pital of Hungary
Cracow 50 3 19 57 Which was the ancient capital of the late
kingdom of Poland.

Olmutz 49 33 17 9

Tricste 45 40 13 30 Which is the only seaport belonging to the Emperor of Austria,

The principal Rivers in the Austrian Dominions are, the Danube, whose source and course are already described. The Tiess, (Pl. XIV.) which rises in the Carpathian Mountains, in the North East of Hungary, and flows into the Danube, a little North of Belgrade. Its course is near 500 miles. The Save, already mentioned, rises in Illyria, and forms a boundary between the Austrian and Turkish Dominions, till it falls into the Danube at Belgrade. Its course is about 400 miles. The Drave, a considerable, though smaller stream, rises in the Tyrol, and flows into the Danube above the Save, near Esseg. The Inn joins the Danube on the Western boundary of the Austrian Dominions. It rises in the Grisons, in Switzerland, and has a course of about 200 miles. The Elbe has been already described.

The whole Austrian empire, including the dependent states in Italy, and the kingdom of Hungary, contains 276,441 square miles, and 30,166,836 inhabitants. The chief produce is wine, timber, grain, and tobacco. Wax is also produced in great quantities. Its chief minerals are gold, silver, copper, lead, Iron, and quicksilver, and salt. Parts of it also produce excellent marble. The chief gold, silver, and quicksilver mines are in Hungary. Iron abounds in Hungary and Styria, and salt and marble in Styria.

In Switzerland (Pl. VIII.) are -

N.La. E.Lo.

47° 40′ 7° 31′

Zurich 47 22 8 31

Basle

Lausanne 46° 31' 6° 45'

	276,441	70,166,836

country of the Grisons, flows through the Lake of Constance, which is about 35 miles long, and 12 broad; the Rhone, already described, which rises from an extensive glacier, forming as it were a palace of arches of perpetual ice, and flows through the Lake of Geneva, which is about 45 miles long, and 12 in its greatest breadth to the Aar, which rises at the foot of Mount Schreckhorn, and joins the Rhine near Waldshut; the Limmat, which flows into the Aar. The Mountains in Switzerland are the Alps, the highest of which are towards Savoy, Mount Blanc being about 15,662 feet high, and Mount Rosa, to the North East of Mount Blanc, very little lower. Between them is the great St. Bernard, one of the passes over the Alps into Italy.

Switzerland contains about 19,000 square miles, and 1,750,000 inhabitants. Its principal produce is cattle, butter and cheese, and timber. Its chief minerals, salt, marbles, and precious crystals. Its chief manufactures, clocks and various kinds of ingenious mechanism.

### In the North of Italy (Pl. VIII.) are -

N. La. E. Lo.

Alessandria 44° 57′ 8° 40' Near which is Marengo, celebrated for the victory of Buonaparte over the Austrians.

Milan	4.5	28	9	11

Parma	44	48	10	20
Piacenza	45	2	9	43
Modena	44	34	11	12
Genoa	44	25	8	58

The principal Rivers are, the Po, which rises in Monte Viso, one of the Cottian Alps, and flows through the whole upper part of Italy, from West to East. course is about 450 miles, flowing by Turin, Alessandria, Piacenza, Cremona, and near Ferrara; it enters the Adriatic, South of Venice, having received the waters of the Tesino, Adda, Mincio, and many others in the North, and the Tanaro, Trebia, Panaro, and others on the South The Adige is another important river, which rises in the country of the Grisons, and flows by Turin and Verona, into the Adriatic Sea, a little North of the Po. Its course is above 250 miles. The Lago Maggiore is a lake about 30 miles long, and 7 broad; the Tesino flows through it. East of this is the lake of Como, 36 miles long, and from 1 to 4 broad; and South East of this, the Lago di Garda, or Benaco, 35 miles long, and about 14 broad, from whence the Mincio flows into the Po. The Alps are the principal Mountains in the North of Italy. ,

### In the Central part of Italy (Pl. VIII.) are —

	N. La.		E. Lo.	
Lucca	43°	<b>54</b> ′	100	34 <sup>'</sup>
Pisa	43	43	10	24
Florence	43	46	11	16
Livorno or Leghorn	43	33	10	17
Bologna	44	30 °	11	21

The principal Rivers are, the Tiber, which rises in the Apennines at no great distance from Perugia, and after a course of about 160 miles falls into the sea below Rome; and the Arno, which rises in the Apennines East of Florence, and flowing by that city, falls into the Mediterranean below Pisa. Its course is not 100 miles. The principal Lakes are, the Lago di Perugia in Etruria, and Lago di Celano in the Abruzzo, in the kingdom of Naples, which is rather the larger of the two, and does not exceed 30 miles in circumference. The Apennines are the principal Mountains in the centre of Italy, and run through the middle of Italy from North to South.\*

In the Southern part of Italy (Pl. IX.) are —

N. La. E. Lo. Brindisi 40° 48′ 17° 46′ Taranto 40 35 17 29

In Sicily are -

N. La. E. Lo.
Messina 38° 11' 15° 48'
Catania 37 30 15 6
Siracusa 37 3 15 27

In the South of Italy, near Naples, is the celebrated Volcano of Vesuvius. In Sicily is the much more stupendous Volcano of Etna, near Catania. The height of Vesuvius is not above 3600 feet, nor its circumference more than thirty miles; while Etna rises at least 11,000 feet in height, and covers a space of 180 miles in circumference. Many of the smaller mountains in the neighbourhood of Etna exceed Vesuvius. The crater of Vesuvius is about half a mile in circumference; that of Etna never less than three, and often six miles. In the neighbourhood of Sicily, to the North, are several small Volcanic Islands, known by the general name of the Lipari Isles.

<sup>\*</sup>The Apennines branch off from the Alps, and their highest point is Mount Velino, near the centre of Italy, almost 8000 feet above the level of the sea.

Italy contains the following	g States:-	-
•	Sq. Miles.	Pop.
Kingdom of Lombardy	18,660	4,111,535
Kingdom of Sardinia	<b>2</b> 7,400	3,994,000
Pope's dominions	14,500	2,346,000
Naples	43,500	6,618,000
Tuscany	9,270	1,170,000
Modena	2,480	435,000
Parma	2,300	380,000
Lucca	450	124,00∪
San Marino	40	7,000
•	118,580	19,185,535
From which deduct -		
Sq. Miles. Pop.		
Sardinia 13,030 970,000		
Sicily 12,500 1,645,000 ·		
25,530 2,615,000		
	25,530	2,615,000
Learing for Italy alone	93,050	16,570,535

But as Naples and Sicily are probably under-rated by 400,000, we may call the population of Italy alone 17,000,000. The produce of Italy is silk, oil, wine, cheese, fruits, rice, flax, maize, &c. Its minerals are numerous, particularly iron from Elba, gold from Macugnaga, and sulphur from Vesuvius. It abounds in

# Eastward, below Cadiz, is the famous Rock of

Trafalgar

	N.La.	W.Lo.	
Gibraltar	36° 6′	5° 19	Belonging to the English, who took
			it in 1704

The promontory at the entrance into the Straights of Gibraltar is the evermemorable Cape Trafalgar, where
Lord Nelson defeated the combined fleets of France and Spain with immense loss, having taken no less than nineteen sail of the line, October 21. 1805, and was himself shot by a rifleman in the very moment of victory.

The principal Rivers of Spain are, the Ebro, which rises near Reynosa, and flows by Tudela and Saragossa, falling into the Mediterranean below Tortosa; it has a course of near 400 miles. The Guadalquivir rises in the Sierra Nevada in Granada, and flows by Cordova and Seville, falling into the Atlantic about 25 miles

N. W. of Cadiz. Its course is about 400 miles. The Guadiana rises in La Mancha, near Almagro, and flowing by Ciudad Real and Badajoz, falls into the Atlantic, about 30 miles E. of Cape St. Mary, having a course of about 500 miles, in the latter part of which it forms the barrier between Spain and Portugal. The Tagus rises in the Mountain's of Albarracin, on the confines of Arragon and Castile, and flows by Toledo, Talavera, Almaraz, and Alcantara, and then entering Portugal, flows by Santarem and Lisbon, below which it falls into the Atlantic, after a course of not much less than 600 miles. The Douro or Duero rises near Soria, on the confines of Arragon, and flowing by Zamora, enters Portugal, and falls into the Atlantic below Oporto. It has a course of rather more than 400 miles.. The principal Mountains of Spain are, the Pyrenees, of which the highest, Mount Perdu, is about 11,271 feet, being not lower than Etna; the Sierra Morena; and Sierra Nevada, the highest point of which is Mulhacen in Grenada, which is 11,669 feet, being near 400 feet higher than the highest of the Pyrenees; and Montserrat; which last is a solitary mountain near Barcelona, and so high that the Islands of Majorca and Minorca can be seen from it, which are distant about 180 miles. Spain contains about 180,000 square miles, and a population of 11,412,000 inhabitans. Its principal produce is wine, wool, oil, barilla, oranges, almonds and nuts. Its principal mines are copper, iron It abounds in beautiful marbles. and quicksilver. chief manufactures are silks, velvets, and cottons, and in the North, iron and glass.

#### In Portugal (Pl. XII.) we have -

	N. La.	W. Lo.
Oporto	41° 11′	8° 30'
St. Ubes, or Setuval	38 22	8 54
Coimbra	40 12	8 24 Celebrated for its University.
Evora	38 28	7 50
Beja	37 55	7 50

The Mountains of Portugal are not of very peculiar magnitude or importance. The chief is the chain of Arrabeda, in Estremadura, some of the highest points of which may be 8000 feet. The principal Rivers are, the Tagus and Douro, already described, the Mondego, which rises near Guarda, and flows into the Atlantic by Coimbra; and the Minho, which rises in Gallicia, and forms the boundary between that province and Portugal; the former may have a course of near 100, the latter of about 140 miles.

Portugal contains about 41,150 square miles, and 3,683,000 inhabitants. Its produce is wine, oranges, lemon, cork, silk, and wool. Its manufactures are in a very low state.

The principal Cities in Turkey in Europe (Pl. XIV.) are —

D

	N. La.	E. Lo.
Atini	38° 2′	23° 53' The antient Athens
Larissa	39 48 .	22 47
Salonica	40 38	22 5 <b>6</b>
Adrianople	41 55	26 27
Belgrade	44° 43	20 10
Bucharest	44 57	26 8
Ismail	45 21	28 50) and at Davis
Bender	46 50	28 50 29 56 ceded to Russia.

The principal Rivers of Turkey in Europe are, the Danube, already described; and the Maritz, or antient Hebrus, which rises in Mount Hæmus, now Despoto Dag, and flowing by Adrianople, after a course of about 320 miles, falls into the Archipelago at the Gulph of Eno. The chief Mountains are, part of the grand Carpathian chain, running through Wallachia; the chain of Hæmus and Rhodope; Mount Olympus; Athos; and others, hereafter to be described in the account of ancient Greece.

Turkey in Europe is supposed to contain about 200,000 square miles, and about 10,000,000 of inhabit-tants. It produces silk, rice, figs, cotton, and tobacco; besides madder, and a peculiar oak-gall used in dyeing, called vallona.

### In Prussia (Pl. VII.) are -

	N	La.	E.	Lo.	
Konigsberg	54°	42'	20	29′	
Breslaw	51	6	17	2	The carital of Silesia.
Warsaw	52	14	21	0	The former capital of Poland, now
					Nuchy, belonging to Russia.
Dantzie	54	20	18	<b>58</b>	
Potsdam	52	24	13	7	A favourite royal residence.
Magdeburg	52	8	11	38	A prodigiously strong fortress.

The principal Rivers of Prussia are, the Elbe, already described; the Oder, which rises in the Mountains of Moravia, about 20 miles North East of Olmutz, and flowing by Breslaw, Frankfort on the Oder, and Stetten, enters the Baltic in Pomerania, after a course of about 600 miles. The Wiesel or Vistula, one of the noblest Rivers of Europe, rises at the foot of the Carpathian Mountains, in Austrian Silesia, and flowing by Cracow,

Warsaw, and Thorn, enters the Baltic near Dantzic. It has a course of 650 miles. The Memel or Niemen rises near Minsk in Lithuania, and flowing by Grodno and Tilsit, enters the Baltic below the town of Memel. It has a course of near 400 miles. The principal Mountains of Prussia are in its Southern boundary, in what was formerly part of the Kingdom of Poland: they are part of the Carpathian chain, and are called by the general appellation of the Sudetic Mountains: the greatest height is about 5000 feet.

Prussia contains 115,800 square miles, and a population of about 11,000,000, but this includes the Provinces both in and out of Germany. Its principal products are flax, madder, and woad. Its chief mines are salt and iron. It is remarkable for the quantities of amber found on its shores, and for various gems in Silesia. Its principal manufactures are linen, fine woollen cloths, porcelain, and hardware.

The Duchy of Warsaw, containing about 47,000 square miles, and 2,800,000 inhabitants, is all that now remains of the Kingdom of Poland, which has been divided, and annexed to the dominions of the three powers which surrounded it, Austria, Prussia, and Russia.

Russia in Europe (Pl. X.) contains the following principal Cities.-

	N.	$La_{\bullet}$	$\boldsymbol{E}.$	$L_{?ullet}$	
Moscow	55°	45'	37°	33'	The ancient capital of Muscovy.
Smolensk	54	<i>5</i> 0	31	56	•
Cherson	46	39	<b>5</b> 2	56	On the Black Sea.
Kafa, or Theodosia	<b>}</b> 45	6	35	13	On the Sea of Azoph.
Riga	56	50	24	7	·
Archangel	64	40	38	56	

The principal Rivers of European Russia are, the

Volga, or Wolga, which rises near Oshtashkof, in the Valdai Mountains, about latitude 57°, and flowing by Tver, receives near Kazan the great River Kama, which rises in the Uralian Mountains; from whence it proceeds Southwards, forming the boundary between Europe and Asia, to Tsaritzen, when it turns Eastward, and falls into the Caspian, below Astrachan. 'Its course is about 2500 miles. The Don rises in the Government of Tula, and making a bend to the West, a little before the Volga bends to the East, near Tsaritzen; is generally considered as forming the boundary of Europe from thence, till it falls into the Sea of Azov, at Azov. course is about 1100 miles, but its mouths, like those of many other great rivers, are much choaked by the particles it brings down. The Dneiper rises in the confines of the Governments of Tver and Smolensko, and flows by Smelensko, Mohilov, Kiev, and Ekaterinsolav, falling into the Black Sea by Cherson, after a course of near 1200 miles. The Dniester rises in the Carpathian Mountains, in Austrian Gallicia, and flowing by Bender, enters the Black Sea near Akerman. course is about 700 miles. These are the principal Rivers in the South of Russia in Europe; of those which have a Northern course, the principal are the Petschora, which rises in the Ural Mountains, about latitude 62°, and flows into the Arctic Ocean, about 15° North East of Archangel, having a course of 650 miles or more. The Dwina rises to the West of Vologda, in about 59° of North latitude, and receiving also some very large streams from the Ural Mountains, flows into the White Sea by Archangel; its course cannot be less than 800 miles. The Onega rises South East of the Lake of the

same name, and flows by the town of Onega into the Bay of Onega on the White Sea. Its course is about 450 miles. The Duna rises in a Lake of the same name, on the confines of the Government of Tver, and flows by Witepsk and Riga, into the Gulph of Riga on the Baltic. It has a course of about 400 miles. The Neva is a stream connecting the Lake Ladoga with the Gulph of Finland. Its course is only about 35 miles; but it is ennobled by flowing through Petersburg, the capital.

Russia contains also some very important Lakes. Lake Ladoga, near Petersburg, is 130 miles long, and 75 miles broad, being the largest in Europe. Lake Onega, Eastward of this, is about the same size. Lake Peipus, or Tschudskoe, lies to the South of the Gulph of Finland, with which it communicates by the River Narova. It is 50 miles long and 35 broad. The principal Russian Mountains are, those of Thurida, on the Black Sea; of Olonetz, towards the White Sea; and the great Ural chain, which separates Europe from Asia: but none of these heights are very considerable, —Pauda, which is one of the highest, not being 5000 feet above the level of the sea.

The extent of Russia in Europe is rather more than 1,000,000 square miles; its population not much more than about 35,000,000. The products of such an extensive country are of the greatest variety, from the pine forests of the North to the pomegranate and citron groves of the South. Its minerals are equally various; but the chief of all is iron. Vast mineral riches, in gold especially, have recently been discovered in the Ural Mountains. Its manufactures are linen, silk, leather, hemp, isinglass, pitch, tar, potash, &c.

## In Sweden (Pl. XI.) are —

Upsal 59° 52′ 17° 39′ Celebrated for its University.

Carlscrona 56 7 15 33

Stralsund 54 20 12 58 In Swedish Pomerania.

Abo 60 28 22 7 In Finland.

Sweden, Norway, and Lapland abound in Lakes, but the Rivers are generally of inconsiderable magnitude. The principal Rivers of Sweden are, the Dahl, which rises in the Norwegian Alps, giving name to the province of Dalecarlia, and enters the Gulph of Bothnia, nearly opposite, but a little North of the Island of Aland; its course may be 250 miles. The Tornea rises from a Lake of the same name, and enters the Gulph of Bothnia at its Northern extremity, near the town of Tornea, the most Northern city in Europe. Its course may be about 350 miles. The Lakes of Sweden are calculated to occupy above 9,000 square miles. The principal are the Wenner Lake, which is almost 80 miles long, and 25 broad; East of this is the Wetter Lake, about 65 miles long, and 16 broad; and the Hjelmar Lake, which is 40 miles long, but narrow, and communicates with the Maler Lake, which is also narrow, but these the Maler Lake communicates 80 miles long. with the Baltic by Stockholm, leaving the Hjelmar Lake to the South West. Sweden may be considered as a mountainous country, especially on the confines of Norway. The highest Swedish Alps are about 6700 feet above the level of the sea. The Island of Rugen, in the Baltic, and several smaller Islands, belong to Sweden. In a direct line above the town of Tornea is

North Cape 71° 11 25° 57' The extremest Northern part of Europe.

	Sq. M.	Pop.
Sweden contains	180,000	<b>2,</b> 557,781
Norway	110,000	88 <i>5</i> ,470
	290,000	3,444,251

The chief produce of Sweden and Norway is iron, timber, pitch, tar, and turpentine. The chief mines of Sweden and Norway are iron and copper; and in Norway also is the celebrated silver mine of Konegsburg. They also abound in marbles. The chief manufactories are connected with the produce of the forests and mines.

# In Denmark and Norway (Pl. XI.) —

N.La. E.Lo.

Altona 53° 34′ 5° 58′ Is a celebrated commercial town, near Hamburg, belonging to Denmark.

Christiana Drontheim or Tronyem  $\begin{cases} 59 & 55 & 10 & 49 \\ 63 & 25 & 10 & 25 \end{cases}$  Are two of the most considerable, cities in Norway.

Denmark abounds in small streams, but has no River of importance. In Norway there are abundance of Rivers, but few of them, owing to their cataracts, are navigable. The principal River of Norway is the Glomen, which is full of cataracts and shoals: it springs from the Lake of Oresund, and falls into the North Sca at Fredericksfadt, below Christiana. Its course is 350 miles. Denmark has no Mountains; but Norway is an Alpine country. The highest Norwegian Mountains are about 9600 feet, or perhaps somewhat more, above the level of the sea. Among the numerous Danish Islands,

we should not omit the mention of Iceland, in which is the celebrated Volcano of Hecla, about 5000 feet high, and several Water Volcanoes, called Geysers, which throw up a large column of water to an immense height. The highest Mountain in Iceland is Snæfial, about 6860 feet above the sea. The Feroe Islands, off the Coast of Norway, belong to Denmark.

Denmark being so scattered in its surface, is not easily reduced to measure. It is thought to contain about 22,000 square miles, and a population of about 1,645,000. Its chief produce is fish, butter, cheese, and madder; its chief manufactories, coarse woollens, earthenware, and sugar.

### Religions of Europe.

THE Church of England is commonly called a Lutheran Church, but whoever compares it with the Lutheran Churches on the Continent will have reason to congratulate himself on its superiority. It is, in fact, a church sui generis, yielding in point of dignity, purity, and decency in its doctrines, establishments, and ceremonies, to no congregation of Christians in the world; modelled to a certain and considerable extent, but not entirely, by our great and pious Reformers, on the doctrines of Luther, so far as they are in conformity with the sure and solid foundation on which it rests, and we trust for ever will rest, the authority of the Holy Scriptures, Jesus Christ himself being the chief corner-stone.

The churches of the North of Europe, Norway, Sweden, Denmark, Prussia, and the North of Germany, are Lutheran.

Martin Luther, the great Reformer, was born at Eisleben, in Saxony, A. D. 1483; was summoned to Rome for preaching against Indulgences A. D. 1518; excommunicated by the Pope A. D. 1520; threw off his monastic habit A. D. 1524; married A. D. 1525; died A. D. 1546. His great protector on the Continent was the Elector of Saxony.

John Calvin, whose real name was Chauvin, was born at Noyon, in Picardy, A. D. 1509. The persecution of the Protestants in France obliged him to fly to Geneva, where he established his system, and died A.D. 1564.

Among the leading features of Calvinism are, belief in Predestination, Election and Reprobation, and Irresistible Grace, together with the rejection of Episcopacy; instead of which Calvin proposed that the Church should be governed by presbyteries and synods, composed of clergy and laity, without bishops or any clerical superiority. Hence Calvinistic churches are also called Presbyterian. The following churches are Calvinistic: Scotland, Holland, and Geneva.

Protestants are subdivided into numerous other sects, which it is unnecessary to particularize.

The Roman Catholic church contains many errors, which were gradually introduced into it by the continually increasing thirst of the Popes for temporal

power. Among their principal errors, renounced and opposed by the Protestants, are, Transubstantiation, or a belief that the consecrated wafer, or Host, as it is called (from Hostia, a victim), are absolutely changed in the Sacrament of the Lord's Supper into the real and substantial body and blood of Christ; Purgatory, or the intermediate state of punishment between this life and the final judgment, from whence the souls of men can be delivered by the prayers, or alms, or penances of the faithful; the Intercession of Saints; the worship of the Virgin Mary; miraculous Interpositions; the Celibacy of the Clergy: - against these and many other idle, superstitious, or erroneous doctrines, and against the Supremacy and Infallibility of the Pope, the Reformed Churches protest, and are therefore called Protestant Churches.\* The Popes formerly claimed the supreme dominion in things spiritual and temporal over all the Sovereigns of the earth, by virtue of being themselves the immediate vicars or vicegerents of God. - It is but justice to the Roman Catholics to add, that these high pretensions, generally known under the name of the dispensing and deposing powers, (or the power of the Pope to dispense with the oath of allegiance from the subject to the Sovereign, and to depose the Sovereign in case of heresy,) have been formally disavowed by the six principal Catholic Universities, consulted for that purpose in the year 1788.

### The following countries are Roman Catholic: France,

• The term *Protestant* was originally applied to the Elector of Saxony, the Landgrave of Hesse, and other Lutheran powers of Germany, who protested against the decree of the Diet of Spires, for the maintenance of the Catholic religion, A. D. 1550, April 19.

Spain, Portugal, Italy, Austria, nearly the whole of the Southern German States, the Netherlands, and part of Switzerland.

The King is the head of the Church of England. The established Religion of Ireland is that of the Church of England; but the mass of the population is Roman Catholic.

The Greek Church is derived from the Greek Christians, who formed the Eastern division of the Roman Empire, the capital of which was Constantinople. Hence it is also called the Eastern, in contradistinction to the Romish or Western Church, from which it differs in many unimportant points of discipline, but few very material points of doctrine. The Patriarch of Constantinople is here of the Greek Church, which comprehends the Russians and Greeks, whether on the Continent or in the Grecian Islands.

Mahometanism is a form of religion engrafted on the Jewish and Christian dispensations by the impostor Mahomet, who was born A.D. 571, at Mecca, in Arabia, and died A. D. 632. The Mahometans acknowledge the divine mission of Moses and of Christ; but maintain that these were ineffectual to convert mankind, and that none but faithful Mussulmen, or Mahometans, will be entitled to future happiness, which they believe will consist in a paradise of sensual delights. They are also believers in predestination. The doctrines of Mahomet are to be found in the Coran, which may be called the Mahometan Bible.

#### CHAPTER III.

#### GREAT' BRITAIN.

#### M.G. Plates III. IV. V.

• The Island of Great Britain extends from 50° to 58° 30' of North latitude. Its length is about 580 British miles, and its greatest breadth, from Land's End to the North Foreland in Kent, is about 370.

Great Britain is divided into England, Wales, and Scotland. The greatest of these divisions is England, which is bounded on the East by the German Ocean, on the South by the English Channel, on the West by Wales, between the Bristol Channel and Chester, and above that by St. George's Channel, and on the North by the river Tweed, and an imaginary line continued South-west down to the Firth of Solway. The remainder of the island, North of this, is Scotland.

England was divided into Shires by Alfred; these are also denominated Counties, from having been governed by an Ealderman, a dignity corresponding with the Latin *Comes*, or Count, and afterwards with the Danish title of Earl.

England and Wales are divided into 52 Counties, containing about 57,960 British square miles\*, which may be classed as follows:—the extent and population are taken from the Returns to Parliament in 1821.

	Counties.	Extent in Sq. Miles.	4	Chief Towns.	Popu- lation.

-------------	--------------------

The principal Rivers in England are, the Thames, which rises in the Cotswold Hills, in Gloucestershire, and flows by Oxford, Reading, Windsor, Eton, and Richmond to London, and thence by Greenwich and Gravesend to Sheerness, when it receives the Medway and falls into the sea. Its course is about 220 miles. The Severn rises in Plinlimmon, a mountain on the edge of Montgomeryshire and Cardiganshire, and flows by Shrewsbury, Bridgenorth, Worcester, Tewkesbury,

(where it receives the Warwickshire Avon,) and Gloucester, into the Bristol Channel, below Bristol, receiving in its estuary the waters of the Wye. Its course may be The Humber is rather an estuary on the 230 miles. German Ocean than a River, receiving the waters of several Rivers, the principal of which are the Trent, and the Yorkshire Ouse. Its length is about 200 miles, taking the Trent for the principal stream, which rises near Leek in Staffordshire, and flows by Nottingham and Gainsborough. The Mersey rises in Yorkshire, but till it comes within a few miles of Liverpool, where it forms an estuary, is an inconsiderable stream. In Wales, the Dee rises beyond Bala, and flowing through Balalake, and thence by Llangollen, forms an estuary below Its course may be about 75 miles. rises in Plinlimmon near the Severn, and flowing by Hereford, Ross, and Monmouth, falls into the estuary of the Severn below Chepstow. Its course may be rather more than half that of the Severn. The principal Lakes of England are on the North Western side, in . Westmoreland and Cumberland. Of these Windermere in Westmoreland is about 15 miles long, and a mile broad, on the average. Ullswater is about eight miles long, and nearly a mile broad, and Derwentwater or Keswick-lake is rather more than three miles long and a mile and a half broad. In Wales Bala-lake is the largest, being about six miles long and a mile broad.

The following may be reckoned among the most remarkable mountains of England:

In Somersetshire, the Mendip Hills are an extensive range, but of no great elevation. In Devonshire, a long range runs through the country, seen at a great distance by mariners, and called by them the High Blue Land.

Scotland (Pl. V.) contains about 278 miles in length, its breadth varies from 180 to 60 miles, giving a surface of about 30,500 square miles, on the best recent calculation, and comprising the following 33 counties, according to the Act of Union in 1707. The extent is given from the Scotch Statistical Accounts; the population from the returns to Parliament in 1821.

The principal Rivers in Scotland are the Forth and Clyde, which are united by a magnificent canal, begun in 1768 and finished in 1790, which saves above 500 miles of dangerous navigation round the coast of Scotland; the Tay, the Spey, the Dee, and the Tweed. The Forth rises in Ben Lomond, and, flowing by Stirling, falls into the estuary called the Firth of Forth, which forms a grand arm of the Sea at Edinburgh. Its course is about 180 miles, being often very circuitous; it forms a noble estuary, and at its mouth is almost 40 miles wide. The Clyde rises in the corner of Tweedale, not far from the

Southern source of the Tweed, and flowing by Lanark, Glasgow, Dumbarton, and Greenock, falls into the Firth of Clyde. It has some fine falls, about 80 feet high near Lanark, but has not a course of above 70 miles, including its windings. The Tay rises in a Lake of the same name, and flowing by Perth, falls into the North Sea near Dundee. It has a deep yet rapid course of The Spey rises near Fort Augustus about 100 miles. in Inverness, not far from the high mountain Corriarok; and, partly dividing the counties of Banff and Elgin, flows into the North Sea at some distance East of Forres, where Shakspeare lays the opening scene of Macbeth. course is a little less than 100 miles. The Dee rises in Cairngoul, in Aberdeenshire, and flows into the sea by. Aberdeen. Its course may be about 110 miles, windings included.

The Tweed rises in Tweedale in the South of Peebleshire, and flowing by Peebles, Kelso, and Coldstream, falls into the Sea at Berwick, having a course of about 80 miles.

Scotland abounds with magnificent Lakes, the principal of which are Loch Lomond, Loch Awe, Loch Tay, Loch Lochy, and Loch Ness. Of these Loch Lomond is near 30 miles long, and at the bottom near nine miles broad, and beautifully studded with islands; it gradually contracts to less than a mile in breadth, but its scenery is every where beautiful and romantic. It principally lies between the counties of Stirling and Dumbarton. Loch Awe, in Argyleshire, is 30 miles long and two broad. Loch Tay is in Perthshire, and is about 15 miles long by one or two in breadth. Loch Lochy is in Inverness-shire, nearly the size of Loch Tay. Loch Ness is 22 miles long, and from one to two and a half broad. The two latter are united by the Caledonian Canal, a stupendous work,

undertaken to unite the Eastern and Western Coasts by inland havigation, and avoid the dangerous passage round the North of Scotland. This magnificent work is 110 feet wide at top, 50 at bottom, and 20 feet deep, so that it will admit frigates of 32 guns. Among the lesser Lakes we should not omit Lochs Vennachar and Katherine, about 25 miles North-west of Stirling; and the adjacent scenery of the Trosacs, which the pen of a great modern poet has made classic ground. Lochlevin, in Fifeshire, is also celebrated as the spot where the unfortunate Queen Mary was confined by the confederate Lords, A. D. 1567. Scotland is also remarkably indented by the sea, arms of which, from two to five miles broad or more, run up the country, and are called Lochs.

Scotland, north of Stirling, presents a vast extent of mountain scenery, emphatically called the Highlands. The principal chain is that of the Grampian Mountains, running across the Island from Loch Lomond on the West, to Stonehaven in Kincardineshire on the East. Among them we may notice—

Ben Nevis is the highest mountain in Great Britain.

Ireland (Pl. V.) is about 235 miles in length and 182 in its greatest breadth; containing, according to Ds. Beaufort, 30,370, but, according to Mr. Wakefield, about 32,000 square miles. It is divided into four provinces. Ulster in the North, Leinster in the South-east, Munster in the South-west, and Connaught in the West. These were divided in the reigns of James I. and Charles I., into the Counties below enumerated, but their capitals or Assize towns have in several instances fallen into decay.

The principal Rivers are, the Shannon, a noble river, which rises in the Lake of Allen in the county of Leitrim, and passing through two other considerable lakes, Lough Ree and Lough Derg, extends below Limerick, into an estuary 60 miles long and from three to ten miles broad, till it falls into the Atlantic at Loop Head. It has a course of 200 miles. The Liffey is an inconsiderable stream ennobled by flowing through the capital, and the Boyne is celebrated for the battle fought on its banks between William III. and the exiled James II., July 1. Among the numerous Lakes of Ireland, the largest is Lough Erne, in the county of Fermanagh, which in its greatest extent is 30 miles long and, in parts, 10 broad. In an island almost in the narrowest part of. this lake, on its Western side, stands the town of Enniskillen. Lough Neagh, between the counties of Antrim, Derry, Tyrone and Armagh, has, however, a greater expanse of water, being 20 miles long and 12 broad. by far the most celebrated Lake of Ireland, is that of Killarney, in the county of Kerry, which, though not large, for beauty and variety of scenery is unrivalled.

The Mountains of Ireland are not of any great elevation. The highest are the Macgillicuddy Reeks, near the Lake of Killarney, which are about 3400 feet high. Mangerton, near the same lake, is 2511 feet. The Mourne Mountains are in the County of Down. Sliebh Donard, the highest, is 2786 feet. Croagh Patrick and Mount Nephen, in the county of Mayo, are 2660 and 2684 feet respectively. The Wicklow Mountains are more remarkable for their picturesque scenery than for their elevation. We ought not to pass unnoticed the Giant's Causeway, at the North-west extremity of the coast of Antrim, which, like the Island of

Staffa, off the Western coast of Scotland, is a vast collection of chasaltic pillars, but less magnificent than those in that celebrated cave of Fingal.

Among the British Islands (Pl. III.), we may enumerate the Isle of Wight, off the coast of Hampshire; the islands of Scilly, off the coast of Cornwall; the isles of Anglesea and Man, in St. George's Channel; the isles of Bute and Arran (Pl. V.), off the peninsula of Cantire; the Hebrides, off the Western coast of Scotland, the principal of which, towards the Atlantic, are Lewis and North and South Uist; towards the coast of Scotland, are Skye, Rum, Mull, Isla, and Jura; the Orkneys, off the North of Scotland, the chief of which is Mainland, called by some Pomona; and the Shetland Isles, North-east of the Orkneys, the chief of which is also called Mainland. The islands of Jersey, Guernsey, and Alderney, belong also to Great Britain, but lie off the coast of Normandy. (Pl. VI.)

The produce and manufactures of Great Britain and Ireland are far too copious a subject for a work like this. Suffice it to say, that England produces corn, cattle, sheep, and wool, timber, and many other important articles of agricultural produce. Its principal indigenous fruits are apples and pears (the latter improved by sorts from France). Its mines of coal, iron, copper, lead, and tin, besides other metals, and salt, are an inexhaustible source of wealth. Silver has been found sometimes to a considerable extent in the Cornish lead mines. The antient staple manufacture of England is woollen, but of late years that of cotton has been carried on to an almost inconceivable extent, and that of silk is beginning to

be important. The manufactures of hardware, iron, steel, tin, copper, and brass, are also of immense importance, and in the above-mentioned instances, and many more, too tedious to be enumerated, the commerce of Great Britain is beyond all comparison greater than that of any other nation in the world. The staple manufacture of Ireland is linen. Its great agricultural products, cattle, provisions, and butter. Scotland is celebrated for its agriculture, its cattle, its fisheries, and its manufactures of linen and cotton. Ireland and Wales are also rich in marbles; so is the South of England, about Plymouth. Wales and Scotland produce admirable Gold has been found in Ireland. Gold, silver, pearls, and various precious stones, particularly topazes and amethysts, are found in Scotland: various kinds of agates, and coloured rock-crystals, are very abundant there and in the adjacent islands.

#### CHAPTER IV.

#### ASIA.

M.G. Plates XV. XVI.

Asia is in length about 7580, and in breadth about 5250 British miles. Asia is bounded on the North by the Arctic, on the East by the Pacific, and on the South by the Indian Ocean; its Western boundary, which separates it from Europe, has already been described.

Between the Black Sea and the Mediterranean (Pl. XV.) is Anatolia; and at the Eastern extremity of the Mediterranean is Syria, and below it Arabia, between the Arabian and Persian Gulfs. East of the Persian Gulf, and above it, is Persia; East of this Beloochistan and above it Caubul; and South-east of these is Hindoostan, the antient Empire of the Great Mogul, lying between the

Rivers Indus and Ganges, and being that part of Asia in which are the principal British and other European Settlements. In Hindoostan (Pl. XVI.), on the West, is the British settlement of Bombay (an island a little below the Gulf of Cambay, at the top of the Peninsula), and above it is the town of Surat on the Conti-Below it is Goa, the chief settlement of the Portuguese. The lower Western coast of the Peninsula is called the Coast of Malabar, and the opposite Eastern, that of Coromandel. On the coast of Malabar is the kingdom of Mysore, formerly possessed by the celebrated chieftains; Hyder Ali and his son Tippoo Saib, who were almost always at war with the British. Saib was conquered and slain, and his capital, Seringapatam, taken by the British, May 4th, 1799; since which time the Mysore has been under the direction of the British Government. The extreme Southern point of Hindoostan is On the Coromandel or called Capé Comorin. shore, the Kingdom opposite Eastern Mysore is called the Carnatic, nominally possessed by the Nabob of Arcot, but virtually by the British. Rather more than half-way between Cape Comorin and Masulipatam, where the shore bends to the East, is Madras, south of which is Pondicherry, formerly the capital of the French settlements in the East Indies, but now possessed by the British, who are, in fact, the actual pos-

sessors of India Proper. South of Pondicherry is Tranquebar. At the Mouths of the Ganges is Bengal, whose capital is Calcutta, the chief of all the British settlements in India. To the North-west of Bengal is Bahar, and below it Orissa, also belonging to the English. Northwest of Bahar is Oude, and North-west of Oude is Delhi, whose capital of the same name is the seat of the once celebrated Mogul Empire; below Delhi is Agra, and below Oude is Allahabad; above Mysore is Bejapoor, and toward the opposite, or Eastern, side, is Hydrabad, all these provinces are virtually under British Government. Eastward of the Ganges is the Kingdom of Pegu, East of which is Ava, or the Birman Empire, below these is Siam, and below this the Peninsula of Malacca. On the East of the Gulf of Siam is Cambodia, and on the Northeast of it Cochin China. Above Cochin China is Tonquin, and the immense Eastern sweep of the coast is called China, which extends from the Gulf of Tonquin to the Yellow Sea. West of China, and stretching over the British settlements in India, the Mogul Empire, and the Peninsula of Malacca, is the immense unexplored region of Thibet; with Little Thibet to the North-west of it. North and North-west of China is the extensive and almost unexplored region of Chinese or Mongul Tartary (or, as it should be rather called, Tatary). Still Westward, towards

the Caspian, is Calmuc and Usbec Tartary (which consists of roving independent tribes); above whom are the Kirgee Hordes, about the North-east part of the Caspian; and between the Black and Caspian Seas, is Russian Tartary. The whole upper part of Asia, beyond the provinces already described, belongs to Russia, and is included under one general name of Siberia. The North-eastern peninsular extremity is called Kamschatka, and above it are the Coriacs and Tchutuskoi; between which and the North-western parts of North America is a straight called Bhering's Streights.

Among the more remarkable places and cities in Asia, we may reckon, in Asia Minor, or Natolia (Pl. XV.) —

Shiraz 29 36 52 44 Which is situated in a beautiful and fertile vale, and most delicious climate.

Têhran 35 40 50 52 Where the King chiefly resides.

The most important places in Hindoostan have been already described.

#### In China\* the principal Cities are -

The wall of China is one of the most wonderful achievements of human industry. It is conducted over the summits of mountains, some of which rise to the height of 5225 feet, across the deepest vales, over wide rivers, by means of arches, and in many parts is doubled and trebled to command important passes. At almost every 100 yards is a square tower, or bastion. Its length is near 1500 miles, its height 25 feet, and its breadth at the top 15 feet. The towers are 48 feet high, and 40 feet wide. A much greater antiquity is given to this stupendous work than is probably consistent with fact, it being asserted by Sir G. Staunton to be about 2000 years old; but the best informed writers do not give it an antiquity of 600 years, and perhaps even less would be nearer the truth. It was built to prevent the incursions of the Mandshur Tartars into

N. La. E. Lo.

Pekin 59° 55′ 116 28 The population of which is estimated by the recent writers, who accompanied Lord Macartney in his embassy, at 3,000,000; but

his embassy, at 3,000,000; but this seems an excessive calculation. Perhaps 1,000,000 is nearer the truth.

Nankin 32 5 118 47 Once said to have exceeded even Pekin in extent.

Canton 23 8 113 2 Is said to contain 1,500,000 inhabitants, and is the principal port for European commerce. Its real population is probably not 500,000.

# In Independent Tartary the principal City is — N. La. E. Lo.

Samarcand 39° 58′ 64° 9′ Where Timur the Great, or Tamerlane, as he is more generally called, was born, in whose time and that of one of his predecessors, Zingis, the Tartars were a far more civilized nation than they are at present. In A.D. 1494, Sultan Baber, one of the descendants of Timur Khan, was expelled from Bucharia, and founded the Mogul Empire in

China; who, however, climbed over it about A.D. 1630, and conquered China, which they have kept possession of ever since; the reigning monarch, and all the principal officers, being always of Tartar extraction. The canals of China are also very wonderful. The Imperial canal is near 1700 miles long.

In Siberia the chief City is —

N. La. E. Lo.

Tobolsk 58 12 68 15

The principal Rivers of Asia are, the Euphrates, which rises in the Mountains of Armenia, and after a course of 1500 miles flows into the Persian Gulf; the Tigris, which rises 150 miles South of the Euphrates, and joining the Euphrates near its mouth, flows also into the Persian Gulf; its course is about 1000 miles; the Sinde, or Indus, which rises in the Tibetian Mountains, and flows into the Arabian Sea, having a course of 1600 miles; the Ganges, lately discovered to rise in an arch or cavern of snow in the Himalayan Mountains, 13,000 feet above the level of the sea, which, after a course of above 1500 miles, flows into the Bay of Bengal below Calcutta; the Brahmapootra, or Sampoo, whose sources are unknown, and which forms a junction with the Ganges, near its mouth, but for the last 60 miles of its course is from 4 to 5 miles wide, its course is about 1900 miles; the Irawaddy, which has a course of near 1300 miles, through Thibet and the Birman empire; the rivers Hoang-ho and Yang-tse-Kiang, which rise near each other in the Mountains of Tartary, and after flowing sometimes at a distance of above 1000 miles from each other, at last both empty themselves into the Yellow Sea; the former of these has a course of above 2600, the latter of almost 3000 miles; the Ob, which rises in Lat. 55°, and after a course of 2500 miles, falls into the Sea of Ob, a Gulf of the Arctic Ocean. It receives also the Irtish, a river scarcely inferior to itself. East of it are the Yenisei and the Lena, which have each

a course of near 2400 miles. We must not omit some singular and immense bodies of water: of these, the Caspian Sea is detached from all communication with other seas, and is about 700 miles in length, and from 100 to 200 miles in breadth. About 100 miles East of the Caspian is another smaller detached sea, called the Sea of Aral, about 200 miles long, and 70 broad, which is salt like the Caspian, and probably once joined it. At a great distance North-east of the Sea of Aral, is the Sea or Lake of Baikal, in the South of Siberia, about 350 miles in length, and 35 in breadth, whose water is fresh.

The most elevated Mountains of Asia have but lately been explored, and our whole information on the subject is still imperfect. In Thibet, and the adjacent countries, they are of prodigious altitude, - beyond the European Alps, and the American Andes. Dwawala-giri, or the White Mountain, one of the Himalayan chain, has been estimated lately by Colonel Kirkpatrick and Mr. Colebrooke at the amazing height of 26,862 feet above the level of the sea. Among the others most celebrated are the Mountains of Taurus, in Natolia; of Caucasus, whose highest point, Mount Elborous, is equal to Mount Blanc: Mount Ararat in Armenia is estimated at near 10,000 feet; in Syria is Mount Libanus; on the coasts of the Archipelago are Mount Olympus and Mount Ida; in Siberia is the Altaic chain, which extends in length 5000 miles, whose highest summit is Bogdo Alim, or the Almighty Mountain, between the Kalmucs and Mongul Tartary: it is about 10,700 feet in height; in Independent Tartary is Belen Tag, the Northern Imaus of the antients; the name of the Southern Imaus is to be traced in the Himalayan Mountains already mentioned. In Arabia

we must not omit Mount Sinai, which, however, is in itself of no remarkable height. There are some very high mountains in the Asiatic Isles. Mount Ophir in Sumatra is 13,842 feet.

The principal Asiatic Islands (Pl. I.) are the Island of Ceylon, lying to the South-east of Cape Comorin, at the bottom of the bay of Bengal. Off the Promontory of Malacca, South and South-west of it, are the Sumatran or Sunda Isles, of which Sumatra is the largest, but the capital is Batavia, in Java. East of Sumatra, and above Java, is the large Island of Borneo. Above Borneo are the Philippines, belonging to Spain, called sometimes the Manillas, from Manilla, their capital in the Island of Luzon. East of Borneo are the Celebezian Isles, of which Celebes is the chief. East of Celebes are the Banda or Spice Isles, and South of them the Moluccas. East of these is New Guinea, and below them all New Holland, an immense Island, which some geographers dignify with the appellation of another continent, under the title of Notasia. It is hardly one-fourth less than Europe. \* Off the South coast of China lies the Island of Hainan. East of Canton is the Island of Formosa, and East of the Peninsula of Corea, which is at the North-east of China, are the Japan Isles, the chief of which is Niphon. The remainder of the Asiatic Isles will be briefly noticed in another place.

The religion of the Turkish dominions in Asia is Mahometanism. In Georgia and Syria there are many Christians, though their doctrines are very corrupt. In Persia are Mahometans, and in many parts of Hindoostan; but the Hindoo religion is the proper religion

of Hindoostan, and consists in the idolatrous worship of a Trinity, composed of three deities - Brahma, Vishna, and Shiva, or the Creator, Preserver, and Destroyer. The doctrine, however, which pervades a still greater portion of the East is Buddhism, which is a modification of Brahmanism, and which differs from it, first, in being a more refined, benevolent, and philosophical doctrine than that taught in the Vedas or sacred books of the Brahmans, which the Buddhists reject; secondly, in the worship of deified saints, and other subordinate gods; thirdly, the belief that the soul, after a variety of transmigrations, will become continually more purified, till it is united to the body of a beatified saint on earth, and absorbed into the universal mind on leaving this body. They believe in an endless series of dissolutions and reproductions, tillat last the world itself will be dissolved and reproduced. They forbid the destruction of animal life, and are far less burthened with minute ceremonies than the Hindoos. This religion, with various modifications, extends over China, Japan, Tartary, and all the East. Buddha, its founder, is thought to have lived about the sixth century The Thibetians worship the Dalai Lama, before Christ. a man whom they conceive to be omnipotent and immortal, as being a great spirit embodied; but they are in fact Buddhists like the other nations of the East.

The extent of Asia is about 14,000,000 square miles, its population may be vaguely estimated as follows, but there are no certain data:—

	Sq. Miles.	Population.
Turkey in Asia	490,000	<b>#12,000,</b> 000
Arabia	1,000,000	12,000,000
Persia	560,000	10,000,000

	Sq. Miles.	Population.
Caubul and Beloochistan	494,000	14,000,000
Hindoostan	1,280,000	100,000,000
Birman Empire	194,000	14,500,000
China	1,300,000	500,000,000
Japan Empire	90,000	<b>30,</b> 000,000
Independent Tartary	100,000	5,000,000
Siberia and Russian Tartary	5,000,000	5,000,000
Asiatic Islands, unexplored parts, and states not enumerated	5,492,000	100,000,000
	14,000,000	600,500,000

The productions of such an immense country are of course innumerable. Turkey produces cotton, figs, opium, and other medicinal drugs, and some manufactures of camels and goats' hair, and carpets. Arabia is celebrated for its horses and camels; and for its coffee and frankincense, aloes, and some other drugs. Persia is distinguished for its horses and its manufactures of carpets, silks, and brocades; its pearl fishery is also celebrated. India produces rice, sugar, tobacco, silk, cotton, indigo, and spices; its great manufactures are cotton, and silk; it produces also the best diamonds, sapphires, rubies, and other precious stones. China and Japan produce rice, tea, silk, and cotton, and is particularly celebrated for its manufactures of silk, cotton, paper, and porcelain; and its very curious works in ivory, tortoiseshell, mother of pearl, and lacker work. produce of Japan is much of the same kind. Independent Tartary produces horses and camels, and has some manufactures of silk, cotton, coarse woollens, and camels' The Russian dominions in Asia produce timber, and furs, and are rich in every kind of mineral, especially iron, and gold, and silver; mines of immense value are

said to have been lately discovered in the Ural mountains. Its chief manufactures are coarse linens and leather; pitch and tar, which are extracted from its pines; iron; caviar, which is made from the roe; and isinglass, which is made from the sounds of sturgeons, and some other kinds of fish.

#### CHAPTER V.

#### AFRICA.

M. G. Plate XVII.

Africa in breadth is about 4150, in length about 4300 miles.

In Africa the first Kingdom on the Western side, immediately below the Straights of Gibraltar, is Fez, and South of it Morocco; these are united into one Kingdom under the Emperor of Morocco. Next to Fez, proceeding Eastward, is Algiers, and East of it Tunis; then Tripoli, where the shore has taken a Southward direction, and Barca, and still Eastward is Egypt. The whole coast from Fez to Tripoli inclusive is called the Barbary Coast; and the Governments are of a military nature, under a Governor called a Dey, or Bey, who is nominally subject to the Grand Signior, but really independent, except

on his own soldiers, who, with a licentiousness resembling that of the antient prætorian guards, frequently depose and murder their Governors. Below the whole Barbary coast is the Sahara, a great desert of immense and unexplored extent: and below it, reaching from a little above Cape Verd to the Coast of Guinea, is the coast of Senegambia, so called from the rivers Senegal and Gambia; and in the interior various uncivilized Kingdoms of Negro Chiefs, the principal of which are the Foulahs and Jaloffs. Towards the Southern extremity of the coast of Senegambia is the settlement of Sierra Leone; below which is the Coast of Guinea, divided into the Grain coast, Ivory coast, Gold coast, and formerly the Slave coast, till the traffic for slaves was abolished by act of Parliament, A. D. 1806. About the Gold coast, but a little in the interior, are the Ashantees, a powerful nation, and on what was the Slave coast are the Kingdoms of Dahomy and Below Guinea are the Portuguese set-Benin. tlements of Loango, Congo, and Angola. Southern point of Africa is called the Cape of Good Hope \*, long possessed by the Dutch, but at present by the English. Here is the country of the Hottentots. Ascending from the Cape,

<sup>\*</sup> The Cape of Good Hope was first sailed round in modern times by Vasquez de Gama, a Portuguese, A.D. 1497, who thereby discovered a passage to the East Indies. It appears, however, probable, that the Phænicians had doubled it about B.C. 607.

along the East side of Africa to the Red Sea, are Cafraria, and the coasts of Natal, Sofala, Mosambique, Zanguebar, and Ajan; North-west of Ajan is Adel, North of which, and still more in the interior, are the Gallas; and still West, bearing to the South, in central Africa, is Æthiopia, North of which is Nigritia, or Sudan. entrance into the Red Sea, is called the Straights of Babelmandeb; to the West is the Kingdom of Abyssinia, above it is Nubia, comprising Sennaar and Dongola, above which is Egypt. To the West of Abyssinia is Darfur. West of Nubia is Bornou, West of which is Haoussa, and North-west of Bornou is Fezzan, the remainder of Africa is almost wholly unexplored and unknown.

Among the memorable places and cities in Africa, we may reckon —

```

Assouan or

Syene 24 8 32*55 Near the Falls of the Nile.
```

The principal Rivers of Africa are, the Nile, the sources of which have been for so many ages unknown. Mr. Bruce, however, in his Travels to Abyssinia for this express purpose, visited what the Abyssinians termed the Source of the Nile, rising from three fountains at a village called Geesh, in the territory of the Agows, November 5th, 1770. But Geographers still maintain that Mr. Bruce mistook the course of the antient Astapus, now called Bahr el Azreek, or Blue River, for that of the Nile, or Bahr el Abiad, or White River, whose sources are yet undiscovered, and are probably to be searched for in those lofty Alps called Gibel Kumra, or the Mountains of the Moon, in Lat. 8° N., 600 miles beyond the sources of the Nile of Abyssinia. The Great Cataracts of the Nile are in Nubia, about 40 feet high; those of Syene are now only rapids. The Nile is supposed to have a course of above 2500 miles; but it receives comparatively few tributary streams, and its magnitude does not bear a due proportion to the length of its course, not being, for the most part, more than from a quarter to half a mile in breadth. Of its seven celebrated antient mouths. two only are now of any importance, that of Rosetta, which is the principal, and that of Damietta. On the Western side of Africa, is the great river Niger, whose sources and embouchure are also unknown; it was formerly thought to communicate with the Nile. It is singular, that this river, though on the Western side of Africa, runs towards the East, and most probably discharges itself into some immense lake in the central and unexplored parts of Africa.\*

<sup>\*</sup> There seems some foundation for this. See the note at the end of Antient Africa. Mr. Park, however, in his last journey, published in 1815, believes that it turns again to the South-west, and under the name of the Zaire, or Great Congo River, enters the Atlantic.

Above the Niger is the river Senegal, and below it the Gambia, both flowing into the Atlantic; the course of the former may be 1000, of the latter 700 miles. The Zaire or Congo River is also of great size, but its course is yet unexplored.

Of the Mountains the most memorable is Mount Atlas, whose highest points have been supposed 12,000 feet. The central parts of Africa may possibly contain immense mountains, as the mountains of Abyssinia are of prodigious height, and yet seem but parts of some great central chain. There is also some high land about the Cape.

The most remarkable features of Africa are the immense Deserts of Sand, the chief of which, called Sahara, or the Great Desert, is about 3000 miles in length, and almost 1000 in breadth. The sand is here carried by the wind like waves in the sea, or rather like immense moving columns, which not unfrequently overwhelm whole caravans of the unhappy travellers, who attempt to cross these perilous deserts. Frequently also both themselves and their camels perish for want of water.

Below the Straights of Gibraltar, are the Madeira Islands, two in number, belonging to Portugal; and below them the Canary Islands, or Fortunatæ Insulæ of the antients, belonging to Spain, seven of which are inhabited. The chief of the Canary Islands is Teneriffe, where is the celebrated mountain called the Peak of Teneriffe, which is an almost extinct volcano, about 11,424 feet above the level of the sea. Below the Canaries are the Cape Verd Islands, ten in number, lying off Cape Verd, and belong-

ing to the Portuguese, the chief of which is St. Jago. North of Congo is the Island of St. Thomas, belonging to the Portuguese, and very considerably to the West of it the Island of Ascension; below which, to the South-east, is the small Island of St. Helena, belonging to the English, where the homeward bound East Indiamen touch for refreshments. Off the coast of Mosambique is the Island of Madagascar, which is one of the largest in the world, being 840 miles long, and 240 broad; it has been very little explored, and presents a rich prospect to the industry of future speculators. East of Madagascar are the Islands Bourbon, and Mauritius. The Smaller African Islands on the coast of the Red Sea are not worth particular notice.

Africa contains about 10,000,000 square miles, and perhaps 100,000,000 inhabitants, though this can be matter of approximation only. The chief produce of Africa, are dates, oranges, and other fruits, gums, ivory, and ostrich feathers. Gold is found in several of its rivers. It also produces saltpetre, and natron in great abundance.

The religion of Morocco, the Barbary States, and Egypt, and many of the Northern tribes of Africa, is Mahometan. The Abyssinians are nominally Christians, but their doctrines have been grossly corrupted. The Central and Southern tribes of Africa are generally Pagans.

#### CHAPTER VI.

#### AMERICA.

M. G. Plates I. XVIII. XIX. XX.

The immense Continent of America (Pl. I.), forming rather another homisphere than a quarter of the globe, was discovered by Columbus. In his first voyage he discovered the Bahama Islands, October 12. 1492, and soon after Cuba and St. Domingo. It was not till his fourth voyage that he discovered the mainland of South America, in the year 1502; previously to which time Amerigo Vespucci, a Florentine, had published an account of the Islands discovered by Columbus, and, from this circumstance, has given his name to the New World. The first discovery of North America was made by Giovanni Cabot, a Venetian, in the service of our Henry VII. A. D. 1497.

North America (Pl. XVIII.) is bounded on the East by the Atlantic, on the West by the great Pacific Ocean, on the South by the Isthmus of Panama; on the North, above Hudson's Bay, its boundaries are unknown. Above it lies Greenland, both West or New, and East or Old Greenland. The British possessions in North America lie above five vast lakes - Ontario, Erie, Hurou, Michigan, and Superior, which discharge themselves, through the River St. Lawrence, into the Atlantic Ocean. At the mouths of the River St. Lawrence are Nova Scotia and New Brunswick. The country lying above the River St. Lawrence is called Lower Canada, that above the Lakes is called Upper Canada. Above Lower Canada is Labrador, or New Britain; and above Upper Canada is New South Wales, on the Western side of Hudson's Bay. North-east of Hudson's Bay, are Davis's Straights and Baffin's Bay. A North-west passage to the East Indies has been hitherto in vain attempted through these Straights and Baffin's Bay, though the greatest skill, intrepidity, and perseverance have been exerted in the search; especially in the recent expeditions under Captain Parry, in 1818 and 1821.\* The savage tribes of Indians in this vast and thinly-peopled country are not worth

<sup>\*</sup> Another expedition sailed in 1824, and another in 1827, under the same able and distinguished officer.

enumerating. Below the River St. Lawrence and the five Lakes are the United States of America, formerly provinces of Great Britain, but severed from it, and recognised as independent by the peace of 1782. These states, (Pl. XIX.) now twenty-four in number, some of which, however, are too much in their infancy to claim much notice at present, may be divided into Northern, Middle, and Southern. Northern States, formerly called New England, consist of 1. Maine, 2. New Hampshire, having 3. Vermont to the West, 4. Massachusets Bay, 5. Rhode Island, and 6. Connecticut. Below these are the Middle States, 7. New York with Long Island, 8. Pennsylvania, East of which, on the Atlantic, is 9. New Jersey, and below this 10. Delaware, between the Delaware and Chesapeak Bays. The Southern States are 11. Maryland, 12. Virginia, 13. North Carolina, 14. South Carolina, and 15. Georgia. At the back of Pennsylvania and Maryland, is 16. Ohio, having the Lake Erie for its principal Northern, and the River Ohio for its principal Southern boundary. South of Ohio, is 17. Kentucky, having Virginia for its Eastern, and the Mississippi for its Western boundary. South of this is 18. Tenassee, having North Carolina for its Eastern, and the Mississippi for its Western boundary. South of this is 19. Mississippi, extending from the River Mississippi on the West to the River of Mobile, Eastward, in about 88° of West Longitude. East of this is 20. The new State of Alabama, lying between Mississippi and Georgia. Still West of the State of Ohio, is 21. Indiana, reaching to Lake Michigan on the North, and the River Ohio on the South. West of this, is 22. Illinois, reaching from Indiana to the River Mississippi. West of Illinois and the River Mississippi, is 23. Missouri, and West of the State of Mississippi, is 24. Louisiana, which, as well as the Two Floridas, lying below Georgia, has been ceded to America by Spain. There are also three or four territories likely ere long to increase the number of the States. The Michigan territory, lying between Lakes Michigan and Huron, the Arkansas, lying along the River of that name between Louisiana and Missouri, and the Two Floridas lying below Georgia. West of Louisiana (Pl. XVIII.) is New Mexico, and still Westward California, lying between the shores of the Pacific and the immense Gulf of California. Between and below these is Mexico, or New Spain, divided into various provinces; at the lower part of which is Honduras, a large peninsula on the Gulf of Mexico, where logwood is cut. The last province in North America is Veragua; near which is Panama, giving name to the Isthmus which separates North and South America. The North and North-western parts of North America are but little known.

Of the Cities in North America, the principal in the British dominions are (Pl. XVIII.) —

N. La. W.Lo.

Halifax 44° 45' 63° 55' In Nova Scotia.

Quebec 46 47 71 10 In Lower Canada, on the North of the River St. Lawrence.

Montreal 45 31 73 35 At the junction of the Rivers St.

Lawrence and Utawas, which is the boundary between Upper and Lower Canada.

#### In the United States (Pl. XIX.) —

N.La. W.Lo.

New York 40° 43′ 74° 1′ In New York.

Boston 42 25 70 59 In New England.

Philadelphia 39 57 75 10 In Pennsylvania.

Baltimore 39 21 77 48 In Maryland.

Charlestown 32 44 80 59 In South Carolina.

Washington 38 58 77 2 In the year 1800, this city was founded on the River Potowmack, which runs into Chesapeak Bay, as the intended capital of the United States.

#### In the Spanish dominions the chief City is (Pl. XVIII.)

N. La. W. Lo.

Mexico 19° 25′ 99° 40′ Of great extent, situated on a beautiful lake, and containing a population of 140,000 souls.

Vera Cruz 19 11 96 50 On the Atlantic.

Acapulco 16 50 99 46 On the Pacific; the chief mart of trade with the Phillippine Isles.

Campeche 19 50 91 34 In the province of Yutacan; whence the dyeing woods are brought.

The Rivers of North America are numerous, and some of them of prodigious magnitude. The St. Lawrence is

90 miles wide at its mouth, and navigable for ships of the line up to Quebec, 400 miles from the sea, where it is still five miles broad. It has a course of about 750 miles, and is the outlet of the immense lakes of Canada, already mentioned, which may be called an inland sea of fresh water, Lake Superior alone being 1500 miles in circumference. It is the largest body of fresh water on the Globe. Lake Huron is 1000 miles in circumference, and storms here are as dangerous as in the ocean. famous cataract of Niagara is on the river of that name, which empties itself from the Lake Erie into the Lake Ontario. This cataract is from 140 to 160 feet high, and more than three quarters of a mile in the whole breadth, discharging 670,250 tons of water in a minute; the sound of it is sometimes heard 40 miles, and the cloud of ascending mist seen at 70 miles distance. Lake Michigan is about 300 miles long, and 50 in mean breadth. Lake Erie, about 230 miles long, and 45 in mean breadth, and Lake Ontario about 180 miles long, and 40 in mean breadth. The Susquehanna and Potowmack, which flow into Chesapeak Bay, are important rivers. The former of which has a course of about 620, the latter of rather more than 400 miles; but the first of North American rivers is the Mississippi, which rises West of Lake Superior in Lat. 47° 47' North, and receives many great rivers, among which are the Illinois, which has a course of above 400 miles, and joins it in Lat. 38° 40' North, and the Ohio, which has a course of above 1000 miles, and joins it near Lat. 37° North; these rivers flow into it on its Eastern side. From the West comes the immense river Missouri, in fact greater than the Mississippi, which has a course of above 3000 miles before it joins it, in Lat. 38° 48', after which the united

streams have a course of 1000 miles to the sea. The Arkansas has a course of 1300 miles, and joins it about Lat. 34°, and the Red River has a course of about 1000 miles, and joins it in Lat. 31°. Several of these rivers have tributary streams, which in Europe would be considered as important rivers, flowing for 800 miles, or more. The Mississippi discharges itself into the Gulf of Mexico by New Orleans, and has a course of near 3000 miles. The Lake of Winnepig, Northwest of the five Canadian Lakes, is 200 miles long and 100 broad, as also is the Slave Lake, still more to the Northwest. From this latter Lake issues a river called Mackenzie's river, at the mouth of which the Arctic Sea was seen by Mr. Mackenzie in 1789, and about 20° East of it is the Copper Mine River, at whose mouth the same sea was seen by Mr. Hearne in 1771. Melville Island, the most Westernly land visited by Captain Parry, is about 7° North of this.

The Mountains of North America, with the exception of those in Mexico, are not of great height. The Apalachian chain extends from the South-west part of the United States towards the Gulf of St. Lawrence. Its different parts are called the Alleghany, the Blue and the White Mountains. The Alleghany mountains run from North Carolina into Pennsylvania, but in Virginia they form a double ridge, and have also before them a lower range called the Blue Mountains. In New England there is a long ridge called the White Mountains, the highest of which is Washington, in New Hampshire, estimated at between 6000 and 7000 feet. All these mountains run nearly parallel with the Atlantic, being from 250 to 120 miles, or less, distant from it. A ridge

of enormous length, called the Cordillera of Mexico, and afterwards the Rocky Mountains, extends on the side of the Pacific, with hardly any interruption, from the Isthmus of Darien to Lat. 65°, generally almost parallel to the Pacific, but at a considerable distance from it; these may be considered as a continuation of the Andes of South America. The greatest heights are generally in Mexico, which abounds also with volcanoes. Several peaks near the city of Mexico are 15,000 feet high. Popocatepetl, which emits smoke, is 17,720 feet high. Orizaba, a volcano, 17,370, and many others are not much lower. The city of Mexico itself is 7400 feet above the sea. Mount St. Elias, in Lat. 60°, is 12,672 feet high.

The Islands on the coast of North America (Pl. XVIII.) are, the large Island of Newfoundland, near the mouth of the River St. Lawrence, belonging to the English, where the great codfishery is carried on; to whom also belong the Islands of Cape Breton, off Novia Scotia, and St. John's, or Prince Edward's Island, to the West of it. Below these are the Bermudas or Somers Islands, four in humber, lying off the coast of North Carolina, about midway between Newfoundland and the West Indies. Off the coast of East Florida (Pl. XXI.) lie the Bahamas or Lucayos (the first land discovered by Columbus), and below are the important West Indian Islands of Cuba, belonging to Spain; Hispaniola, or St. Domingo, to the East, partly belonging to Spain,

and partly independent, and Jamaica below it, belonging to the English. Still East of Hispaniola, is Porto Rico, belonging to Spain. East of these (Pl. I.) are the Caribbee Islands, the principal of which are Antigua, Guadaloupe, belonging to the French, Martinico, St. Lucia, and Barbadocs, belonging to the English. Below them is the Island of Trinidad, ceded by Spain to the English; considerably to the West of which are the Islands of Margarita, belonging to Spain, and still Westward, Curacoa, belonging to the Dutch.

The population of North America may be estimated as follows:

	Sq. Miles.	Pop.
British possessions	7,050,000	1,050,000
United States	2,076,410	9,638,226
Mexico and its dependencies	957,441	8,540,000
Unexplored parts about	916,149	300,000
	5,000,000	19,448,226

The chief produce of the British possessions is timber, corn, and furs: of the United States, timber, corn, tobacco, cotton, and rice; of Mexico, dyeing woods, mahogany, and some medicinal drugs; coal and iron abound in the United States, and in Mexico are most extensive and rich mines of silver, and other metals; but the silver mines are principally attended to.

The extent and population of the West India Islands is as follows:—

•	Sq. Miles.	Pop.
Cuba	54,000	432,000
Hispaniola	30,000	500,000
Jamaica	6,400	360,000
Porto Rico	4,140	100,000
Remaining Islands	10,460	1,658,000
	105,000	2,050,000

The produce of the West India Islands is sugar, rum, tobacco, coffee, cotton, indigo, and rice; besides various kinds of beautiful woods, fruits, and spices.

The Religion of the Spanish and French possessions in North America, and the British possessions in Canada, (which formerly belonged to France,) is Roman Catholic. The United States have no established national church, but tolerate all sects of Christians. The Indians are unconverted Pagans, who yet have some notion of a Great Spirit and a future state.

#### CHAPTER VII.

AMERICA.

(CONTINUED.)

M.G. Pl. I. XX. XXI.

The whole top of South America is called the Spanish Main, which has lately taken the name of Columbia. — East of the Isthmus of Panama, or Darien, and the Government of New Granada, is the Government of Caraccas, which has now taken the name of Venezuela, and with Veranda and Quito is comprised in the republic of Columbia; Eastward of which is Guiana, divided among the Spaniards, Dutch, French, and Portuguese: the portions belonging to the three former powers lie along or reach to the coast; Portuguese Guiana lies along the North shore of the river Maranon. South-east of these is the immense province of Brazil, belonging

to Portugal; South-west of which is Paraguay, belonging to Spain. Below is Buenos Ayres, and below this are the Pampas, or immense plains between the Eastern Coast and the Andes, and at the back of these the province of La Plata. All these states, formerly belonging to Spain, are now called the United Provinces of South America. At the lower part of South America is Patagonia. On the Western side, and above Patagonia, is Chili. Above Chili is Peru; and above Peru, Granada, reaching up to the Isthmus of Darien.

There are many magnificent Cities (chiefly belonging to the Spanish settlements) in South America: among these are —

```
S. La. W. Lo.

St. Sebastian

The Rivers and Mountains of South America are on a scale of the most astonishing grandeur, far exceeding those in any other part of the world, except the Himalyan chain in Asia.

The great River Maranon, formerly called the River of the Amazons, from its source in lat. 17° among the Andes of Peru, where it is first called the Apurimac, runs from South to North, and afterwards in a direction from West to East, till it falls into the Sea, dividing the provinces of Guiana and Brazil. This Monarch of rivers is navigable, for a ship of 500 tons, for 3500 miles from its mouth, and even then is not less than two miles broad, increasing in depth and breadth till, itself a sea, it falls into the Atlantic. The effect of the tide in this river is perceptible for 600 miles; and at about 200 miles from its mouth it is so broad, that the opposite shore cannot be seen. It has a course of above 4000 miles, and receives many mighty streams as tributaries. The Rio de la Plata flows into the Atlantic, and is principally formed by the two streams of the Paraguay and Parana, besides some other very great though less mighty It rises in the mountains of Brazil, in lat. 19° N., and has a course of 1600 miles. It is so immensely proad near its mouth, that land cannot be discovered on either side from a ship in the middle of the river. The Orinoco is another mighty stream, which rises in the Lake of Ipava, 5° 5' N. Lat., and flows into the Atlantic opposite the Island of Trinidad; it has a course of about 1500 miles.

The principal Mountains of South America are the Andes, forming a stupendous chain of 4600 They stretch

from Capes Isidro and Pilares, in the Southern extremity of South America, nearly to the Isthmus of Panama; and are generally about 100 miles from the coast of the Pacific, and not less than from 100 to 180 miles in breadth; their highest summits are near the Equator: Chimboraco \* is 21,440 feet high, or 5000 feet higher than the highest of the Alps; Cotopaxi, a volcano, is 18,898 feet; Pichincha, El Altar, and many others, are not inferior. Antisana is just South of Quito, 19,150 feet in height; Cotopaxi about 40 miles South of Quito, and Chimboraço about 50 miles South-west of Cotopaxi. But it is remarkable that these mountains are themselves seated in immense plains, from 8000 to 10,000 feet above the level of the sea; so that their actual height from their own bases does not surpass the Alps. Many of these mountains are volcanic, and the province of Quito in particular, is subject to the most dreadful earthquakes, which frequently destroy or swallow up whole cities. The town of Riobamba, at the foot of Chimboraço, containing 9000 inhabitants, was completely overwhelmed by the Peak of Sicalpa, one of the neighbouring mountains, falling on it, February 4th, 1797, and not more than 400 persons escaped. The mountains, after subsiding considerably near the Isthmus, rise again to an immense height in Mexico, and on the Western side of North America.

The Islands of South-America, in the Pacific, are the Gallipagoes (Pl. I.), off the coast of New

Messrs. Humboldt and Bonpland ascended on this mountain to the height of 19,400 feet, being the highest spot on the globe known to have been reached by man.

Granada and Peru, under the Equator. Off the coast of Chili (Pl. XX.), in Lat. 34° S., is the Island of Juan Fernandez, where Alexander Selkirk supported himself in a life of solitude for four years; whose adventures gave rise to the celebrated tale of Robinson Crusoe. At the bottom of Chili is the large Island of Chiloe, 140 miles long, and 40 broad, in the Gulf of Chonas. And at the extremity of South America, is a collection of Islands, eleven in number, called Terra del Fuego, or Land of Fire, from the volcanoes Their extreme point is called Cape Horn. The Straits of Magellan separate South America from Terra del Fuego. North-east of these are the Falkland Isles, which are little better than a morass; below which (Pl. I.), to the Southeast, is Georgia, and, still lower, Sandwich Land, or Southern Thule. These countries are beyond description cold, dreary, and desolate.

The extent and population of South America have not been accurately ascertained; the following table is an approximation only.

	Sq. Miles.	Population.
Columbia, including Granada, Venezuela, and Quito	1,350,000	3,000,000
Guiana	90,000	250,00 <b>0</b>
Brazil	3,060,000	2,200,000
United Provinces	1,440,000	2,400,000
Peru	495,000	1,076,997
Chili	175,500	1,226,000
Patagonia	400,000	40,000?
	7,010,500	10,192,997

The produce of South America is cacao, indigo, tobacco, coffee, cattle, and hides, besides woods, jesuit's bark, balsams, and various medicinal drugs. Its mines of silver and gold, in the Andes of Peru and Chili, and of diamonds, topazes, and other precious stones in the Brazils, are inexhaustible.

The religion of South America is chiefly Roman Catholic; except those Indian tribes which are yet unconverted from Paganism.

#### POLYNESIA.

#### M. G. Plate L.

The Islands in the Pacific Ocean are comprehended, by the best modern geographers, under the name of Polynesia. It may be sufficient to enumerate the chief of these; which form the following sets (see the Map of the World—Eastern Hemisphere): I. East of the Philippine Isles lie the Pelew Isles; and above them, North-east, are, II. The Ladrone Isles, about twelve or fourteen in number. East of the Pelew, and South of the Ladrone Isles, are, III. The Carolinas, in number thirty. In the

Western Hemisphere are, IV. the Sandwich Islands, the largest of which is Owhyhee, where Captain Cook was killed in February, 1779. Below the Equinoctial, and South-east of the Sandwich Islands, are, V. The Marquesas; and below them are, VI. A group of Isles, in number about seventy, called the Society Islands, of which Otaheite is the principal. West of these are, VII. The Navigator's Isles; and below them are, VIII. The Friendly Isles. West of these, IX. The New Hebrides, Caledonia, New Zealand, &c. belonging to the division of Australasia. The remaining parts of the Globe are either unexplored, or omitted as of less importance in a summary survey like the present.

#### CHAPTER VIII.

Although as much of statistics has been incorporated into the text as seemed consistent with the nature of an elementary work, the author has thought that a few tables would be acceptable by way of reference, which he has accordingly subjoined. \*

#### Extent and Population of the Globe.

	Sruisn Sq. Miles.	Population.
Europe	2,760,067	202,325,716
Asia	14,000,000	600,500,000
Africa	10,000,000	100,000,000
N. America	5,000,000	19,448,226
S. America	7,010,500	10,192,997
	38,770,567	952,466,959

D. .: 4: . 7.

The whole superficies of the globe may be estimated at 197,519,564 British Square Miles.

Deduct the known parts

38,770,567

Remains, seas and unknown 158,748,797

In other words, the known and inhabited parts of the globe amount to little more than one-fifth part of its actual surface.

<sup>\*</sup> The population will be found higher than that given in Mr. Malte Brun's estimable work, where it seems rated too low.

OF THE EXTENT AND POPULATION OF THE DIFFERENT STATES OF EUROPE.

A TABLE

Name.	Extent in British Sq. Miles.	Popula- tion.	Inhabitants to each Sq. Mile, omitting Fractions.
England	50,53 <i>5</i>	11,261,417	225*
Wales	7,425	717,438	96
	57,960	11,978,855	
Scotland	30,477	2,093,456	68
Ireland	31,933	6,846,949	211
France	204,300	30,616,053	150
Holland	11,000	2,000,000	182
Netherlands	13,000	3,266,000	255
Saxony	7,226	1,300,000	178
Hanover	14,000	1,300,000	92
Bavaria	40,000	4,500,000	112
Wirtemberg	8,200	1,400,000	180
55 Smaller German States	52,800	4,380,000	154
Austrian Empire	276,441	30,166,836	109
Switzerland	19,000	1,750,000	92
Kingdom of Lombardy	18,660	4,111,535	220
Kingdom of Sardinia	27,400	3,994,000	146
Pope's Dominions	14,500	2,346,000	*162
Kingdom of Naples	43,500	6,618,000	152
•	853,397	118,667,684	

A country is considered as tolerably well peopled which has 100 inhabitants to each square mile. It will easily be seen, therefore, by inspecting this last column what countries are thinly, moderately, fully, or densely inhabited.

Name.	Extent in British Sq. Miles.	Popula- tion.	Inhabitants to each \$q. Mile, omitting Fractions.
Brot, forward	8 <i>5</i> <b>3,</b> 397	118,667,684	
Tuscany	9,270	1,170,000	126
Modena	2,480	435,000	175
Parma	2,300	380,000	125
Ілісса	430	124,000	288
San Marino	40	7,000	175
Spain	180,000	11,412,000	63
Portugal	41,150	3,683,000	89
Turkey in Europe	200,000	10,000,000	50
Kingdom of Prussia	115,000	11,000,000	91
Duchy of Warsaw	47,000	2,800,000	60
Russia in Europe	1,000,000	<i>55</i> ,000,000	55
Sweden	180,000	2,557,481	14
Norway	110,000	3,444,251	5!
Denmark	22,000	1,645,000	75
	2,760,067	202,325,786	

As the contemplation of unusually great numbers rather perplexes the mind than informs it, a calculation of the relative size of the several parts of the Globe, and its principal divisions, may not be unacceptable, reduced to a scale of a more comprehensive kind. If we take Great Britain, which contains \$8,437 square miles as 1, the portions of the Globe, and the principal States of Europe, when compared with it, will be as follows:—

Europe will be 31, that is, 31 times as large as Great Britain; Asia rather less than 159; Africa 113; North America rather more than 56; South America rather less than 80.

Of the principal States in Europe. Russia in Europe will be 11½; the Austrian Empire rather more than

3; France rather more than  $2\frac{1}{4}$ ; Turkey in Europe about  $2\frac{1}{4}$ ; Spain rather more than 2; Sweden rather more than 2; Prussia rather more than  $1\frac{1}{4}$ ; Norway rather less than  $1\frac{1}{4}$ .

The remaining States will be all less than Great Britain.

The Duchy of Warsaw, all that now remains of the kingdom of Poland, will be rather more than half Great Britain; Naples, Portugal, and Bavaria, each less than half; Ireland and Scotland, each more than one-third; Denmark one quarter; Switzerland and Lombardy each rather more than one-fifth. The Papal dominions and Hanover, about one-sixth; the Netherlands rather less than one-seventh; Holland about one-eighth; Tuscany rather more than one-tenth; Wales and Saxony each rather more than one-twelfth the size of Great Britain.

A few of the minor States of Italy and Germany are omitted, as being too inconsiderable for calculation in this table.

The student may amuse himself with a variety of calculations and comparisons from the data given in treating of the other divisions of the world in their respective chapters. The number of square miles which any country contains, divided by 88,437, which is the number of square miles in Great Britain, will give for its quotient the size of that country compared with Great Britain; and the number of inhabitants divided by the number of square miles in any country, will give the number of inhabitants to each square mile. And again, 640, the number of acres in a square mile, divided by the number of inhabitants in a square mile, will give the number of acres which each individual might occupy for his support, supposing the lands equally divided among

them. Thus, it will be found that in England there are only  $2\frac{1}{2}\frac{0}{2}\frac{1}{3}$ , or not quite 3 acres; in France  $4\frac{\bullet_4}{15}$  acres, to each individual.

Before closing this chapter it may be worth while to notice the comparative magnitudes of a few antient and modern states and empires which have a peculiar interest.

In antient history,

The Peloponnese were each about the size of the Palestine counties of York and Westmoreland.

Attica.
The Kingdom of
Rome at the expulsion of the

Tarquins

Rome at the ex- were each about the size of Warpulsion of the wickshire.

Greece in its utmost extent was rather less than England alone.

The Roman empire at its greatest extent was nearly 21 times as large as Great Britain.

The British Empire in Asia, with its dependencies, is about 12; in North America and the West Indies also about 12; in Africa about  $1\frac{1}{2}$ ; in Europe, including Ireland and the islands off the coast of France, about  $1\frac{1}{2}$ ; on the whole, about 27 times as large as Great Britain. Hanover, which belongs to the king of England, but forms no part of the British dominions, is not included in this calculation.

The Russian Empire in Europe has been stated at 11½; the Russian Empire in Asia is about 34½; in all about 46 times as large as Great Britain.

The Chinese Empire is near 15 times the size of Great Britain.

#### PART II.

# Geographia Classica;

or,

THE APPLICATION

OF

## ANTIENT GEOGRAPHY

то

THE CLASSICS.

### Antient World.

#### CHAPTER I.

A.G. (Antient Geography) Pl. I.

THE antient Greeks and Romans knew only the three divisions of the world — Europe, Asia, and Africa. In Europe they had little or rather no acquaintance with the countries North of Germany, now Prussia, Sweden, Denmark, and Norway, which they called Scandinavia, and thought to consist of a number of islands. East of Germany and North of the Black Sea, was Sarmatia, now Russia, equally unknown to them. In Asia they knew nothing North of the Caspian, but comprehended all the country under the general name of Scythia, divided into Scythia intra Imaum and Scythia extra Imaum; that is, on

either side Mount Imaus, part of a chain, the highest point in which is perhaps *Himmel* in *Thibet*. Still Eastward, they had a confused notion of Serica, or the North-western part of *China*, as an undefined continuation of Scythia. India they knew as far as the Ganges, and even mention a nation called Sinæ, now part of *Cochin China*. In Africa they knew little beyond Lat. 10° N., and little of that perfectly, beyond the immediate coast of the Mediterranean and banks of the Nile.

#### CHAPTER II.

#### ITALIA ANTIQUA.

A.G. Pl. I. VII. VIII.

ITALY (Pl. I.) was called Hesperia\* by the Greeks, as being West of Greece. It was called Italia from a prince of the name of Italus; Ausonia from the Ausones, a people found in Latium; Œnotria from an Arcadian prince called Œnotrus, the son of Lycaon, who settled in Lucania; Saturnia† from having been the fabled residence of Saturn, after his expulsion from

Est locus, Hesperiam Graii cognomine dicunt,
Terra antiqua, potens armis atque ubere glebæ;
Œnotrii coluere viri; nunc fama minores

Salve, magna parens frugum, Saturnia tellus,
Magna virum — Virg. Georg. II. 15.

heaven by Jupiter. It was bounded on the North by the Alps; on the West by the Mare Tyrrhenum sive inferum, or Lower Sea; on the East by the Mare Hadriaticum sive superum, or Upper Sea, now the Gulf of Venice; and on the South by the Mare Ionium, or Grecian Sea, so called, because this sea washes on one side Greece itself, and on the other side the South of Italy, which, under the name of Magna Græcia, antiently contained many flourishing Greek colonies. Italy may be divided into three parts, Northern, Central, and Southern. The first of these is called Gallia Cisalpina, or Gaul on this (i. e. the Roman) side the Alps; the second Italia propria, or Italy properly so called; and the third Magna Græcia. Its principal states were Gallia Cisalpina, Etruria, Umbria, Picenum, Latium, Campania, Samnium and Hirpini, Apulia, Calabria, Lucania, and Bruttiorum ager.

Gallia Cisalpina (Pl. VII.) extended from the Maritime Alps and the river Varus, or Var, to the shores of the Adriatic, and was also called Gallia togata, from their use of the Roman toga. It contained Liguria, on the coast, at the bend or knee of the boot, where is Genua, now the territory and Gulf of Genoa. North-west of them were the Taurini, or Piedmontese, whose capital, Augusta, still retains the name of Turin. North-east of Gallia Cisalpina are the Veneti and

Carni, at the top of the Sinus Hadriaticus. North-west of the Veneti are the Euganei.•

The principal Cities in Gallia Cisalpina are, Mediolanum, now Milan, among the Insubres, near the Raudii Campi, where Marius defeated the Cimbri, A.U.C. 653. A.C. 100; and Ticinum, near the mouth of the Ticinus, Eastward of Ticinum is Cremona, and still now Pavia. Eastward is Mantua\*, on the river Mincius, now Mincio, the birth-place of Virgil, both which still retain their Between them is Bedriacum, now Civiantient names. dala, where Otho was defeated by the generals of Vitellius, A.D. 69. North-west of Mantua is Brixia, now Brescia, and still North-west is Bergomium, now Ber-. gamo; West of which is Comum, at the South end of the Lacus Larius, now the Lake of Como, the birth-place of the younger Pliny, nephew to the naturalist. Northeast of Mantua, among the Veneti, is Verona, on the river Athesis, or Adige, the birth-place of Catullus and Pliny the naturalist; to the East of this, Patavium, or Padua, the birth-place of Livy, said to have been founded by Antenor; and South of it, Hadria, which gives name to the Adriatic. Among the Carni are, Forum Julii, now Friuli, and to the South, Aquileia, which still retains its name, though not its consequence. On the Sinus Tergestinus, East of Aquileia, is the river Timavus+, and then

Mantua, væ miseræ nimium vieina Cremonæ.

Virg. Ecl. IX. 28.

† Antenor potuit, mediis elapsus Achivis, Illyricos penetrare sinus, atque intima tutus. Regna Liburnorum et fontem superare Timavi.

Hic tamen ille urbem Patavi, sedesque locavit

Teucrorum — Virg. Æn. I. 242.

Tergeste, now Trieste, in Carniola. All these countries are in that division of Gallia Cisalpina called Gallia Transpadana, or Gaul North of the Po. In Gallia Cispadana, or Gaul South of the Po, is Placentia, now Piacenza, near the mouth of the Trebia, where Hannibal gained his second victory over the Romans, B.C. 218, A.U.C. 536. South-east of it is Parma, which still retains its name; then Mutina, now Modena, (where Decimus Brutus was besieged, after the death of Cæsar, by the forces of M. Antony, but was rescued by the last of the free Roman Consuls, Pansa and Hirtius, who were both killed the same day, the year in which Ovid was born\*, April 15. B.C. 43, A.U.C. 711,) and Bononia, now Bologna. On the coast is Ravenna, celebrated for a port and arsenal made there by Augustus as a rendezvous for his fleets in the Adriatic; afterwards, for its having been the residence of the Emperors of the West, in the fifth century, when Rome was possessed by the Barbarians; and, after that, for its being the seat of the Exarch, or Governor appointed by the Emperors of the East, when Italy was in possession of the Lombards. It was remarkably ill supplied with water till it became the sent of government, which it was considered till the middle of the 8th century.+

Editus ego sum,

Cum cecidit fato consul uterque pari.

Ov. Trist. IV. 10.

† Sit cisterna mihi, quam vinea, malo Ravennæ,

Cum possim multo vendere pluris aquam.

Callidus imposuit nuper mihi caupo Ravennæ:
Cum peterem mixtum, vendidit ille merum.

Martial III. 56 & 57.

The principal Mountains of Gallia Cisalpina are the Alps, which in various parts of their course received various denominations. Near the mouth of the Varus. or Var, at the Western extremity of Liguria, they were called the Alpes Maritimæ, or Maritime Alps. Advancing in a Northern direction, they were called the Alpes Cottiæ, now Mount Genevre. \* Still North, where they begin to turn to the East, Alpes Graiæ, now Little St. Bernard. Then Alpes Penninæ (from Pen, a summit); and Alpes Summe, now Great St. Bernard and Still Eastward were the Alpes Lepontiæ, St. Gothard. which separate Italy from the Helvetii, or Swiss; Alpes Rhæticæ, which separates it from Rhætia and Vindelicia, now the country of the Grisons; and the Alpes Juliæ, or. Carnicæ, which separate it from Noricum and Pannonia, now the Tyrol, Carinthia, and Stiria. The Apennines branch off from the Maritime Alps, and run nearly through the middle of the whole of Italy, from North to South.

The Rivers in Gallia Cisalpina are, the Padus, or Po, called also Eridanus; which rises among the Cottian Alps, and runs from West to East, through the middle of the country, till it falls into the Adriatic near Hadria; the Ticinus, or Tesino, which rises not far from the Rhone, among the Lepontine Alps in the country of the Brenni and Genauni, celebrated by Horace as sub-

<sup>\*</sup> This was once thought the most probable passage of Hannibal into Italy, but recent investigation gives it in favour of the Little St. Bernard.

<sup>†</sup> Proluit iusano contorquens vortice sylvas Fluviorum rex Eridanus.

dued by Drusus\*, and flows through the Lacus Verbanus, new Lago Maggiore, into the Po, near Ticinum, or Pavia (it was here that the Romans were first defeated by Hannibal, the same year with their defeat at Trebia); the Mincius †, or Mincio, which flows from the lake Benacus †, or Lago di Garda, celebrated by Virgil, and falls into the Po below Mantua; and the Trebia, already mentioned, which falls into the Po, in Gallia Cispadana, near Placentia. The Athesis §, or Adige, rises in the Rhætian Alps, and, flowing by Verona, falls into the Adriatic above the Po. Considerably below Ravenna, and just above the town of Ariminum, or Rimini, is the celebrated stream of the Rubico ||, now called Fiumesino, a mountain torrent, or rather one

of three which separates Italia Propria from Gallia Cisalpina; but which was crossed by Cæsar, when he advanced to make himself master of the Roman Empire; an act equivalent to a declaration of Civil War, as he then entered Italy with his army.

The first province in Italia Propria was Etruria, or Tuscia, reaching to the mouth of the Tiber. The Etrurians were called Tyrrheni by the Greeks, and are supposed to have been originally a colony of Mæonians, from Lydia\*, in Asia Minor, and were remarkably addicted to auguries† and soothsaying. East of Etruria were the Umbri, a very antient nation, whose coast along the Adriatic was subsequently occupied by the Galli Senones. Their name still remains in Sena Gallica, now Senigaglia. Below these was Picenum, celebrated for its apples.‡ Below Umbria were the Sabini, separated from Latium by the river Anio, now the Tevarone. On the South of the Tiber and Anio was Latium; and on the

\* Hence Horace, addressing Macconas, who was descended from the antient Kings of Tuscany:—

Non quia, Maccenas, Lydorum quidquid Etruscos Incoluit fines nemo, generosior est te. *Hor. Sat.* I. 6.

+ Hence Virg.

Inflavit cum pinguis ebur Tyrrhenus ad aras, Lancibus et pandis fumantia reddimus exta.

Georg. II. 195.

I Hence Hor.

Picenis cedunt pomis Tiburtia succo.

Sat. II.

South bank of the Tiber, just below their junction, is Rome. The river Liris separated Latium from Campania, at the back of which was Samnium and the Hirpini.

The principal Cities in Etruria were Pisæ, near the coast, now Pisa; above it Luca, now Lucca; and Northwest, on the coast, Luna, near Lerici.\* East of Pisæ is Florentia, now Florence, and Fæsulæ, now Fiesole; and South-east Arretium Vetus, now Arezzo: below which is Cortona, which keeps its name. South of this is the Lacus Trasimenus, now called the Lago di Perugia, from Perugia, antiently Perusia, near its South-eastern extremity. Near this lake was the memorable defeat of the Romans by Hannibal, B.C. 217, A.U.C. 537. South of Florentia is Sena, now Siena: West of which is Volaterræ, now Volterra; and South-east is Clusium on the river Clanis. Below Clusium (Pl. VIII.) is Volsinii, now Bolsena, where Sejanus was born. South-east is Falerii, or Falisci, a small village, now Falari. Among the Falisci was Mons Soracte, mentioned by Horace. + West of Falerii is Tarquinii, from whence the Tarquin family came to Rome; and below Falerii is Veii. of Veii is Cære, or Agylla, now Cer-Veteri. Northwest of Cære, on the coast, is the port of Centum Cellæ, now Civita Vecchia, the chief port of modern Rome.

In Umbria (Pl. VII.), on the shore of the Adriatic, near the Rubicon, is Ariminum, now Rimini; below is

Soracte ---

<sup>\*</sup> Est operæ pretium Lunæ cognoscere portum.

Ennius.

<sup>†</sup> Vides ut alta stet nive candidum

Pisaurum, or *Pesaro*, Sena Gallica, now *Senigaglia*, and Ancona, which retains its name. South-west of which, and just East of the Lacus Trasimenus, at the foot of the Apennines, is Nuceria, now *Nocera*. Considerably below it is Spoletium, now *Spoleto*, where they still show the gate from which Hannibal was repulsed. Somewhat East of Spoletium is Nursia, now *Norsia*, and East of this, Asculum, now *Ascole*.

The principal Rivers and Lakes in Etruria (Pl. VII.) are, the Arnus, or Arno, which rises in the Apennines, not very far from Florence, and flows into the sea near Pisa; the Tiber, which flows principally from North to South, rising in the Umbrian Apennines, and receives the Clanis, or Chiaca, near Vulsinii (Pl. VIII.); and the Nar\*, or Nera, which rises near Nursia, and receiving the Velinus, which rises near the Lake Fucinus, flows by Reate, now Reati, near Interamna or Terni, and falls into the Tiber near Narnia and Occiculum. The river Metaurus, or Metro, celebrated for the defeat of Asdrubal, the brother of Hannibal, by the Consuls, Liv. Salinator and Claudius Nero†, A.U.C. 547, B.C. 207, rises in the Uffibrian Apennines, (Pl. VII.) and falls into the sea South of Pisaurum.

Below the Tiber (Pl. VIII.) was Latium, in which is Ostia, so called from its being the port at the mouth of

Testis Metaurum flumen, et Asdrubal Devictus.

Hor. Od. IV. 4.

<sup>\*</sup> Audiit et Triviæ longe lacus, audiit amnis

the Tiber, about 20 miles from Rome. Below it is Antium\*, now Anzio; and below it Circeii, celebrated in the time of Horace and Juvenal for its oysters†, and fabled as the residence of the enchantress Circe, now called Monte Circello. Eastwards is Caieta, now Gaeta, celebrated by Virgil as the burial-place of the nurse of Æneas.‡

Southward are the small islands of Pontia, now Ponza, and Pandataria, whither Julia, the daughter of Augustus, was banished. Between Circæi and Caieta, on an eminence, is Anxur§, called also Tarracina, now Terracina. Here the celebrated Pomptinæ Paludes, or Pontine Marshes, end. In these marshes Marius || hid himself, and was dragged out from them with a rope round his neck, to the neighbouring prison of Mihturna. About twelve miles eastward of Rome we have Tusculum, where was Cicero's celebrated villa,

• Here was the famous Temple of Fortune, the subject of the Ode of Horace.

the scene of his Tusculan Disputations; it is now called Frascati, Præneste\*, the retreat of Horace, is to the East of this, now called Palestrina. South-east of Præneste is Anagnia, the capital of the antient Hernici; and still South-east is Arpinum, or Arpino, the birth-place of Marius and Cicero.

The principal Rivers of Latium were, the Anio, or Teverone, which rises at Treba near Anagnia, and passing by the delightful town of Tibur†, celebrated for its cascades, anciently bounded it on the North-east; and the Liris, which rose near the Lake Fucinus‡, not very far from the Anio, and, flowing in an opposite direction, falls into the sea near Minturnæ. The Liris is now called the Garigliano. The small river Fibrenus, which ran by Cicero's paternal villa, falls into it not far from Arpinum.

The city of Rome itself (Pl. XXI.) was built on seven hills §: Mons Palatinus, in the centre, then Capitolinus, Quirinalis, Viminalis, Esquilinus, Cœlius, Aventinus;

\* Trojani belli scriptorem, maxime Lolli, Dum tu declamas Romæ, Præneste relegi. Hor. Epist. II. 6.

the most extreme\*, North and South, were Quirinalis and Amentinus. On the Esquilize + was the splendid palace and gardens of Mæcenas. On the Palatine Hill was the celebrated Palatine library ‡ of Augustus. This was the first inhabited part of Rome; and is sometimes put by way of eminence for the whole. § Indeed, here was the residence of Romulus and the Roman Kings, of Augustus and the Roman Emperors; whence Palatium has ever since been applied to the residence of a monarch. On Mons Capitolinus was the Capitol, and Tarpeian Rock. Mons Aventinus was the buryingplace of Remus; hence it was looked upon as a place of Between the Collis Capitolinus, Quirinalis, ill omen.∥ and the Tiber, was the Campus Martius, the principal situation of modern Rome; and opposite Mons Palatinus, across the Tiber, on the Tuscan side, was the Janiculum. The Collis Hortulorum, now Monte Pincio. on which were the gardens of Sallust, is a sort of continuation of the Quirinal Hill in a North-west direction. At the foot of the Capitol was the Forum

Romanum, and on one side of it the famous Milliarium aureum, or Golden Milestone, from which all the Roman roads were measured. This curious monument was discovered in 1823. The nations in the immediate vicinity of Rome, during the earlier periods of the Roman history (Pl. VIII., XXI.), were, the Latini below Rome; the Æqui East, and Hernici South-east of Rome; the Volsci South-westward, and Aurunci below them, on the coast of Latium, towards Campania; the Marsi East of the Æqui; the Sabini North-east of Rome; and to the North-west of it, the Veientes.

Below Latium (Pl. VIII.), and separated from it by the Liris, was Campania, now Campagna, and part of the Kingdom of Naples. The chief city of Campania was Capua, on the river Vulturnus, celebrated for the luxury of its inhabitants; and below it, on the coast, is the no less celebrated city of Neapolis, a Greek colony, which is now Naples. Neapolis was antiently called Parthenope, from the name of one of the Sirens, said to have lived there: and was the favourite residence of Virgil\*, who is said to be buried near the promontory of Misenum. Baiæ and Puteoli were on the opposite sides of a bay a little West of Naples, and celebrated for the residence of the Roman nobility+, who built here magnificent palaces. The former of these is now called Baja, the latter Pozzuolo. Misenum, which received its name from the trumpeter of Æneas, whose death is

Illo Virgilium me tempore dulcis alebat Parthenope studiis florentem ignobilis oti.

Virg. Georg. IV. 563.

Marisque Baiis obstrepentis urges Summovere littora.

Hor. Od. II. 18.

recorded by Virgil\*, was the station of the Roman fleet in the Lower sea; and North of it was Cumet, the residence of the Cumæan Sybil, the conductress of Æneas to the shades below. Opposite the promontory of Misenum are the islands of Prochyta, now Procida, and Pithecusa, or Ænaria, now Ischia, and on the South side of the bay called Crater, is the island of Capreæ, or Capri, infamous for the cruelties and debaucheries of Tiberius. † East of Naples' is Nola, where bells are said to have been first invented, thence called Nolæ, or Campanæ, and at the Northern point of the Sinus Pæstanus is Salernum, now Salerno. North-west of Capua are Teanum and Suessa Auruncorum, now Tiano and Sezza &; the former of these places was a favourite residence of the Roman nobility. Above them, on the confines of Latium, was Venafrum, or Venafro, celebrated for its olives | and oil. The celebrated vinevards of Falernum were about Cales near Teanum; the

> · Illi Misenum in littore sicco, Ut venere, vident indigna morte peremptum;

Pocula colles. Hor. Od. I. 20.

Cæcubus Ager near Formiæ and Caieta; and the Mons Massicus near Sinuessa.

The principal Rivers of Campania are, the Liris, already described, and Vulturnus, or *Volturno*, which rises in the Apennines, in Samnium, and falls into the sea a little above Liternum, the burial-place of Scipio Africanus; East of which is Atella, where the Latin farces called Ludi Atellani originated.

The celebrated Lucrine \* Lake was opposite to Puteoli, near to Lake Avernus. It is now only a muddy pool, having a conical hill in its centre, which rose in one night from a subaqueous volcano.

Vesuvius is the principal Mountain in Campania; though it does not appear to have been a volcano in the days of Virgil, who merely celebrates the fertility of its soil. † The first eruption of Vesuvius which we have on record is that A.D. 79, when the cities of Pompeii, Herculaneum, and Stabiæ, were overwhelmed with ashes, and the elder Pliny lost his life by approaching too near the volcano.

At the back of Latium and Campania is Samnium and Hirpini; the two first cities of which, beyond Cam-

An memorem portus, Lucrinoque addita claustra, Atque indignatum magnis stridoribus æquor: Julia qua ponto longe sonat unda refuso Tyrrhenusque fretis immittitur æstus Avernis?

pania, are Caudium, South-east of Capua, celebrated for the ignominious defeat of the Romans, by the Samnite General Pontius, at the Furculæ Caudinæ, A.U.C. 433. B.C. 321., and North-east of this, Beneventum, or Benevento, originally called Maleventum, but which changed its name for one of more favourable omen. Pyrrhus was defeated by Curius, and retired to Epirus, B.C. 274, A.U.C. 480. The Furculæ Caudinæ are still called Forchie. Northwards, in Samnium, properly so called, is Allifæ, antiently celebrated for its manufacture of pottery \*, and considerably North-west, Æsernia, now Iscrnia. Above, bordering on the Sabines, were the Marsi, celebrated for their valour+, and East of them the Peligni; these two Samnite tribes were reputed to possess great skill in magic. 1

Marrubium, the principal City of the Marsi, was situated on the South-eastern side of the Lake Fucinus, now Lago di Celano. Among the Peligni was Corfinium, and, a little lower, Sulmo, now Sulmona, where Ovid was born. § On the Coast of the Adriatic were the

Samnite tribes of the Vestini, Marrucini, and Frentani. This part of Italy is now called *Abruzzo*. Among the Vestini is Amiternum. The principal River in Samnium is the Sagrus, or Sangro.

The remainder of Italy is called Magna Græcia, from the number of Grecian colonies which it contained. It is divided into the principal provinces of Apulia, Messapia, or Japygia, (called also Calabria,) Lucania, and the country of the Bruttii, or Bruttiorum Ager.

Apulia is now called *Puglia*; its coast was called Daunia, from Daunus, an antient King of Apulia, who was the father-in-law of Diomede. Diomede settled here after the Trojan war, and founded the city of Arpi\*, still so called. A little Eastward on the coast, was Sipontum, near the present city of *Manfredonia*. West of Arpi, and bordering on Samnium, is Luceria, or *Lucera*, celebrated for its wool. † Towards Lucania is Venusia, now *Venosa*, the birth-place of Horace ‡, and near it Bantia § and Acherontia, or *Acerenza*, and Feren-

tum, places only memorable for having been recorded by him., North of Venusia is Canusium, or Canosa, built by Diomede \*, and a little Eastward of Canusium is Cannæ, the fatal scene of defeat and slaughter to the Romans, in the dreadful battle against Hannibal, May 21st, A.U.C. 538. B.C. 216. The country between Apulia and Messapia was antiently called Peucetia, the principal city of which was Barium †, frequented by fishermen. — The principal River of Apulia was the ‡ Aufidus or Ofanto, a violent Apennine stream, which falls into the sea near Cannæ. In the spur of the boot was Mons Garganus §, celebrated for its oak groves, and now called Monte St. Angelo; and near Venusia was Mons Vultur ||, bordering on Lucania, frequented by the infant Horace.

# Below Apulia is Messapia, or Japygia, containing two

Hor. Od. III. 4.

nations, the Calabri on the North-east, and the Salentini on the South-western side of the heel of Italy. Calabri have given to this country the general name of Calabria. On the Adriatic is Brundusium, or Brindisi, the principal port for the passengers from Greece to Italy. Horace has described the road from Rome to this place in the fifth satire of his first book. Below it is Rudiæ. the birth-place of Ennius, the friend of Scipio Africanus and father of Latin poetry\*, whose bust was placed on the tomb of the Scipios; and still lower Hydruntum, now Otranto. The extreme promontory of the heel of Italy was called Japygium, or Salentinum Promontonium; above it is Matinum, celebrated for its bees. + At the top of the heel, at the West, is Tarentum, now Tarento, founded by the Lacedæmonians. - The most celebrated River of Calabria is the small stream of the Galesus t, or Galeso.

Below Campania and Apulia is Lucania, the first city of which, under Campania, is Pæstum, now *Pesti*, on

Ennius emeruit, Calabris in montibus ortus, Contiguus poni, Scipio magne, tibi.

Hor. Od. II. 6.

the coast, celebrated for its roses \*; this city was called by the Greeks Posidonia, in honour of Neptune. Below is Helea or Velia, mentioned by Horace.† On the coast of the Tarentine bay was Metapontum, the celebrated school of Pythagoras, who died there B.C. 497.; below it, Heraclea, of which Zeuxis was a native, and Archias, Cicero's friend, was made a citizen; and Sybaris, or Thurium, so celebrated for the effeminacy of its inhabitants, that a Sybarite became a term of reproach for luxurious and dissolute persons.

The principal rivers in Lucania are, the Silarus, or Silaro, which rises in the Apennines, and falls into the Mare Tyrrhenum, near Mount Alburnus and Pæstum, the banks of which were much infested by the gad-fly ‡; the Aciris, or Agri, the Bradanus, or Bradano, and the Sybaris, rise in the Apennines, and flow into the Gulf of Tarentum.

South of Lucania are the Bruttii. — Near the Mare Tyrrhenum, a little inland, is Consentia, now Consenza. — Quite in the toe of Italy, on the strait which divides it from Sicily, is Rhegium, now Regio; and on the opposite coast of Italy, on the Ionian Sea, are the Locri

Biferique rosaria Pæsti. Virg. Georg. IV. 119.

<sup>†</sup> Quid sit hyems Veliæ, quid cœlum, Vala, Salerni.

Hor. Epist. I. 15.

Est lucos Silari circum ilicibusque virentem Plurimus Albarnum volitans, cui nomen asilo Romanum est, æstron Graii vertere vocantes.

Epi-Zephyrii, so called from the promontory of Zephyrium, a little below it. Above Locri is Scylacium, now Squillaci, and above it, after the shore has bent to the East, is the promontory of Lacinium\*, now called Capo della Colonna, from a column of a celebrated temple of Juno Lacinia still remaining. A little North is Croto, or Crotona, the birth-place of the famous Olympic victor Milo, and a once flourishing city, and celebrated school of Pythagoreans. Above this is Petilia†, built by Philoctetes, after his return from the Trojan war; and above it Roscianum, now Rosano.

The principal Rivers of the Bruttii are, the Crathes, or *Crati*, which rises in the Apennines, not far from Consentia, and falls into the Tarentine bay, flowing by Sybaris; and the Neæthes, or *Neto*, which rises in the same vicinity, and falls into the sea near Petilia.

The principal Roman Roads (Pl. XXI.) were the Via Appia, from Rome to Brundusium; the Flaminia, from Rome to Ariminum; the Aurelia, by the coast of Etruria, to Liguria and Gallia, near Nice; and the Claudia, which branched off from the Flaminia, at the Pons Milvius, near Rome, and proceeding through the more inland part of Etruria, joined the Via Aurelia at Lucca.

Hic sinus Herculei, si vera est fama, Tarenti, Cernitur, attollit se Diva Lacinia contra, Caulonisque arces, et navifragum Scylacæum.

Virg. Æn. III. 551.

See also a beautiful story respecting the painting of Helen, by Zeuxis in this temple, related by Cicero, De Invent. II. 1.

+ Parva Philoctetæ subnixa Petilia muro. Virg. Æn. III. 402.

The roads of inferior note were, the Via Latina, which had the Alban lake on the right, Tusculum on the left, and led to Mons Albanus, on the summit of which was the temple of Jupiter Latiaris, where the Latin tribes used to assemble on the Feriæ Latinæ, when sacrifices were offered by the Roman consuls. The triumphant Generals used also sometimes to lead their armies in solemn procession to this temple. Mons Algidus, sacred to Diana\*, runs Eastward from this hill. The Labicana. to Præneste, passing through Labicum and having the Lake Regillus on the left. The Prænestina, to the same city, which passed through Gabii, having Collatia to the left. The Tiburtina or Valeria, which led through Tibur to the Adriatic. The Nomentana which passed over Mons Sacer to Nomentum and Cures, among the Sabini. The Salaria, which passed through Fidence, crossed the river Allia, and joined the Nomentana at Eretum, between Nomentum and Cures, and passed on to the Adriatic, having at some distance to the left Capena, and the grove of Feronia. The Cassia, which passed between the Flaminia and Claudia, over the little river Cremera, near Veii, and is now the principal road over the Campagna di Roma, to Rome. The Triumphalis, which joined the Claudia six miles from Rome. The Portuensis and Ostiensis, which led to the Portus Augusti on the North, and Ostia on the South side of the mouth of the Tiber. The Laurentina and Ardeatina led to Laurentum and Ardea, between the Via Ostiensis

> Quæque Aventinum tenet Algidumque Quindecim Diana preces virorum Curet.

and Appia. Considerably to the left of the Via Ardeatina, near the Via Appia, was Lanuvium, and about half way between this and Rome was Bovillæ, where Clodius was killed by the partisans of Milo, Jan. 20, A.U.C. 702., B.C. 52.

The antients used to bury by the sides of their high roads.

Hence Juvenal,

Experiar quid concedatur in illos

Quorum Flaminia tegitur cinis atque Latina.

Sat. I. ult.

# CHAPTER III.

## ITALIAN ISLANDS.

### A. G. Plates VIII. XXI.

SICILIA was antiently called Sicania, from the Sicani, a people of Spain, who possessed the island till they were driven to its Western corner by the Siculi, an Italian nation, the original inhabitants of Latium. was also called Trinacria, from having TPEIS axpai, three celebrated promontories (the island itself being of a triangular shape); Pelorum at the East, adjacent to Italy, Pachynum at the South, and Lilybœum at the West. It was colonized by the Greeks and Carthaginians, and came into the possession of the Romans in the second The promontory of Pelorum is now Cape Punic war. Faro. A little South of this was Messana, more antiently called also Zancle, from the curved form of its harbour, now Messina, Close to this, on the Sicilian shore, was Charybdis, and above it, on the Italian shore, Scylla, the two well-known objects of terror to the antient mariners, though now much less formidable. Below it is Tauromenium, now Taormino, and below it Catana, which still retains its name, at the foot of Mount Ætna, now called Monte Gibello. The most remarkable poetic descriptions of the eruptions of Ætna are in Pindar, Pyth. I. 31. Æschylus, Pr. Vinct. 362. and Virgil, Æn. III. 571. † Above Catana was the little river Acis, for an account of which see Ovid, Met. XIII. 860., and near it the Cyclopum Scopuli, mentioned by Virgil, Æn. I. 201. The plains below the river Simæthus, now the Giarctta, were antiently called the Læstrigonii

Dextrum Scylla latus, lævum implacata Charybdis Obsidet, atque imo barathri ter gurgite vastos Sorbet in abruptum fluctus, rursusque sub auras Erigit alternos, et sidera verberat unda. At Scyllam cæcis cohibet spelunca latebris, Ora exsertantem et naves in saxa trahentem. Prima hominis facies, et pulchro pectore virgo Pube tenus: postrema immani corpore pristis Delphinum caudas utero commissa luporum.

Virg. Æn. III. 420.

——— Horrificis juxta tonat Ætna ruinis.
Interdumque atram prorumpit ad æthera nubem, Turbine fumantem piceo et candente favilla: Attollitque globos flammarum, et sidera lambit: Interdum scopulos avulsaque viscera montis Erigit cructans, liquefactaque saxa sub auras Cum gemitu glomerat, fundoque exæstuat imo. Fama est Bnceladi semiustum fulmine corpus Urgeri mole hac, ingentemque insuper Ætnam Impositam, ruptis flammam exspirare caminis: Et, fessum quoties mutat latus, intremere omnem Murmure Trinacriam, et cœlum subtexere fumo.

Virg. Æn. III. 571

Campi, from the Læstrigones, a barbarous antient people, who, as well as the Cyclopes, inhabited Sicily. wine of this region is celebrated by Horace.\* On the coast were the Leontini, now Lentini, Below this were Hybla minor and the Hyblæi Colles, celebrated for their bees. ta Below was the river Anapus, and the far-famed city of Syracuse, still called Siracusa. (Pl. XXI.) was taken by Marcellus, the Roman Prætor, in the second Punic war, B.C. 212, A.U.C. 542.; and was also the scene of the memorable defeat of the Athenians, so finely related by Thucydides, in his seventh book of the Peloponnesian war. The ports of Syracuse lay at the South, below the town. The lesser port was formed by the town and the North side of the little island Ortygia, in which was the fountain Arethusa; the greater port, in which was the mouth of the river Anapus, was formed by the Southern side of the island and a bay reaching to the promontory called Plemmyrium, in the recess of which promontory was a castle. That part of the town called Acradina was nearest the shore, and its Southern extremity formed one side of the little port. The South-western side of the city lying towards the Anapus, and separated from it by some marshy ground, was called Neapolis, built after the Athenian invasion, between which and Acradina was Tyche, and above Neapolis was Epipolæ. Between the Anapus and Neapolis was a grove and temple of Apollo, who was thence called Temenites. The whole circuit of Syracuse was 180 stadia, above 22 English miles.

> Quamquam nec Calabræ mella ferunt apes, Nec Læstrigonia Bacchus in amphora Languescit mihi

+ Hyblæis apibus florem depasta salicti.

Hor. Od. III. 16. Virg. Ecl. I. 155.

This description may be of service in reading Thucydides. Below Syracuse (Pl. VIII.) is Helorum, the vestiges of which are called Muri Ucci; the adjacent country was so beautiful, as to be called the Helorian Tempe. The extreme Southern point of Sicily is the promontory of Pachynum, now Passaro. Ascending along the Southern shore of Sicily is Camarina, antiently called Hyperia, so often celebrated by Pindar; it is still called Camarana: above it is Gela, near the modern Terra Nova, and the Campi Geloi. The river Himera separated the Syracusan from the Carthaginian dependencies in Sicily. West of the Himera is the city of Agrigentum, or Agragas, as it is called by the Greeks, so often celebrated by Pindar, now called Girgenti. Still West was Selinus, a splendid Syracusan colony. From Selinus the shore bends upwards to the Western promontory of Lilybœum, which is nearly opposite Carthage, and still preserves its old name in Boéo; but the city of Lilyboum is now called Marsala. North of Lilybœum is Drepanum, now Trapani, and Mount Eryx, celebrated for its temple of Venus, hence called Erycina.\* On the North side of Mount Eryx was the Trojan colony of Segeste, or Egeste. South-west of Mount Eryx are the Ægades or Ægates Insulæ, celebrated for the famous victory gained by the Romans under Lutatius Catulus over the Carthaginians, which ended the first Punic war, B.C. 242, A.U.C. 512. Proceeding along the Northern coast, we find Panermus, now the capital of Sicily, under the name of Palermo. East of it was the city Himera, on another and smaller river of that name, and a little East of it Thermæ, so called from the warm

baths in its vicinity, now *Termini*. Towards the Eastern promontory of Pelorum was the city of Tyndaris, which preserves its name, and Mylæ, now *Milazzo*, between which place and a station called Naulochus, the fleet of Sextus Pompeius was defeated by that of the Triumvir Octavius, B.C. 36, A.U.C. 718. In the interior of the country, and nearly in its centre, was the celebrated plain of Enna, from which Proserpine was carried away by Pluto to the shades below. (See Ovid, Met. V. 341.) It is now called *Castro Janni*, or *Giovanni*.

Each of the promontories of Sicily had a celebrated temple. At Pelorum was that of Neptune; at Pachynum that of Apollo; and near Lilybœum that of Venus, on Mount Eryx. The antients fabled that the giant Typhœus was buried under Sicily, Pelorum and Pachynum being placed on each arm, Lilybœum on his feet, and Ætna on his head, and that the earthquakes and eruptions of Ætna were caused by his attempts to move.

# North of Sicily are some volcanic islands, called the

Insulæ Æoliæ, Vulcaniæ, et Liparææ, from Æolus and Vulcan, who were supposed to have their dwellings here, and Lipara, the principal island. Here were the forges of Vulcan, described by the poets, particularly by Homer and Virgil. Below Sicily were the islands of Melite, now Malta, and Gaulos, or Goza, adjacent to it.

North-west of Sicily are the two islands of Corsica and Sardinia. The former lies under Liguria, and was peopled by the Ligurians, and colonized by the Carthaginians, from whom it was taken by the Romans, B.C. 231, A.U.C. 523. It was celebrated for its yew trees, which gave a poisonous quality to the honey. ‡ The Greeks called it Cyrnos. It had two colonies, Mariana planted by Marius, and Aleria by Sylla. On the Northwestern coast was the Casalus Sinus, thought to be Calvi, and on the opposite side, above Mariana, Mantinorum Oppidum, now Bastia. About the middle of the Western side was Urcinium, now Ajaccio, said to have

\* Nimborum in patriam, loca fœta furentibus Austris, Æoliam venit, hic vasto rex Æolus antro Luctantes ventos tempestatesque sonoras Imperio premit, et vinclis et carcere frænat.

Fel. 1X, 20.

been founded by Eurysaces, the son of Ajax. Below Corsica, is Sardinia, called by the Greeks Ichnusa, from its fancied resemblance to the print of a foot. It derived its name from Sardus, the son of Hercules, chief of an African colony planted there. It was taken by the Romans with Corsica. The air of Sardinia was considered very unwholesome, and the quantity of wormwood and bitter herbs it produced, particularly a species of ranunculus, was proverbial. As the features were contracted by the taste of these, the expression Sardous risus, a Sardonic smile, was used to signify a malevolent grin. The principal towns were Caralis, now Cagliari, in the South, and Olbia, in the North, nearly opposite to which was Tibulæ.

Late events have given celebrity to the little island of Ilva, now Elba, lying between the extreme Northern point of Corsica and Etruria. Its iron mines were celebrated by the antients. ‡

• The adjacent countries have been generally assimilated to some well-known form. Italy to a boot; Sicily, by the antients, to a triangle, hence called Triquetra; by the moderns, to the less philosophic form of a shoulder of mutton; Corsica to a heart.

### CHAPTER IV.

# BRITANNIA ANTIQUA.

### A. G. Plate II.

As Britain appears to have been peopled by successive migrations from the neighbouring coast of Gaul, it will be our most natural way of proceeding to begin with describing the parts nearest that country.

Opposite the coast of Gaul, and divided from it by a narrow strait, were, I. The Cantii, or people of Kent, and part of Middlesex, whose principal harbour was Rutupiæ, or Richborough, where the Romans generally landed. Even in the days of Juvenal the oysters of Richborough were imported into Italy. \* Durovernum, or Darvernum, was Canterbury; Durobrivæ, Rochester.

<sup>———</sup> Circæis nata forent, an Lucrinum ad saxum, Rutupinove edita fundo Ostrea, callebat primo dignoscere morsu. Juv. Sat. IV. 145

A little below Dover was Portus Lemanis, or Lymne, where Cæsar is thought to have landed on his first expedition to Britain, B.C. 55, A.U.C. 699: having set out from the Portus Itius, in Gaul, a little South of Calais. II. South-west of the Cantii were the Regni, or antient inhabitants of Surrey, Sussex, and part of Hampshire, whose principal city, Neomagus, or Noviomagus, is placed at Woodcote, near Croydon, in Surrey; Regnum was Chichester. III. Nearly West of the Regni were the Belgæ, or inhabitants of Wiltshire, Somersetshire, and part of Hampshire. The principal station here was Venta Belgarum, or Winchester. Aquæ Calidæ, or Solis, was Bath; Ischalis, Ilchester; Clausentum, Southampton; the Isle of Wight was called Vectis. South-west of them were, IV. The Durotriges, or the inhabitants of Dorsetshire. The chief towns were Dunium. or Aggerdon Hill, and Dornovaria, now Dorchester. V. West of the Durotriges were the Damnonii, or Dumnonii, who possessed Devonshire and Cornwall. The chief towns were Isca Damnoniorum, or Chiselborough, and Uxela, or Exeter. Tamari Ostia was the mouth of the Tamar, now Phynouth Sound. Ocrinum was the Lizard Point; and Bolerium the Land's End, or Cape Cornwall. VI. North, above the Cantii, were the Trinobantes, or people of Essex and Middlesex. The principal settlements were, Camulodunum, or Maldon; Colonia, probably Colchester; Cæsaromagus, Chelmsford; and Londinium, or London. VII. South-west of the Trinobantes were the Atrebatii, in Berkshire and part of Oxfordshire. Their principal town was Calleva, probably Silchester. VIII. North of the Atrebatii were the Catti, Catieuchlani or Cattevelauni, in the present counties of Hertford, Bedford, Northampton, and Bucks. Their capital was Verulamium, near St. Alban's. IX. West of the Cattevelauni and Atrebatii were the Dobuni, who inhabited Oxfordshire and Gloucestershire. The two principal stations were Corinium, or Cirencester, and Glevum, or Gloucester. Wales was divided among two principal nations. X. In South Wales the Silures inhabited the counties of Hereford, Monmouth, Radnor, Brecon, and Glamorgan; whose capital was Isca Silurum, now Caerleon, on the river Isca, or Uske, in Monmouthshire. The other principal stations were Bullæum or Burrium Uske, unless the former name belong to Builth; Blestium, or Monmouth; Gobannium, or Abergavenny; Ariconium, or Ross; and Venta Silurum, or Cher Gwent, near Chepstow. The Demetæ were a tribe of Silures on the coast in Cardiganshire, Pembrokeshire, and Carmarthenshire. The great Caractacus, who was defeated by Ostorius Scapula, A.D. 51, was a prince of the Silures. XI. In North Wales were the Ordovices, who occupied the counties of Montgomery, Carnarvon, Denbigh, and Flint: Their capital was Mediolanum, or Mufod, in Montgomeryshire. Among them were also Segontium, or Carnarvon, on the river Seiont, and Conovium, or Conwy, on the river Conwy. The island of Anglesea was called Mona. XII. Returning to the Eastern coast: North of the Trinobantes were the Simeni, Cenimagni, or Iceni, in Norfolk, Suffolk, Cambridgeshire, and · Huntingdonshire; whose capital was Venta Icenorum, or Caister, not far from Norwich. The famous Boadicea was queen of the Iceni, who revolted against the Romans, and was defeated by Suctonius Paulinus, A.D. 61. XIII. North-west of the Iceni were the Coritani, who possessed the counties of Leicester, Rutland, 'Lincoln, Nottingham, Derby,

and part of Stafford. Among the principal stations were Lindum, or Lincoln, and Ratæ, or Leicester. XIV. West of the Coritani were the Cornavii, who were settled in Warwickshire, Worcestershire, Staffordshire, Shropshire, and Cheshire. The principal stations here were Deva. or Chester: Uriconium\*, or Wroxeter. near Shrewsbury, the antient capital of the Cornavii, Etocetum, or Wall, near Lichfield, and Manduessedum, or Manceter, in Warwickshire, though the two last belong more properly to the Coritani. The Huicii, or Jugantes, as they were called by Tacitus, were a tribe of the Cornavii settled in Warwickshire, and Worcestershire, XV. North of the Coritani were the Parisi, but a small nation, situated in that part of Yorkshire called Holderness, and subject to, XVI. The Brigantes, the greatest, most powerful, and most antient of the British nations. They possessed the whole extent of Britain from sea to sea, comprising the counties of York, Durham, Lancaster, Westmoreland, and Cumberland. The famous Cartismandua, with whom Caractacus took refuge, was queen of the Brigantes. principal towns were, Eboracum, or York, one of the greatest in the island, and Isurium, or Aldborough, near Boroughbridge, which was at one time the capital of the Brigantes. Longovicum was Lancaster; Mancunium, Manchester. These are the principal British nations. The antient inhabitants of Scotland were very little known to the Romans; and it may suffice to mention the Otadeni, who were seated in the counties of Northumberland, Merse, and the Lothians; the Gadeni, West of the Otadeni, in Northumberland and Teviotdale; the Selgovæ, in Eskdale, Annandale, and Nithisdale, on the shores of the Solway Firth: still West, the Novantæ, in Galloway, Carrick, Kyle, and Cunningham; and on the North-west, above the Otadeni and Gadeni, the Dannii, in Clydesdale, Renfrew, Lenox, and Stirlingshire. These five nations were sometimes comprehended under the general name of the Mæatæ.

When Britain was formed into a regular Roman province, under the later emperors, the nations above enumerated were comprised in the five following grand divisions: - I. Britannia Prima, comprising the South-east and probably all the South-west of Britain. II. Britannia Secunda, containing Wales. III. Flavia Cæsariensis, containing probably the parts between the Thames and Humber on the East, and from the Lower Avon to the Ribble on the West; though some place it in the West of England. IV. Maxima Cæsariensis, containing the North of England, from the Humber and Ribble, to the Wall of Severus. And subsequently, in the time of the Emperor Valens, A.D. 364, V. Valentia, comprehending the five Scottish tribes, already mentioned under the name of Mæatæ, lying between the walls of Antoninus and Severus, about to be described, which were built to prevent the incursions of the barbarous Scottish tribes into the Roman provinces. The first of these was built by Agricola, A.D. 79, nearly in the situation of the Rampart of Hadrian and Wall of Severus, hereafter to be described. -But in A.D. 81, Agricola built a line of very strong forts, advanced considerably North, from the Firth of Forth, on the East, to the Firth of Clyde, on the Western coast of Scotland. These, however, appear to have been insufficient to restrain the progress of the barbarians after the departure

of Agricola, A.D. 85; and in A.D. 120, the Emperor Hadrian planned and executed a much stronger and more important rampart. It began from Tunnocelum, or Boulness, on the Æstuarium Itunæ, or Solway Firth, near Luguvallium, or Carlisle, on the Western coast. and was continued almost in a direct line, to Segedenum, or Cousin's House, beyond Pons Ælii, or Newcastleupon-Tyne, on the Eastern shore, being a distance of rather more than 68 English, or 74 Roman miles. consisted of a principal agger or vallum, that is, a rampart, about 10 or 12 feet high, a ditch, on the North of this vallum, 9 feet deep and 11 feet wide, an agger 20 feet on the North side of this ditch, and an agger, without a ditch, 5 feet on the South of the principal agger, and nearly of as large dimensions. This work was garrisoned by soldiers stationed at proper intervals, in forts which had formed the first Wall of Agricola. Twenty years after this, A.D. 140, Lollius Urbicus, under the Emperor Antoninus, having reconquered the Mæatæ, restored the second Wall of Agricola, which is commonly called the Vallum Antonini. This work consisted of a ditch about 12 feet wide, the principal wall or rampart, on the South brink of the ditch, whose foundations are 12 feet thick, but the height is unknown, and a military way on the South of this wall. There were forts, or stations, at the distance of every two miles, and smaller towers in the intervals between the forts.

But the greatest work of all was that of Severus, yet to be described. It was begun A.D. 209, and finished the next year, and was only a few yards to the North of Hadrian's Wall. This great work consisted of a ditch, the dimensions of which are not known, except that it was in all respects larger and wider than that of Hadrian,

on the South brink of which stood the wall, built of solid stone, and cemented with the strongest mortar. The height of this wall was 12 feet, besides the parapet, and its breadth 8 feet, defended at intervals by fortresses of three different kinds. Those called stationes were very strong garrisons, the least of them capable of containing 600 men, and having a town without their walls; the number of these was not less than 18, at an average distance of four miles from each other, but placed with some irregularity, according to the nature of the surrounding country and the exigency of defence. Besides these, there were in the intervals of the stations, 81 castella, at the distance of about 7 furlongs from each other. were very strong forts, each exactly 64 feet square. Lastly, between every 2 castella were 4 turres, or turrets, 12 feet square, 324 in number, and 300 yards distant from each other. These were used as watch-towers, and, being within reach of each other, communications could be made with the utmost facility. For convenience of relieving guards, there was a military way, made of square stones, the whole length of the wall, on its South side, and communicating with each turret and castle; and at some distance, South of this, was another larger military way, paved also with square stones, communicating from station to station. The whole body of forces employed to garrison this stupendous work was not less than 10,000 men, 1600 of whom were cavalry and 600 mariners, at the points where the ramparts communicated with the shore.

The four principal Roman roads, Viæ stratæ, or paved roads, hence called Streets, were, the Watling Street, from Dover to Chester, passing through Londinium,

or London, Verulamium, St. Albans, Magiovintum, Dunstable, Lactodorum, Stoney Stratford or Towcester, Manduessedum, Manceter, Etocetum, Wall, Pennocrucium, Stretton near Penkridge, to Deva or Deona, Chester. A branch of this communicated from Pennocrucium with Uriconium. Its etymology is uncertain, but it is perhaps corrupted from the name of Vitellianus into Vitellin or Watling Street. The Foss Way, derived from fossa, a ditch, extended from Totness in Devonshire, through Cirencester and Lincoln to North Britain. The Ikenild Street, probably so called from the Iceni, through whose country it ran, extended from Southampton, through York, to Newcastle-upon-Tyne. The Ermin Street, most probably derived from the Saxon Herrman, a warrior, signifying that it was a military road, extended from Menapia, St. David's, to Southampton. From these principal roads there were many minor branches.

Of the British Islands, Vectis was the Isle of Wight; the Cassiterides were the Scilly Islands, which are said to have been frequented by the Phœnicians; Mona Taciti, or the Mona described by Tacitus, in his Life of Agricola, is the Isle of Anglesca; and Mona Cæsaris the Isle of Man. Ierne, or Hibernia, was Ireland. The Hebudes mentioned by Pliny, Ptolemy, and Solinus, are now, by a slight corruption of the name, called the Hebrides.

The united Military Way and Hadrian's North Agger. Severus's lesser Military Way.

Hadrian's principa. Agger.

Hadrian's Second Agger.

ž

## CHAPTER V.

## HISPANIA.

#### A. G. Plate III.

Spain was divided by the Romans at first into two provinces, called Hispania Citerior, or nearer, and Hispania Ulterior, or farther Spain. Hispania Citerior was afterwards called Tarraconensis, from Tarraco its capital, and extended from the foot of the Pyrenees to the mouth of the Durius, or Douro, on the Atlantic shore, comprehending all the North of Spain, together with all the South as far as a line drawn below Carthago Nova, or Carthagena, and continued, in an oblique direction, to the Durius, above Salmantica, now Salamanca. pania Ulterior was divided into two provinces, Bætica, or the South of Spain, between the river Anas, or Guadiana, and Hispania Citerior; and above it, Lusitania, corresponding in great measure, but not entirely, to our Portugal. Hispania Citerior, or Tarraconensis, contained many anations. The Ceretani, Cosetani, Lace-

tani, and Ilergetes, occupied what is now Catalonia. Here was Barcino, or Barcelona, Tarraco, or Tarragona, the capital of the province, and Ilerda, the capital of the Ilergetes, now Lerida, celebrated for the resistance it made against Cæsar, under the Lieutenants of Pompey, Afranius, and Petreins. North-westward, at the foot of the Pyrenees, were the Jacetani. The Vascones were seated in the kingdom of Navarre; whose chief city was Pompelo, or Pampeluna. The Cantabri \* possessed Biscay, and part of Asturias, and held out against the Roman power for many years. Among them were the Concani, whose ferocity is also celebrated by Horace. + Next to the Cantabri were the Astures, or inhabitants of Asturias, whose capital Asturica is still called Astorga. The station of the seventh legion gave name to the colony of Legio, or Leon. Still Westward. the Callæci or Calliaci inhabited the country now called Gallicia. Here was the promontory of Artabrum, or Cape Finisterre, North-east of which was Brigantium, Betanços, near Corunna. At the mouth of the Durius is the port of Calle, which having been corrupted into Portugal, has given a modern name to the antient province of Lusitania. South-east of the Astures are the Vaccæi, and South-east of them the Arevaci, in Leon and Castile. Among the Vaccai, was Palentia; and East of it was Numantia, among the Pelendones, which resisted the Roman armies fourteen years, and was utterly destroyed by Scipio Africanus Minor, B.C. 133, A.U.C. 621. It was situated near the sources of the

Hor. Od. III. 4.

Douro. Below the river Iberus, or Elro, were the Celtiberi, a great and powerful people, in part of Arragon and Valencia, who long resisted the Romans. Among them we may notice the city of Bilbilis, Southeast of Numantia, the birth-place of the poet Martial. East of the Celtiberians, below the Iberus, were the Edetani, in the other part of Arragon and Valencia, whose Northern boundary was the Iberus, and Southern the Sucro, or Xucar. Their capital, Cæsar Augusta, has been corrupted into Saragossa. North-west of which is Calagurris, now Calahorra, memorable for the dreadful sufferings of the army of Sertorius, when besieged there by Pompey and Metellus, A.U.C. 679, B.C. 75: (See Juv. Sat. XV. 92.) A little above the Southern boundary of the Edetani, was Valentia, and above it the famous city of Saguntum, by the siege of which Hannibal began his first attack on the Romans, which was the commencement of the second Punic war, B.C. 219, A.U.C. 535. Hannibal took it after a siege of four months, and the inhabitants burnt themselves and their effects that they might not fall into his hands. It was afterwards rebuilt, and some remains of it are still to be seen, under the name of Murviedro, a corruption of Muri Veteres. North-west of Saguntum was Segobriga, now Segorbe. East of the Edetani, near the mouths of the Iberus, were the Ilercaones. At the back of the Celtiberi, below the Arevaci, were the Carpetani, in New Castile, occupying the centre of Spain. Their principal city was Toletum, now Toledo, and North-east of this, Complutum, now Alcala. West of Toletum was Libora, now Talavera, on the Tagus. Below the Carpetani were the Oretani, about La Mancha; East of whom on he coast, were the Contestani, in the kingdom of Murcia. Their capital was the celebrated city of Carthago Nova, or Carthagena. The shore of this country was called the Spartarius Campus, from the quantity of rushes growing there.

In Hispania Exterior, the province of Bætica was so called from the river Bætis, or Guadalquiver. It is now known by the name of Andalusia, a corruption of Vandalitia, from the Vandals, who in the decline of the Roman empire were settled there. Along the Southern shore were the Phonician Bastuli, occupying part of the Kingdom of Granada. \* North-west of these were the Turdetani, in part of Seville, towards the mouth of the river Bætis. North of them was Bæturia, below the river Anas, or Guadiana, in part of Estremadura and the kingdom of Seville Below them were the Turduli, in Cordova; and Eastward the Bastitani, in Jacn. Among the Bastuli was Malaca, now Malaga; and a little South-west of it is Munda, celebrated for the victory of Cæsar over the younger Pompey, March 17, B.C. 45, A.U.C. 709. At the Fretum Herculeum stood Calpe, or Gibraltar, celebrated for one of the pillars of Hercules; the other was at Abila, on the African coast. These pillars are said to have been erected by Hercules as the limits of the Western World. Gibraltar is a corruption of Gibel Tarik, the Mountain

Hence we may fully understand Horace, when he says—
Latius regnes avidum domando
Spiritum, quam si Libyam remotis
Gadibus jungas, et uterque Pœnus
Serviat uni.

Od. II. 2.

Alluding to the Carthaginians, or African Peni, and the Bastuli Peni, in whose country Gades was situated.

of Tarik, a Moorish general, who first led the Moors into Spain, A.D. 710. On the Atlantic side of the straits is Junonis Promontorium, the ever-memorable Cape Trafalgar. Above it is Gades, slightly corrupted into Cadiz; and Tartessus, an island formed by the two mouths of the Bætis, one of which is now dried up. Among the Turdetani was Hispalis, now Seville; and not far from it, Italica, the birth-place of the Emperor Trajan. Among the Turduli was Corduba, now Cordova, the birth-place of both the Senecas and Lucan.

In Lusitania the principal nation was that of the Lusitani, between the Durius and Tagus; which latter river, though called the Tajo by the Portuguese, still retains its name in general use. Below the Durius was Conimbriga, now Coimbra, on the Munda or Mondego; and considerably below it, on the Tagus, was Scalabis, afterwards called St. Irene, and now corrupted into Santarem. At the mouth of the Tagus was Olisippo, fabled to have been founded by Ulysses, the name of which is now corrupted into Lisbon. The Vettones occupied the province of Estremadura. On the frontier of the Lusitani is Lancia Oppidana, now La Guarda, near the source of the Munda; and North-east of it Lancia Transcudana, or Lancia beyond the Cuda, now Ciudad Rodrigo. the frontier of the Arevaci is Salmantica, now Salamanca. About the middle of Lusitania, on the Tagus, was Norba Cæsarca, now Alcantara. Below it, on the North bank of the Anas, is Emerita Augusta, now Merida. On the South part of Lusitania were the Celtici, in Alontejos: their principal town was Pax Julia, or Beja; and below them the extreme Southern part of Lusitania was called Cuneus, or the wedge, now Algarve, or the Western part,

Garb, in Arabic, signifying West. Its extreme promontory was called the Sacrum Promontorium, now the memorable Cape St. Vincent. It was called Sacrum, because the antients believed this the place where the Sun plunged his chariot into the sea.

The islands of Majorca and Minorca were called by the Romans the Baleares Insulæ, and by the Greeks the Gymnesiæ. Their inhabitants were celebrated for their skill in slinging. † In Majorca was Palma, which still retains its name. In Minorca was Portus Magonis, so called by the Carthaginians, from Mago, one of their Generals, now slightly corrupted into Port Mahon. South-west of these were the Pityusæ, or Pinc Islands; Ebusus, corrupted into Yvica; and below it, the small island of Ophiusa, now Formontera.

# CHAPTER VI.

### GALLIA.

#### A. G. Pl. IV.

GALLIA was originally divided among three great nations, the Belgæ, the Celtæ, and the Aquitani. Of these the Celtæ were the most extensive and indigenous. and their name is that under which the whole nation was known to the Greeks, the word Galli being the Latinized native term Gael. The Celtæ extended from the Sequana, or Seine, in the North, to the Garumna, or Garonne, in the South of Gallia. The Belgæ lay above the Celtæ, between the Seine and Lower Rhine, and of course were intermixed with the Germanic tribes; and the Aquitani lay between the Garumna and Pyrenees, and were intermixed with the Spanish tribes. great divisions, however, were subsequently altered by Augustus, B.C. 27, A.U.C. 727, who extended the province of Aquitania into Celtica, as far as the river Liger, or Loire. The remainder of Celtica, above

the Liger, was called Gallia Lugdunensis, from the colony of Lugdunum; and the part towards the Rhine, was added to the Belgæ, under the title of Belgica. Lastly, the South of Gaul, which, from having been the first province possessed by the Romans, was called Gallia Provincia, a term which may be still traced in *Provence*, took the name of Narbonensis. This province was antiently called also Gallia Braccata \*, from the braccæ, or breeches, worn by the inhabitants; while Gallia Celtica was called Comata, from the long hair worn by the natives. These *carlier* distinctions are of use, as prevailing in the time of Cæsar, before the quadruple partition above alluded to.

These four great provinces, in later ages, were called the four Gauls, and were subdivided into seventeen others. Of these, Narbonensis contained five: Narbonensis Prima, Viennensis, Narbonensis Secunda, Alpes Maritimæ, Alpes Graiæ et Penninæ. We shall very briefly mention some of the principal tribes, or cities, in each of these. Narbonensis Prima was at the Western bend of the Sinus, nearly corresponding to Languedoc. The principal tribes were the Volcæ Arecomici, towards the Rhodanus, or *Rhone*, and the Volcæ Tectosages, South-west of them. Among the former was the city of Nemausus, or *Nismes*, which still possesses some fine

<sup>\*</sup> Breac is the Celtic word for a stripe. Hence we need not doubt that these breeches were made of striped materials. Hence also we may understand what is meant by the virgati Dahæ, having a reference to their striped garments. Traces of this early apparel may yet be observed in the Scotch plaid, the patterns of which are always longitudinal and transverse stripes. The Highlanders are & Gaelic (i. c. a Celtic) race.

remains of antiquity; among the latter Tolosa, now Toulouses On the coast, under the bend of the Sinus Gallicus, was Narbo, now Narbonne, which gave name to this division of Gaul. Above them, and on the East bank of the Rhone, was Viennensis, so called from Vienna, now Vienne\*, in Dauphiné. In the North of this province were the Allobroges; in the South the Vocontii; below them we may notice Avenio, Avignon, Arelate, Arles, and Massilia, or Marseilles, a celebrated colony founded by the Phocæans + B.C. 600. In Narbonensis Secunda, the Salyes were the principal people, who were descended from the Ligurians, and stretched along the South bank of the Druentia, or Durance, almost to the Alps. The capital was Aquæ Sextiæ, or Aix. South-east, on the coast, was Telo Martius, now Toulon · but the celebrated Roman port was North-east of this, at Forum Julii, now Frejus, the birth-place of Agricola. North-east of Narbonensis Secunda was the province of the Alpes Maritimæ, whose metropolis was Ebrodunum, or *Embrun*. The most considerable people were the Caturiges. They were situated at the foot of the Cottian Alps, or Mount Genevre, over which, some have thought, Hannibal passed in his way to Italy, and which were so called from a prince named Cottius, who was protected by Augustus. Above the Alpis Cottia is the Alpis Graia, or Little St. Bernard, probably the real scene of Hannibal's passage; and above it the Alpis Pennina, or Great St. Bernard. These formed

<sup>\*</sup> Not to be confounded with Vindebona, now Vienna, in Germany.

<sup>+</sup> Phocæorum

Velut profugit execrata civitas. Hor. Epod. XVI. 11.

the fifth province into which Gallia Narbonensis was subdivided.

Aquitania was subdivided into Prima, Secunda, and Novem Populana. The Bituriges Cubi were the principal people of Aquitania Prima; their capital, first called Avaricum, afterwards took the name of the people, and is still called Bourges. The Arverni also were very powerful in the time of Cæsar, who occupied the district still called Auverne; their capital was Augustonometum, now Clermont, a little North of Gergovia, which so long baffled the arms of Cæsar. Below them were the Gabali, whose capital was Anderitum, or Mende; and the Ruteni, whose capital was Segodunum, or Rodez. West of the Ruteni were the Cadurci, whose capital was Divona, or Cahors; above it was Uxellodunum, besieged by Cæsar. The Lemovices, whose capital was Augustoritum, still give name to Limoges.

The capital of Aquitania Secunda was Burdigala, or Bourdeaux, near the mouth of the Garumna, among the Bituriges Vivisci. The Petrocorii gave name to Perigeux, the former name of which was Vesuna, still retained in that quarter of the city called La Visone. Above the Garumna, the Santones gave name to the province of Santogne, and their chief city Mediolanum, afterwards Santones, is now Saintes. Uliarus, above the mouth of the Garonne, is the Isle of Oleron. Above them, the Pictones, or Pictavi, extend to the Southern bank of the Liger, or Loire; they still give name to their capital Poictiers, antiently called Limonum.

The third province of Aquitania is that which was originally comprehended under that name, but which it exchanged for that of Novem Populana, as consisting of nine principal nations, of whom the Elusates and Ausci appear to have been the chief. The Sotiates were a small tribe, above them, mentioned by Cæsar.

Gallia Lugdunensis was subdivided at first into two, and subsequently into four divisions, called Prima, Secunda, Tertia, and Quarta, or Senonia. It extended from the city of Lugdunum, or Lyons, on the Rhone, to the Western Ocean, being bounded on the South by Aquitania, and on the North by Belgia. The capital of Lugdunensis Prima, was Lugdunum, in the small tribe of the Ambarri, between the junctions of the Arar and Rhodanus, or the Saone and Rhone. The great nation of the Ædui were in this district, whose capital was called Bibracte in the time of Cæsar, Augustodunum under Augustus, and is now corrupted into Autum. North of it was the famous city of Alesia, or Alise, the account of whose memorable siege occupies the last twoand-twenty chapters of Cæsar's seventh book on the Gallic war. North-east were the Lingones, who have given their name to their capital, once called Andematunum, now Langres. Immediately joining these, to the North-west, were the Senones, from whom the Lugdunensis Quarta was called Senonia, and which will be more conveniently now described, than in its regular order after the second and third. Their capital, originally called Agidincum, is now called, from the name of the people, Scns. To the North-west of them, the Carnutes have, in like manner, given to their capital Autricum, the name of Chartres; North-east of whom,

the Parisii still gave to Lutetia the name of Paris. South of the Carnutes, the Aureliani still preserve their name in Orleans, called by Cæsar Genabum. Among the Senones was Melodunum, or Melun, bordering on the Parisii. South of Agidincum was Antissiodurum, now Auxerre, and still South, within the borders of the Ædui, Noviodunun, or Nevers. cast of Agidincum was Augustobona, now Troyes, among the small tribe of the Tricasses. North of the Lugdunensis Quarta was the Lugdunensis Secunda, nearly comprised in the situation of Normandy. The principal nation were the Velocasses, whose capital, Rotomagus, is now Rouen. Above them were the Caleti, or Pays de Caux, whose capital, Juliobona, is now Lillebone; and South-west the Lexovii, whose capital, Noviomagus, is still Lizieux; South are the Aulerci Eburovices, whose capital, Mediolanum, still retains the name of Evreux. West of the Lexovii are the Viducasses and Bajocasses, whose capitals, antiently Viducas and Arægeni, are still Vieux and Bayeux; and the Abrincatui, whose capital Ingena, is Avranches. Below were the Saii, or Essui, whose capital, Saii, is Sécz. Off this coast were the islands of Cæsarea, Sarnia, and Riduna - Jersey, Guernsey, and Alderney.

The Lugdunensis Tertia had for its principal people the Turones, who have given the name of *Tours* to Cæsarodunum, their capital. North-west were the Andes, or Andecavi, whose capital, Juliomagus, has still preserved the name of *Angers*. And the Aulerci Cenomani have given to their capital, Suindunum, the name of *Mans*. The Arvii have preserved their capital in a place called *Citè*, antiently Vagoritum, on the little river

Erre. The Diablintes have given to Neodunum the name of Jablins. The Redones are easily discoverable in Rennes, and the Namnetes, in Nantz, which two capitals were antiently called Condate and Condivincum. North-west of the Namnetes were the Veneti, whose antient capital, Dariorigum, still preserves the name of Vennes. Above them were the Corisopiti and the Osismii, whose capital, Vorganium, is corrupted into Karhez. Among the Osismii were also the Brivatus Portus, Brest; Uxantis Insula, Ushant; and below it Sena, or Sain, corresponding in some measure to the British Mona, as being the sacred residence of the Gallic priestesses. The whole of this tract between the Seine and Loire was called Armorica, which at last, however, was exclusively confined to Bretagne.

Gallia Belgica was divided into Belgica Prima and Secunda, Germania Prima, or Superior, and Secunda, or Inferior, and Maxima Sequanorum. In Belgica Prima the principal people were the Treveri, whose capital, Augusta, is still called Treves, situated near the Mosella, or Moselle, which flows into the Rhine. Southwards were the Mediomatrici, whose capital, Divodurum, was afterwards called Metis, and Metz. Still South were the Leuci, whose capital was Tullum, or Toul; and to their North-west the Verodunenses, whose capital, Verodunum, is still Verdun. North-west of Belgica Prima was Belgica Secunda. The principal people were the Remi, who were much attached to the Komans in the time of Cæsar. The capital, Durocortorum, still preserves their name in that of Rheims. On their South-east, the Catalauni give name to Chalons.

Closely connected with the Remi were the Suessiones, whose capital, Augusta, is now Soissons. wards are the Veromandui, or Vermandois, whose capital, Augusta, is St. Quintin. West of them were the Bellovaci, a very warlike nation, well known in Cæsar's Commentaries, whose capital, Cæsaromagus, is Northwards, the Ambiani had for their still Beauvois. capital Samarobriva, so called from the bridge on the Samarus, or Somme. It is now, from the name of the Still Northwards, were the Atrebates, people, Amiens. or Artois, whose capital, Nemetacum, is still Arras, or Atrecht. Above these were the Morini, on the extreme Northern coast. \* Their capital was Taruenna, or Terouenne. On the coast also was Gesoriacum, or Bononia, now Bologne; and above it Portus Itius, or Witsand, from which Cæsar embarked for the invasion of Britain. East of these were the Nervii, whose original capital was Bagacum, Bavia, in the middle of Hainau, but afterwards Camaracum, or Cambray, and Turnacum, or Tournay. Next to these was Germania Secunda, Inferior, or Lower, so called as being near the coast, lying between the Scaldis, or Scheldt, and the Rhenus, or Rhinc. On the West bank of the Rhine were the Ubii, the chief people, whose capital, Colonia Agrippina, or Cologne, was so called in compliment to Agrippina, the wife of the Emperor Claudius. West of these were the Eburones, a people who were annihilated by Cæsar, in revenge for their having slaughtered a Roman legion; and their country was occupied by the Tungri, whose capital, Atuataca, is still called Tongres. — All these nations

were of Germanic origin. Between these and the Treveri was the great forest of Arduenna, or Ardenne, extending from the confines of the Nervii to the Rhine. Above them were the Toxandri and Menapii; and still North, the Batavi, who possessed an island between the right branch of the Rhine and the Vahalis, or Waal, its left branch. The principal city of the Batavi, was Lugdunum Batavorum, which still preserves its name in Leyden. Noviomagus also is easily recognised in Nimeguen.

Germania Prima, Superior, or Upper, so called as being more inland, lay along the Western bank of the Rhine, and contained three Germanic nations—the Vangiones, Nemetes, and Triboci. The capital of the Vangiones was Borbetomagus, or Worms; North of which were Moguntiacum, or Mentz, and Confluentes, or Coblentz: the capital of the Nemetes was Noviomagus, or Spires; and of the Triboci, Argentoratum, or Strasburg.

Maxima Sequanorum had for its principal nation the Sequani; their capital was Vesontio, or Besançon, on the river Dubis, now Doux. Next to them were the Helvetii, part of Switzerland, whose principal city was Aventicum, now Avenche; Turicum is now Zurich. Above the Helvetii were the Rauraci, whose principal city was Augusta, now Augst, a little South-east of Basilia, or Basle.

## CHAPTER VII.

## GERMANIA.

### A.G. Pl. V.

THE first grand division of the German nations is into the Istævones, on the West of Germany, who inhabited the countries adjacent to the Rhine; the Hermiones, on the South, who were those adjacent to the Danube; and the Suevi, and afterwards the Vendili, or *Vandals*, in the North, who were contiguous to the Baltic, and the most celebrated of the three.

The Western bank of the Rhine has already been described, as containing several German nations, in the three Gallic provinces along the Rhine. On the Eastern bank of the Rhine, on the coast, are the Frisii, or Frisons, their country was intersected by a canal, made by Drusus, called Flevo, the waters of which, having in time increased, now form the Zuyder Zee, or Southern Sea, one of whose channels, the Vlic, still retains

traces of the original name. North-east of the Frisii were the Chauci Minores and Majores, a Suevic race, distinguished by Tacitus as the most noble and just of all the German nations. The Minores were situated between the Amisia, or Ems, and the Visurgis, or Weser; the Majores between the Visurgis and the Albis, or Elbe. South of the Frisii were the Bructeri; in the Eastern parts of whose country were the Chamavi and Angrivarii. The former had originally been settled on the banks of the Rhine, till removed by the Usipii; the latter gave name to Angria, the kingdom of the Saxon Witikind. The Marsii or Marsaci, and Chasuarii were also in this district, the former on the West, the latter on the Eastern South-east of the Chauci, between the Visurgis and Albis, were the Cherusci, who, under the conduct of Arminius, defeated and slew the three Roman legions commanded by Varus, A.D. 10, in the Saltus Teutobergiensis, or Bishopric of Paderborn. They were afterwards defeated by Germanicus, and never recovered their former eminence. On the East bank of the Rhine, South of the Usipii, were the Sicambri, who were driven over it by the Catti, in the time of Augustus, and settled in Germania Prima, under the name of Gugerni. Tencteri inhabited a district South of the Sicambri. East of these was the great and powerful nation of the Catti, called by Cæsar the Suevi, an Hermionic tribe, who were seated in Hesse. A fortress of the Catti, called Castellum, still bears the name of Cassel, but their capital, Mattium, is Marpurg. South of them, along the Rhine, were the Mattiaci, a nation in firm alliance with the Roman empire; and South of these was the original settlement of the Marcomanni, who afterwards migrated into Bohemia. South-east of these was Mons

Abnoba, or the Black Mountain, in which the Danube rises; the adjoining district was called the Decumates Agri, because the inhabitants were subject to a tax of the tenth of their produce. Here the Alemanni settled, from whom Germany was called, in the middle ages, Almagne.

East of these, the Hermunduri, the first of the Hermionic tribes, were a great and powerful nation, in the interior of Germany, attached to the Romans. East of them, on the bank of the Danube, were the Narisci, where is Regina, now Ratisbon: North-east of whom in the centre of Germany, were the Boii, or Boiohemi, in Bohemia, whose country was seized by the Marcomanni, under their king Maroboduus, in the reign of Augustus. South-east of the Boii, or Marcomanni, were the Quadi, who occupied Moravia. North-east of the Marcomanni and Quadi were the Gothini, Marsigni, Osi, Burii, and Lygii, which last nation bordered on the Vistula.

The rest of the German tribes are Vandal or Suevic; the most noble of them were the Semnones, between the Albis and Viadrus, or Oder. North of these, on the East bank of the Albis, were the Langobardi, or Lombards; the Varini were supposed to have been in Mecklenburgh. Towards the mouth of the Elbe and the Chersonesus Cimbrica, in Holstein, were the Angli and Saxones, our English progenitors. The Teutones and Cimbri had their original settlements here. The whole coast of the Baltic was occupied by various tribes of the Vendili, or Vandals, and the name of the Rugii is still preserved in Rugenwald; the Burgundiones, South-east of the Langobardi, afterwards migrated to France, and possessed

the province of Burgundy. On the North were the Gothones, or Goths; and above them the Lemovii. That part of the Baltic which washes the shores of Germania was called Sinus Codanus; and above it was Scandinavia, comprising Sweden and Norway, but very imperfectly known to the antients.

The remainder of Europe, East of Germania and North of the immediate vicinity of the Danube, was known by the generic name of Sarmatia, and the inhabitants were called Sarmatæ and Sauromatæ. In like manner, the North of Asia, beyond the Euxine and Caspian Seas, was known by the generic name of Scythia.

We should not omit, in our account of Germany, to notice the immense forest called the Hercynia Sylva, the whole extent of which was unknown; but it took Cæsar nine days to cross it, and it had been travelled longitudinally sixty days' journey, without coming to any boundary. It contained part of Switzerland and Transylvania. An account of it is to be seen in the sixth book of Cæsar's Gallic Wars.

<sup>•</sup> They seem to have considered it as consisting of a number of islands. Of the two nations mentioned by Tacitus, the Suiones are thought to have been the inhabitants of Sweden, and the Sitones of Norway.

## CHAPTER VIII.

## COUNTRIES SOUTH OF THE DANUBE.

### A. G. Plates I. VI. IX.

THE remainder of Europe, not yet described, consists of countries South of the Danube, and East of the Adriatic: these, with the exception of Greece and its immediately adjacent country, will form the subject of the following chapter.

Immediately below the Danube (Pl. VI.), from its sources on Mount Abnoba, was Vindelicia; and South of it was Rhætia, bounded on the West by the Helvetii or Swiss, on the South by Cisalpine Gaul and the upper part of Italy, and on the East by Noricum. It more than comprised the country of the Grisons. The Rhæti were a colony of the Tuscans, who degenerated into the barbarism of the surrounding Gallic and Germanic tribes, and were subdued by Drusus, under the reign of Augustus, B.C. 15, A.U.C. 739. His victory is celebrated

in the fine and well-known Ode of Horace, Book IV. 4.\* The Vindelici and Rhæti, thus subdued, formed one province, whose subsequent divisions we need not enter into. It is hardly necessary in a treatise like the present, which is a mere Compendium of Classical Geography, to enumerate the names of all the barbarous tribes which formed these nations. We may content ourselves with observing, that in the Southern angle of the Rhæti, near the lake Larius, were the Vennones, in the Valteline; and South-east of them, above the lake Benacus, was Tridentum, or Trent, so well known to modern theologians, from the last Christian Council having been held there, A.D. 1545. In the South-west part of Vindelicia, the Lacus Brigantinus was so called from the nation of the Brigantii, but it is now called the Lake of Constance, perhaps from their neighbours the Consuanetes. North and North-east of this lake are the two nations of Brenni and Genauni, mentioned by Horace in the Ode already alluded to. In the angle of two rivers, Vindo and Licus (the Wartach and Lech), whence the name of the nation, was Augusta Vindelicorum, or Augsburg.

East of Vindelicia was Noricum, in part of Bavaria. It was separated from the Vindelici by the great river Œnus, or *Inn*. At the junction of the Inn and Danube, was Boiodurum, or *Passau*; and East of it was Lauriacum, the station of a Roman fleet on the Danube, where is now a small village called *Lorch*. Inland is Juvavum, or *Saltzbourg*, South-west of Boiodurum.

East of Noricum, lying along the Danube, to the

Videre Rhæti bella sub Alpibus Drusum gerentem et Vindelici. mouth of the river Savus, or Saave, was Pannonia, first reduced to a Roman province by Tiberius, and subsequently divided into Superior and Inferior, the former occupying part of Hungary, the latter Sclavonia. In Pannonia Superior was Vindobona, now Vienna; but the chief city in Pannonia was Carnuntum, Altenbourg, a little to the East. Still East, after the first bend of the Danube Southwards, is Aquincum, or Acincum, now Buda; and on the opposite shore of the Danube, Contra Acincum, or Pest. In Pannonia Inferior, on the river Savus or Saave, is the city of Sirmium, so celebrated in the latter ages of the Roman Empire, and the district is still called Sirmia.

South of Pannonia, bounded on the West by the Adriatic, on the East by Mossia, are the Illyricæ Gentes, or Illyricum, the two principal divisions of which are Liburnia and Dalmatia; the former is now part of Croatia, the latter retains its name. The light Liburnian gallies constituted great part of the fleet of Augustus at the battle of Actium.\* In Dalmatia was Salona, the retreat of the Emperor Dioclesian, near Spalatro. Considerably South-east of it was Epidaurus, or Old Ragusa; and near it the island Melite, by some thought to have been the scene of St. Paul's shipwreck, though there are stronger reasons for fixing upon Malta. Below Epidaurus are Scodra and Lissus, the former now called Scutari, the latter Alcssio.

Mœsia (Pl. IX.) is bounded on the West by Pannonia and Illyricum, on the South by Maccdonia and Thrace, on the East by the Euxine, and on the North

> Ibis Liburnis inter alta navium, Amice, propugnacula.

by the Danube, Ecupying the present provinces of Servia and Bulgaria. The North was occupied by the Scordisci, a Celtic nation; the South was called Dardania; in the centre were the Triballi, and on the shores of the Euxine were the Scythæ. But under the reigns of Augustus and Tiberius it was reduced to a Roman province, under the names of Mæsia Superior, nearer to Pannonia, and Inferior, nearer to Thrace. The centre of Mosia was called Dacia Cis-Danubiana. or Dacia Aureliani, by the Emperor Aurelian, when he abandoned the province beyond the Danube called Dacia Trajani. In Mœsia Superior, Singidunum, at the mouth of the Save, is now Belgrade. East of it, Viminiacum was another important city. Somewhat East of this was Taliatis; after which began the province of Dacia Cis-Danubiana. Near this place also was a ridge of rocks, forming a cataract in the Danube, remarkable as thought to be the spot where the Danube changes its name, the Eastern part of it being called the Ister by the antients, as the Western was the Danubius. A little East of this place was the famous Pons Trajani, or bridge built by the Emperor Trajan across the Danube, to pass into his province of Dacia. Its ruins still remain. It was 3325 English feet in length. \* Below it is Ratiaria, the antient metropolis of Dacia; and East is Nicopolis, built by Trajan to celebrate his victories over the Dacjans, and memorable also for the defeat of the Christian army and

<sup>\*</sup> The longest bridge now existing in Europe is the Pont de Saint Esprit, built in the twelfth century, across the Rhone, on 50 arches, between Montelimar and Orange, which is said to be 3197 English feet in length: that of Prague is 1812, Tours 1422, Westminster 1279.

flower of French nobility, by Bajazet, A.D. 1393. In the interior is Naissus, now Nissa, the birth-place of Constantine the Great; and South-east is Sardica, the metropolis of Dacia, and celebrated for a Christian council. In Mosia Inferior was Marcianopolis, the capital, so called from Marciana, the sister of the Emperor Trajan. Under the mouths of the Danube was the city of Tomi, now Tomeswar, or Baba, to which Ovid was banished. On the Northern bank of the Danube was the vast province of Dacia, comprehending part of Hungary, Transylvania, Wallachia, and Moldavia. The chief city in which was Sarmizegethusa, called by Trajan after his conquest, Ulpia Trajani. It is now called Gradisca. The Iazyges, a Sarmatian tribe, separated them from Pannonia. The Daci and Getæ were two nations associated in language and territory, and the Getæ were of Scythian origin. It is not necessary to enter into a particular account of them, or of many places which might have been enumerated in this chapter, but which, having a special reference only to the lower ages of the Eastern Empire, are purposely omitted in a treatise which professes only to give a sketch of classical Geography.

The remainder of Europe, North of the Danube, we have already seen was called Sarmatia. (Pl. I.) It is unnecessary to enter into much detail on the subject of these barbarous and almost unknown tribes. On the shores of the Baltic were the Venedi, perhaps in part of Livonia; above the Daci were the Bastarnæ and Peucini; on the shores of the Palus Mæotis were the Iazyges, and above them the Roxolani; North are the Geloni, Budini, and Agathyrsi. The Borysthenes of

the antients, which flows into the Pontus Euxinus, is the *Dnieper*; the Hypanis, called also Bogus, is the Bog; the Tanais is corrupted into the Don; and the Rha is the Volga, which flows into the Caspian Sea. The borders of the Euxine, from the Ister to the Borysthenes, were called by the antients Parva Scythia, and by the moderns Little Tartary. Beyond the Borysthenes was the Chersonesus Taurica, (which preserves its name still in the city of Cherson,) so called from the Tauri, a Scythian nation, who conquered it from its antient possessors, the Cimmerii. This was the scene of the Iphigenia in Tauris of Euripides. The narrow straight which joins the Palus Mœtis, or Sea of Azoph, to the Pontus Euxinus, was called the Cimmerian Bosphorus. The principal city here was Panticapæum, a Greek colony, called also Bosphorus, now Kerche. The extreme Southern point of the Chersonesus Taurica was called Criu Metopon, or the Ram's Forehead, nearly opposite to Sinope, in Asia Minor.

## CHAPTER IX.

# RÆCIA ANTIQUA.

### Plates IX. XI.

THE most general name for Greece among the natives themselves was Hellas, and the people were called Hellenes; but even this term did not comprise the inhabitants of Macedonia and Epirus. The poets, however, used, by synecdoche, to put the names of several small tribes for the whole body of the nation. The most usual term in Homer\* is Achæi and Danai,

\* The word Hellenes occurs only once in Homer, Iliad II. 648.; where it is used, not as a generic, but a specific name of the inhabitants of that part of Thessaly called Hellas; and, what is also remarkable, the word Græcia was not legally recognised by the Romans, who divided it into two provinces. The one called Macedonia, after the defeat of Perseus, the last king of Macedon, by

and sometimes Argivi. They were also called Pelasgi, from an antient nation of that name in Thessaly; Iones, Dores, and Æoles, from the inhabitants of particular districts. Attica was the original seat of the Ionians, the Peloponnese the principal seat of the Dorians, and Thessaly the original country of the Æolians.

The lowest part of Greece (Pl. XI.), below the Sinus Corinthiacus and Sinus Saronicus, was called the Peloponnese, from Πέλοπος νησος, the Island of Pelops. It was most antiently called Ægialea, from Ægialeus, Apia, from Apis, Pelasgia, from Pelasgus, said to have been its more antient Kings; but took the name of Peloponnese, from Pelops, the son of Tantalus, who reigned there. It was very nearly an island, being connected with the rest of Greece only by the narrow isthmus of Corinth. The modern name of Peloponnese is Morea, from the mulberry-trees which grow there, having been introduced for supplying silk-worms. The first province on the Eastern side, under the Sinus Saronicus, is Argolis; and below it is Laconia;

Paulus Æmilius, A.U.C. 586, B.C. 168.; and the other called Achaia, after the defeat of the Achæans, and the capture of Corinth, by Mummius, A.U.C. 609, B.C. 145. The name of *Gracia*, however, was sufficiently familiar among the Romans in writing and conversation.

on the Western side, opposite to Laconia, is Messenia; above it is Elis; along the Sinus Corinthiacus is Achaia; and in the middle is Arcadia.

Argolis derives its name from Argos, situated on the river Inachus, above the Sinus Argolicus, and still called Argo. Its Acropolis was called Larissa. A little North-east of Argos was Mycenæ, now Krabata, the royal city of Agamemnon; Northwards of which was Nemea, celebrated for the Nemean games, instituted in honour of Archemorus, who was killed there by a serpent, and for the victory of Hercules over the Nemean Eastward of Argos was Midea, the birth-place of Alcmena the mother of Hercules; and North-east of this was Tiryns, or Tirynthus, a favourite residence o Hercules, who is thence called Tirvnthius. East of it is the Mons Arachnæus, on which was one of the beacons, or fire telegraphs, of Agamemnon, by which he announced the capture of Troy the same night that it was taken. \* Still East, on the coast of the Sinus Saronicus, is Epidaurus, celebrated for its worship of Æsculapius; and below it is Træzen, or Træzene, now Damala, the birth-place of Theseus, and scene of the Hippolytus of Euripides, off the coast of which a little to the South-east is the island Calauria, where Demosthenes poisoned himself. Near the South point of Argolis is the city of Hermione, now Castri, giving to the adjacent bay the name of Sinus Hermionicus. At the top of the Sinus Argolicus was Nauplia, now Napoli, the naval station of the Argives. Southward, below

<sup>\*</sup> See Æschylus, Agam. v. 317.

Argos near the shore, was Lerna, celebrated for the destruction of the Lernean Hydra by Hercules; and on the confines of Arcadia, was Cenchreæ, mentioned by Æschylus in his Prometheus Vinctus, v. 577.

Below Argolis was Laconia, whose capital was Sparta, or Lacedæmon, now Palæo-Castro, on the river Eurotas; near which is the more recent town of Misitra, at the foot of Mount Taygetus. To the North was Sellasia, a frontier town commanding the principal pass into Laconia; and a little South of Sparta was Amyclæ, now Sclavo-corio, built by Amyclas. Castor and Pollux were born here, and Apollo was here worshipped with peculiar solemnities. Amyclæ was called Tacitæ\*, or the Silent, either from the inhabitants being Pythagoreans, or from their having made a law which forbad the mention of an enemy's approach, they having been once deceived by a false report. They were afterwards the victims of their absurd statute. Near Amyclæ was Therapne. The extreme South-eastern promontory of Laconia was called Malea +, now Cape Malio, or St. Angelo; and the Gulf contained between it and the South-western promontory of Tænarus, or Cape Matapan, (one of the fabled entrances into the infernal regions t,) was called the Sinus Laconicus, or Gulf of Colokythia, from the antient town of Gytheum, now Colokythia, near the upper part of the bay.

<sup>----</sup> Tacit is regnavit Amyclis.

<sup>+</sup> Maleæque sequacibus undis.

Virg. Æn. V. 193.

<sup>†</sup> Tænarias etiam fauces, alta ostia Ditis Ingressus.

Virg. Georg. IV. 467.

West of Laconia was Messenia, the capital of which was Messene, which still retains its name, inland, above the top of the Sinus Messeniacus, now the Gulf of Coron. The fortress of Ithome was near it, and served as its citadel South-east of it, at the mouth of the Pamisus, was Stenyclarus, now Nisi. On the Western side was the Messenian Methone, now Modon; and above it the Messenian Pylos, now Navarin; off which was the Island of Sphacteria, so memorable in Thucydides for the capture of many of the noblest Lacedæmonians, Ol. 88. 3. In the North, on the confines of Elis, is the river Cyparissus, having at its mouth the city of Cyparissæ, giving name to the adjacent Sinus Cyparissius; and inland the fortress of Ira, the last which held out against the Lacedæmonians, who ejected the Messenians, Ol. 27. 2., and held the province from them for 300 years, till Ol. 102. 3.

Above Messenia was Elis, divided into Triphylia, in the South, Pisatis, in the middle, and Cœle, in the North. In Triphylia we meet with the Triphylian Pylos, which disputes with the Messenian the honour of being the country of Nestor; and a little above it, Scilluns, the retreat of Xenophon. Above it was the river Alpheus, or Rofeo, on the Northern side of which was the plain of Olympia, now called the plain of Antilalo or Antilalia, terminated on the West by the little river Cladeus, and the hill Chronios, or the hill of Saturn, so often mentioned by Pindar. Near this must have been the city of Pisa, of which no vestiges are now discoverable. In this plain, the Olympic games were held in honour of Jupiter Olympius. They were of very antient foundation, and revived B.C. 776, and serve as

the epoch of Græcian chronology. They were celebrated at the conclusion of every fourth year, or rather of every forty-ninth month, and were held for five successive days. The Roman Lustrum was a period of five years. Elis itself, now Palæopoli, was situated on the river Peneus, in the district of Cæle; it was a little North-east of Gastonni; South-east of this was a third Pylos, which has also strong claims to being allowed as the country of Nestor. Near it was a little stream called Geron, and a little village called Gerena, whence Nestor appears to be so often styled in Homer the Gerenian. Pindar, however, calls him a King of Messene. The port of the Eleans was Cyllene, now Chiarenza, a little North of the bay and promontory of Chelonites, now Cape Tornese.

The rest of the coast of the Peloponnesus was occupied by Achaia, lying along the Southern side of the Sinus Corinthiacus, comprising also the districts of Sicyon and Corinth, called Sicyonia and Corinthia. Before we enter the straights of the Sinus Corinthiacus, or Gulf of Lepanto, is Dyme, on the coast of the Ionian Sea; and above it is Patræ, now Patras, néar the mouth of the straights. At the entrance into the straights is Rhium, and on the opposite coast Antirrhium. ceeding Eastward, along the shore, is Ægium, where the States of Achaia used to meet; and South-west of it, within land, is Tritæa, now Triti. East of Ægium was Ægira, which had a port and dock-yard; and Southeast of it, within land, was Pellene; East of which is the district of Sicyonia. Near the coast was Sicyon, which, in the modern name of Basilico, still retains the memorial of having been the most antient kingdom of Greece. South of Sicyon, in the interior, was the city

of Phlius, which still preserves its name in Staphlica. -Proceeding towards the end of the Sinus Corinthiacus, we come into the district of Corinth, where we meet with that far-famed city, which was destroyed by Mummius the Roman General, B.C. 145, A.U.C. 609, and rebuilt by Cæsar. It is still called Corito. It was itself a little inland, but had two ports, Lechæum, on the Sinus Corinthiacus, and Cenchreæ, on the Sinus Saronicus+, and a citadel, on a lofty hill called Acrocorin-The pass between the Peloponnese and the rest of Greece was called the Isthmus of Corinth, now Hexamili, from its being only six modern Greek, or perhaps not five British miles in breadth. Here the Isthmian games were celebrated in honour of Neptune. The Emperor Nero in vain attempted to cut through the Isthmus and join the Saronic and Corinthian Gulfs.

The province of Arcadia occupied the centre of the Peloponnesus, being surrounded by the five provinces already enumerated. This was the celebrated pastoral country of the poets. † Near the North of Argolis was the river, lake, and town Stymphalus, now Zaraka, the fabled residence of those Harpies which were destroyed by Hercules. South-west was Orchomenus, now Kal-

<sup>\*</sup> The addition of Sta, or Stan, is common in modern Greek names, being a corruption of έs τὰ, or έs τάν. Thus Constantinople is called Stambol, or έs τάν πόλιν.

<sup>‡</sup> Pan etiam, Arcadia mecum si judice certet, Pan etiam, Arcadia dicat se judice victum.

paki, bearing the same name with a town in Bœotia; and Southwards the celebrated city of Mantinea, near Tripolitza, where the great Epaminondas, the Theban General, lost his life, in the memorable victory he obtained over the Lacedæmonians there, B.C. 363, Ol. 104. 2. Southwest of Mantinea is Mount Mænalus, from his residence on which Pan was called Mænalius. South-east of Mænalus was the city of Tegea, now called Piali, whence also Pan is called Tegeæus. \* The celebrated Atalanta was a native of this place. In the South of Arcadia was Megalopolis, near a place now called Leondari, or rather Sinano. It was built by Epaminondas to check the inroads of the Lacedæmonians. It was the hirth-place of Polybius the historian. Towards Messenia was the celebrated mountain Lycœus +, another avourite residence of Pan and the Sylvan Deities. Near it was the city of Lycosura, now probably Agios Georgios, esteemed by the Greeks the most antient city in the world. It was near the river Neda. A little West of which is Phigalea, where was a splendid temple of Apollo, the marbles of which are now in the British Museum. The inhabitants of this part of Arcadia were called Parrhasii, from Parrhasius, a son of Jupiter, who built a city here, and the name is sometimes put generically for that of the whole nation. ‡ Northward, on the

Virg. Georg. I. 16.

† Velox amænum sæpe Lucretilem Mutat Lycæo Faunus.

Hor. Od. I. 17.

† Arcadia derived its name from Arcas (the son of Jupiter) and the nymph Calisto. Juno transformed Calisto into a bear, whom, with her son Arcas, Jupiter removed into heaven, and changed into

river Alpheus, was Heræa; and still Northward, Psophis; and North-east, on the confines of Achaia, Cynethæ, whose inhabitants were remarkable for the barbarous rusticity of their manners, so as to be despised, or almost excluded from associating with the other Greeks, who attributed their ferocity to a neglect of the study of music, so much cultivated among the Greeks in general. Yet it is remarkable, that in their neighbourhood, a little to the East, was the mountain Cyllene, celebrated as the birth-place of Mercury, the inventor of the lyre, of eloquence, and the gymnastic exercise \*, who is so constantly distinguished among the poets by the name of Cyllenius. At the foot of Mount Cyllene was the city Pheneos, now Phonia; and in the North-western. angle between Arcadia and Achaia was Mons Erymanthus.

We shall now describe the remainder of Greece, or Greece properly so called, lying above the Isthmus. The first province, lying almost within the Isthmus, is the small district

constellations called Ursa Major and Ursa Minor. — Ov. Met. VIII. 515. Hence the constellation Ursa is called by Ovid Parrhasis Arctos; and, as Calisto was daughter of Lycaon, it is called by Virgil Claramque Lycaonis Arcton.

Georg. I. 138.

Nuncium, curvæque lyræ parentem.

Hor. Od. I. 10.

of Megara, which affected to be independent of the potent territory of Attica. To the East was Attica; and to the North-west of these Bœotia; North-east of Bœotia and Attica (Pl. X.) was the long narrow island of Eubœa, separated by the narrow sea of Euripus. West of Bœotia was Phocis; South-west of Phocis, lying along the Sinus Corinthiacus, were the Locri Ozolæ; and North-east of Phocis, lying along the Opuntius Sinus, were the Locri Epi-Cnemidii, or Locri of Mount Cnemis, and the Locri Opuntii below North of Phocis was Doris, a small tract. but which divided with the Ionians the characteristic features of the language and tribes of Greece. Generally speaking, the Dorian colonies were settled in the Peloponnese, the Ionian in Asia Minor: the great Dorian state was Lacedæmon, the great Ionian state Athens. There was a marked distinction in their language and manners; the former being more broad and rustic, the latter more smooth and refined. West of Phocis was Ætolia; and West of Ætolia was Acarnania. North of Phocis was Thessaly: North of Acarnania was Epirus: -

In Megaris (Pl. XI.) the capital was Megara, which preserves its name, and is a little inland. Its port was Nysæa. East of Megara, on the coast, in Attica, was Eleusis, \*now Lessina, so celebrated for the Eleusinian mysteries in honour of Ceres and Proserpine, which it

was death to reveal.\* They lasted 1800 years, and were abolished by the Emperor Theodosius. tue of the Eleusinian Ceres, the work of Phidias, was removed from Eleusis by Dr. Clarke, A.D. 1801, and is now in the vestibule of the public library at Cambridge, and the temple itself has since been cleared by Sir W. Opposite Eleusis, and separated by a very narrow sea, is the island of Salamis, the birth-place of Ajax and Teucer, and ever-memorable scene of the defeat of the Persian fleet by the Athenians under the command of Themistocles, B.C. 480, Ol. 75, 1; and below Salamis is Ægina or Engia, giving name to the Gulf of Engia, antiently the Sinus Saronicus. South-east of Eleusis is the illustrious city of Athens, the eye of Greece and of the civilized world. It is now called Atini, or Setines, by a corruption we have already noticed. This renowned city (Pl. XXI.) is situated rather inland, between two rivers, the Ilissus below, and the Cephissus (bearing the same name with a larger Bœotian river) above. It had three ports, the Piræus, or principal port, now Porto Leone, which was connected with the city by means of two walls called the manea relyn, or long walls; East of the Piræus was the second port called Munichia; and still East of it the Phalerus, the least frequented of the three. The long wall, which connected the Piræus with the city, was sixty stadia (or rather more than six and a half English miles) in length, and forty cubits (or rather more than sixty feet) high, and broad enough for two

Hor. Od. III. 2.

Vetabo qui Cereris sacrum
 Vulgarit arcanæ, sub isdem
 Sit trabibus, fragilemque mecum
 Solvat phaselum.

waggons to pass. This wall was built by Themistocles, and finished by Cimon and Pericles. Another somewhat shorter wall, towards the East, united the harbour of Phalerum with the walls of the city. Entering by the gate of the Piræus, a straight line led to, 2. the Propylæa, or vestibules of, 1. the Acropolis, or citadel. the summit of the citadel, an oblong hill, was the famous temple of Minerva, called the Parthenon. At the bottom of this hill, on the South-side, was, 3. the theatre of Bacchus, where the tragedians exhibited their compositions; and East of it was, 4. the Odeum, or theatre for musical competition. Proceeding round the hill of the Acropolis, on the North, was, 5. the Prytaneum, or place where those citizens who had rendered essential service to their country were entertained at public expense. Opposite the North-west side of the Acropolis, was, 6. the ever-memorable hill of Mars, on which was established the court of the Areopagus; and opposite the Propylæa, or Western end of the Acropolis, was, 7. the Pnyx, or place of public assemblies. Opposite to which, on the South, was, 8. the hill of the Museum, having the road from the Piræus to the Propylæa between it and the Pnyx. From the hill of the Areopagus, continuing in a North-west direction, we come to, 9. the Forum, which was in a place called the Ceramicus, or pottery ground. The Forum had at its Southern entrance an enclosure, containing the palace of the Senate and temple of the Mother of the Gods. On the South-western side of the square were the statues of the Eponymi, or ten heroes who gave name to the tribes of Attica; and at the Eastern gate were two vestibules, the Western called that of the Hermæ, in which were three statues of Mercury, bearing the names of those soldiers who had distinguished

themselves in the battles against the Persians, and, 10. the Eastern called the Pœcile, which was ornamented with the works of the first artists in painting and statuary. In the Forum was also the court of the chief Archon, near the statues of the Eponymi, and the camp of the Scythians employed by the government in the police of the city. The quarter to the East of the Forum was called Melita. At the North-east of the city, without the walls, was Cynosarges, the school of the Cynic philosophers, at the foot of Mount Anchesmus, a branch of Mount Pentelicus, so celebrated for its marble quarries; and below it was the Lycæum, the school of Aristotle and the Peripatetics, separated by the river Ilissus from Mount Hymettus. A little South-west of the Lyceum, between the Acropolis and the Ilissus, was, 12. the Olympieum, or temple of Jupiter Olympius, originally projected by Pisistratus, but completed, or perhaps rebuilt, by the Emperor Hadrian, who exceedingly embellished and half rebuilt the city. A little East of this, across the Ilissus, was, 13, the Stadium. On the North-west was the Ceramicus without the walls, through which a road led to the celebrated gardens of the Academia, watered by the Cephisus on the North-west, and having the house of Plato to the East, and to the North the Hill Colonos, the scene of the beautiful tragedy of Sophocles called the Œdipus Coloneus. The road to Thebes passed over this hill. South-east of the Parthenon (Pl. XI.) was Mount Hymettus, celebrated for its bees \*: and North-east of it Mount Pentelicus, celebrated for its quarries of marble; a Northern branch of which is

Ne biberis diluta ——.

Mons Brilessus; North is Mount Parnes, North-west and West; Mount Ægaleus and Corydalus. The extreme Southern promontory of Attica was called Sunium, where there was a temple of Minerva, some columns of which still remain, whence the cape is now called Cabo Colonni. A long island lies opposite to it called Helena, or Macris, which still preserves the name of Macronisi. Near Sunium was Laurium, celebrated for its silver Proceeding upwards, along the North-eastern shore of Attica, we come to Brauron, near Mons Pentelicus. Here was a celebrated temple of Diana, hence called Brauronia: and the statue of Diana, brought by Orestes from Tauris, was preserved here till it was carried off by Xerxes. North of Brauron is the glorious plain of Marathon, still preserving its immortal name, where the Athenians, under the conduct of Miltiades, defeated the Persian army, Sept. 28, B.C. 490, Ol. 72, 3. Above it is Rhamnus, celebrated for a temple of the goddess Nemesis, thence called Rhamnusia. It was built of the marble brought into the field by the Persians, in order to erect the trophy of their anticipated victory. 'Quitting the coast, somewhat South-west of Rhamnus, is Decelia, so celebrated for having been garrisoned by the Lacedæmonians in the Peloponnesian war, Ol. 91. 3. B.C. 414. See Thucyd. VII. 19. tween this and Athens was Acharnæ, a borough of Attica, which has given name to a play of Aristophanes. North of Eleusis is Thria, giving the name of Thriasius Campus to the great plain extending towards Eccotia, to the North of which was Phyle, the fort possessed by Thrasybulus and the Athenian exiles, who expelled the thirty tyrants from Athens after the Peloponnesian war, B.C. 401. Ol. 94, 4.

Next to Attica is Bœotia (Pl. X.) in which, above Megaris, and the Sinus Corinthiacus, we may observe Mount Cithæron, about midway between Thebes and Corinth, the celebrated scene of the exposure of the infant (Edipus. A little North-west of Mount Cithæron is Platææ, the ever-memorable scene of the defeat of the Persians, under the command of Mardonius, by the Lacedæmonians, commanded by Pausanias, Sept. 22. B.C. 479, Ol. 75. 2, and of the siege and cruel destruction of its inhabitants by the Lacedæmonians, in the Peloponnesian war, B.C. 427, Ol. 88. 2, so interesting an account of which is given by Thucydides in his third book. A little West of Platææ is Leuctra, so memorable for the signal defeat of the Lacedæmonians by the. Thebans, under the conduct of Epaminondas, July 8: B.C. 371, Ol. 102. 2. Proceeding Eastward, along the Athenian frontier, we find Eleutheræ, and following the course of the river Asopus, we come to Tanagra and Oropus, now Oropo, at its mouth. The Athenians and Thebans had many disputes for the possession of Oropus, till at last it was adjudged to the Athenians by Philip of Macedon. The plain along the Asopus was called Parasopias. North-east of Tanagra was Delium, where the Athenians were defeated by the Bootians, in the Peloponnesian war, B.C. 421, Ol. 89. 4.; an account of which may be seen in the fourth book of Thucydides. Northwards, at the narrowest point of the Euripus, opposite to Chalchis, in Eubœa, was Aulis, the memorable scene of the detention of the Grecian fleet in their expedition to Troy, till Agamemnon had appeared Diana by the sacrifice of his own daughter Iphigenia. Still Northwards is Anthedon; West of which is the lake Copais, now called Livadia Limne, into which

flows the Bœotian Cephisus, celebrated by Pindar, and largen than the Athenian river of the same name. the North of this lake stood the small town of Copse, whence it derived its name. Near its Western extremity was Orchomenus, antiently called Minyeia, a town celebrated for its wealth, and for a temple of the Graces, mentioned by Pindar. Somewhat South-west was the town of Chæronea, memorable for the defeat of the Athenians by the Boeotians, B.C. 447, Ol. 93. 2.; and much more for their irretrievable defeat by Philip, Aug. 2. B.C. 338, Ol. 110. 3, which put an end to the liberties of Greece: it was also the birth-place of Plutarch. South-east of this, is Coronea, celebrated also for a defeat of the Athenians, and their allies, by Agesilaus, King of Sparta, B.C. 394, Ol. 96. 3.; Eastward of this, near the lake Copais, is Haliartus, which was destroved by the Romans in the first Macedonian war. South-east was Onchestus, sacred to Neptune, and Southeast of it, almost in the centre of Bœotia, on the little river Ismenus, was Thebes, founded by Cadmus, and hence called Cadmæan, the scene of the sufferings of Œdipus, and the birth-place of Pindar, whose house and descendants were spared when Thebes was utterly destroyed by Alexander, Ol. 111. 2., B.C. 335. rebuilt by Cassander more than twenty years after. South-west of it was Potniæ, the residence of Glaucus, the son of Sisyphus, who was torn in pieces by his mares, which was the subject of one of the lost tragedies of Æschylus. \* South-west of Thebes above the Sinus

> - Glauci Potniades malis membra absumpsere quadrigæ.

Corinthiacus, was Thespiæ, at the foot of Mount Helicon, the celebrated abode of Apollo and the Muses, where was the fountain Aganippe, and the river Permessus. This was the Southern extremity of the Parnassian ridge, which is a chain of considerable length, running Northwest through Phocis also, as we shall see hereafter. About twenty stadia higher, was the verse-inspiring fountain of Hippocrene, said to have been made by the hoof of Pegasus. A part of this mountain was called Libethrus, a little North-west of Ascra, the birth-place of Hesiod, which is at the foot of Helicon. Hence the Muses are called Libethrides. \* The last place that we shall notice in Bœotia is Lebedæa, now Livadia, where was the celebrated cave of Trophonius, into which thevwho entered were never seen to smile afterwards. this city Bœotia has acquired the modern name of Livadia; a little North-west is the pass of Daulis, where Laius was killed by Œdipus.

West of Bæotia is Phocis, bounded by the Sinus Corinthiacus on the South. At the first bend of this gulf to the North was the peninsula of Anticyra, celebrated for its hellebore, the great remedy for madness among the antients. The second bend is called the Sinus Crissæus, from the city of Crissa at its top. A little North of which is the renowned city of Delphi, and above it Mons Parnassus, sacred to Apollo and the Muses, at the foot of which was Fons Castalius, whence the Muses are called Castalides. Delphi was also called Pytho, from the serpent of that name, which was killed by Apollo, in honour of whom the Pythian games were

celebrated every fifth year. Parnassus had two summits, the one consecrated to Apollo, the other to Bacchus: whoever slept on Parnassus either became an inspired poet or mad. \* Delphi is now called Castri, and the summit of Parnassus is called Lakura, from the antient name of Lycorea; it is so high as to be seen from the Acropolis of Corinth, eighty miles distant. North-east of Delphi was the Corycian cave, also sacred to the Muses, and, still North-east, the city of Elatea, now Turco-corio, or rather Elcuta, at the junction of Mounts Cnemis and Œta, the largest city in Phocis, the unexpected surprise of which by Philip produced a shock at Athens, so finely described by Demosthenes in his famous oration De Corona. Nearly due North of Delphi, on the other side of Parnassus, was Tithorea, now Velitza.

North-east and South-west of Phocis are the Locri, divided into the Locri Ozolæ, to the South-west, the Locri Opuntii and Locri Epicnemidii, to the North-east. The Locri Ozolæ were said to be so called from the poisoned arrows of Hercules having been buried in their district by Philoctetes, from which a mephitic vapour arose. They occupy a narrow slip of land, broadest at the Eastern end near Phocis, and extending along the Sinus Corinthiacus to its narrowest point. Their principal city was Amphissa, now called Salona, whence also the Sinus Crissæus is now called the Gulf of Salona. Near the narrowest point or entrance of the Sinus

Hence Persius -

Nec in bicipiti somniasse Parnasso

, Memini ut repente sic poeta prodirem.

Corinthiacus was Naupactus, a celebrated naval station, the possession of which was often contested between the Locrians and their more powerful neighbours, the Ætolians, who ultimately gained it. It is now called Enebect or Lepanto, giving its name to the Corinthian Gulf; a little West of which, at the very narrowest point of the Gulf, where it is not above three quarters of a mile wide, was Antirrhium, opposite to Rhium in Achaia. two promontories, being fortified with castles, have been called the Dardanelles of Lepanto. North-east of Phocis were the Locri Opuntii, so called from their principal town Opus, situated near the Northern extremity of Bœotia, on the Sinus Opuntius: and nearly North of them were the Locri Epicnemidii, also a small tribe, so called from their vicinity to Mount Cnemis. Their principal town was Thronium, probably now Bodonitza, and in their extreme Northern point is the famous pass of Thermopylæ, on the Sinus Maliacus, having impassable mountains on the West, with the sea and morasses to the East. It was only twenty-five feet broad in its narrowest part. Here was the memorable stand made by Leonidas and his three hundred Spartans, who all perished but two, against Xerxes and the Persian host, amounting, according to those who take the utmost number, to five millions. This battle began Aug. 7. B.C. 480, Ol. 75. 1. and lasted three days, and was only lost at last by the treachery of the Thessalians\*, who betrayed the passes over Mount Œta.

<sup>\*</sup> A traveller through Wales can hardly fail to remark the great similarity between Penmaenmawr and Thermopylæ, and between Snowden, with its forked head and sacred spring (Ffynnon-Oer), and Parnassus.

On the North-western side of Phocis is a little district called Doris, in which springs the river Cephisus. It had but four inconsiderable cities, Lilæa, Erineum, Citineum, Boium, whence it is called Tetrapolis; but it was the mother of many Grecian states and colonies, as we have already observed.

West of Locris, Phocis, and Doris, was Ætolia, now called Vlakia, from the Valaques\*, settled there by the Greek Emperors, having the Sinus Corinthiacus for its Southern, the river Achelous for its Western, and Thessaly for its Northern boundary. The alliance formed between the Romans and Ætolians, B.C. 214, A.U.C. 540, and their subsequent desertion of the Romans for Antiochus, King of Syria, was the cause of the subjugation of Greece. On the river Evenus, now the Fideri, a little above the Sinus Corinthiacus +, West of the straits of Rhium, was Calydon, the country of Meleager, and the scene of the Calydonian boar-hunt, described by Ovid. Met. VIII. 260, &c. and a little North-west of it, towards the river Achelous, was Mount Aracynthus. The chief city of Ætolia was in the interior, called Thermus. The river Achelous now called Aspro Potamo, or the White River, is celebrated for a contest between the river god, in the shape of a bull, and Hercules, who tore off one of his horns, which he gave to the Goddess of Plenty for a cornu copiæ, a\*fable, the application of which is obvious to the draining of the neighbouring

<sup>\*</sup> The name still remains in Walachia. Vlach, in the Illyrian tongue, signifies a herdsman.

<sup>+</sup> The Sinus Corinthiacus commenced from the mouth of the river Achelous.

land and one branch of the river. At its mouth are a number of small islands, formed by depositions of earth and sand, called the Echinades.

West of Ætolia is Acarnania, still called Carnia. Near to the mouth of the Achelous, is the city of Œniadæ, and considerably North-west of it are the islands called the Teleboides, and the island of Leucadia, or St. Maure, formerly a peninsula called Neritos. The extreme South-western promontory of Leucadia was called Leucate, where was a temple of Apollo, and the celebrated rock from which disappointed lovers sought either death or a cure by leaping into the sea. The poetess Sappho was one of the most celebrated adventurers of the lover's . leap, on account of her fruitless passion for Phaon. North of Leucadia was Anactorium, at the entrance of the Ambracian Gulf, and within the Gulf, which, at its entrance, somewhat resembles the passage called the Sleeve, at the entrance of the Baltic, was the memorable city of Actium, the scene of the great battle between Antony and Augustus, which decided the fate of the Roman world, Sept. 2. B.C. 31, A.U.C. 723. Actium is still called Azio. The North-eastern part of Acarnania was called Amphilochia, from Amphilochus, the son of Amphiaraus and Eriphyle +, who having slain his mother, in revenge for having betrayed his father to the fatal Theban war, retired from his native country Argos, and built here a city of the same name, called for dis-

<sup>-</sup> Neritos ardua saxis.

Virg. Æn. III. 271.

<sup>† —</sup> Mæstamque Eriphylen Crudelis nati monstrantem vulnera cernit.

unction Amphilochium Argos; the country is still called Filoquia.

The remainder of Greece, above the countries already described, was divided into two great portions, Thessalia on the East, and Epirus on the West; though Epirus, especially towards the North, was hardly recognised as a genuine Grecian Stafe. Thessaly, in fact, extended over all the countries below, except the Northwest part of Acarnania, and was bounded on the South by the chain of Mount Œta, on the West by that of Pindus, on the North by that of Olympus and the Cambunii Montes, and on the East by the Sea. It contained several tribes or districts. On the confines of Ætolia and Phocis, above Doris, are the Ænianes; Eastward, towards the coast, was Phthiotis, still North-east, along the coast, Magnesia, and North of that, Pelasgiotis; in the North was Perrhæbia; in the North-western angle, the Æthices; below these, along the Western side were Estiæotis, Aperantia, and Dolopia; in the centre, Thessaliotis.

The Sinus Maliacus, so called from the little city of Malia, is now the Gulf of Zeiton, so called from the town of Zeiton, antiently perhaps Trachis, or Trachinia, called also Trachinia Heraclea, the scene of one of the tragedies of Sophocles on the death of Hercules, who

burnt himself on a funeral pile raised on the neighbouring Mount Œta. Above this, the river Sperchius flows into the Maliac Gulf: the beauty of its banks is celebrated by Virgil. On this river was the city Hypata, or Neopatra, celebrated for the skill of its inhabitants in magic +, in which the Thessalians were proverbially thought to excel. Near the mouth of the Sperchius is another Anticyra, equally famous for its hellebore, and above it Lamia, on the river Achelous, where Antipater was besieged by the Athenians after the death of Alexander, B.C. 323, Ol. 114. 2., but at last escaped, and compelled the Athenians to beg a peace, and give up Demosthenes, who poisoned himself to avoid falling into his hands. At the entrance into the Sinus Pagasius, or Pelasgicus, now the Gulf of Volo, we find Aphetæ, now Fetio, from which the ship Argo is said to have taken her departure for Colchis. Proceeding along the coast a little inland is the Phthiotic Thebes, and above it is the river Amphrysus, on whose banks Apollo is said to have fed the herds of Admetus king of Pheræ. ‡ North-westward, but considerably inland, is a city called Thaumacia, from the beauty of its situation, now Thaumaco. The river Onchestus, which rises a little beyond the lake Bæbeis, flows into the Northern extremity of this

gulf, and at the top of the gulf was the city of Pagasæ, giving name to it, and Demetrias, or Volo, built by Demetrius Poliorcetes. Here were also two promontories, preserving the memory of the great Thessalian Deluge, in the names of Pyrrha and Deucalion. the junction of the Onchestus and a little stream called the Anaurus, was Pheræ or Pheres, and near the mouth of the Onchestus was Iolcos, the country of Jason, in the district of Magnesia, whence the Argo is called Magnesian by Ovid.\* And on the Ægean side of the Chersonese, formed by the gulf and the Ægean, is the city of Magnesia, above which was the promontory of Sepias, now Cape St. George, where the fleet of Xerxes suffered greatly from shipwreck. From this promontory all along the coast to the North of Thessaly stretch the ranges of mountains, Pelion, Ossa, and Olympus.+ Between the two last flows the Peneus, or Salampria,

Cur unquam Colchi Magnetida vidimus Argo.

Ov. Mcd. Jas. V. 9.

† Here we may remark the excess of critical refinement in those commentators who compare Homer's ladder of the giants with Virgil's, and give the preference to the more judicious arrangement of the former. For, say they, Homer places Olympus at the bottom, Ossa on Olympus, and Pelion on Ossa; Virgil uses the contrary order—

Ter sunt conati imponere Pelio Ossam Scilicet, atque Ossae frondosum involvere Olympum:

Georg. I. 281.

which makes a pyramid resting on its point, Pelion being the least, and Olympus the greatest of these mountains. The fact is, Homer enumerates them in their direction from the North, or highest, to the South, or lowest point; Virgil, an Italian, who lived South of them, and would naturally visit the Southern point first in his journey thither from Athens, enumerates them in the order in which they would present themselves to his view.

through the celebrated vale of Tempe, the beauty of which was proverbial among the antients. It is about five miles long, but in general very narrow, in many places not above an acre and a half in breadth. See Ælian, Var. Hist. III. 1. West of Tempe, the Titaresius flows into the Peneus, without mingling with it, a fact noticed by Homer and other writers; and still West, but on the river Peneus, is Larissa, the principal city of Thessaly, which retains its name. In the North of Thessaly was Azorus, now Sorvitz, and North-west of it, Oxynia. South of this is Gomphi, and below it Tricca, now Trikala. To the East, about the middle of Thessalia, on the river Enipeus, is the plain and city of Pharsalia, the memorable scene of the decisive battle between Cæsar and Pompey, May 12, B. C. 48, A.U.C. 706, in which Cæsar obtained the empire of the Roman world. Below it is Hellas, preserving the name which was afterwards common to all Greece.

West of Thessalia was Epirus, now part of *Albania*, comprising, in the South, Molossia, above which, on the Western shore, is Thesprotia, and above it Chaonia, and, still North, Orestis.

On the Sinus Ambracius, or Gulf of Arta, was Ambracia, the royal city of Pyrrhus and his descendants. Opposite the promontory of Actium, on this gulf, was Nicopolis, a city built by Augustus on the site of his camp, in honour of his decisive victory. North-west, in Thesprotia, was the lake called Palus Acherusia, into which two rivers flowed, the Cocytus and Acheron, and

still North-west the river Thyamis, where Cicero's friend, Atticus, had a country seat called Amaltheum. North-west of this was Buthrotum, now Butrinto, and above it Panormus, now Panormo; above which is Oricum and the Acro-Ceraunian Mountains \*, so called from their abrupt summits being often struck by lightning. They were remarkable for attracting storms, and dreaded by mariners on this account. In the interior of Epirus was the celebrated grove and oracular or vocal oaks of Dodona, sacred to Jupiter. It was on Mons Tomarus, on the confines of Thesprotia and Molossia.

Extending over Thessaly and Epirus, from the Ægean to the Ionian Sea, was Macedonia, (Pl. IX.), in its utmost limits as a Roman province; but the Western part of Macedonia, above Chaonia, was, more strictly speaking, part of Illyricum, now Albania. The pure Greeks affected to disclaim the Macedonians and part of the Epirots; and Demosthenes always discriminates, in very pointed terms, between the Macedonian upstart Philip and the Greeks, especially the Athenians, who claimed their descent from remotest antiquity, and wore golden grasshoppers in their hair, to mark their aboriginal extraction. The splendid victories of Philip and Alexander subdued somewhat of this

Ille flagranti
Aut Atho, aut Rhodopen, aut alta Ceraunia telo
Disjicit. Virg. Georg. I. 331.

Infames scopulos Acro-Ceraunia.

Hor. Od. 1. 3.

haughty spirit among their Southern neighbours. Macedon was bounded on the South by Thessalia, on the East by Thracia, on the North by Mæsia and Dardania, and on the West by Illyricum. It was possessed by several tribes, whose situations are not very correctly known.

In the North-eastern part was Pæonia, in the Northwestern Pelagonia; along the central part was Sintica, bordering on Thrace, South-west of this, Mygdonia and Æmathia, and West the Lyncestæ and Eordani; along the Southern boundary, to the East, was Edonis, bordering on Thrace, South-west of it Chalcidice, lying between the Sinus Strymonicus and Thermaicus. Within the Sinus Thermaicus, on the South-east, was Pieria, bordering on Thessaly, and to the South-west Elymiotis. Immediately above Thessalia, on the Sinus Thermaicus, now the Gulf of Saloniki, was Dium, now Stan-dia, according to a corruption already noticed; above it was the river Haliacmon, and above it Pydna, now Kitra, so frequently mentioned in Demosthenes, and memorable also as being the place where Olympias, the mother of Alexander, was besieged and put to death by Cassander, and where the decisive battle was fought between the Romans, under the conduct of Paulus Æmilius, and Perseus, the last King of Macedon, June 22. B.C. 168, A.U.C. 586, which ended in the overthrow of Perseus, and the reduction of Macedonia to the form of a Roman province. Above Pydna was Methone, now Leuterochori, also memorable in the contentions between Philip and the Athenians, and the scene of his first victory over them, B.C. 360, Ol. 105, 1. A little North-west of the top of the Sinus Thermaicus (Pl. X.) is Pella \*, the royal city of Macedon; its ruins are still called Palatiza, or the Little Palace. It was situated on a lake communicating by a smaller stream with the Axius, or Vardari. the greatest of the Macedonian rivers, which falls into the Sinus Thermaicus. Somewhat South-west of Pella was Berœa, now Cara Veria, a city which has merited the eulogium of St. Paul for the docility and ingenuous disposition of its inhabitants (see Acts xvii. 10., &c.); and North of it was Æge, or Edessa, the antient royal city, now called Vodina. At the North-eastern extremity of the Sinus Thermaicus, was the city of Therma, which gave name to it, afterwards called Thessalonica, and now Saloniki, a city well known from the preaching and epistles of St. Paul. The district between the Sinus Thermaicus and Strymonicus we have already said was called Chalcidice. The lower part of it formed three peninsulæ. The first, contained between the Sinus Thermaicus and a smaller gulf called the Sinus Toronæus, now the Gulf of Cassandria, was called Phlegra, or Pallene. At its entrance was the city of Potidæa, so celebrated in the orations of Demosthenes; it was founded by the Corinthians, taken by the Athenians, and taken from them by Philip, and by him given to the Olynthians. It was afterwards called Cassandria, from Cassander, which name it still bears. At the top of the Sinus Toronæus, a little North-east of Potidæa, was Olynthus, the scene of so many contests between Philip and the Athenians:

Hence Alexander is called the Pellæan youth:

Unus Pellæo juveni non sufficit orbis.

Juv. Sat. X. 168.

And as Pella was in Æmathia, and Æmathia the most distinguished province of Macedonia, it is often put for the whole country.

the cause of its inhabitants was pleaded in the Olynthian orations of Demosthenes. A little North-east of Olynthus is Chalcis, giving name to the district. The next gulf was called the Sinus Singiticus, or Gulf of Monte Santo, and the peninsula contained between it and the Sinus Toronæus, was called Sithonia. On the Western side of this peninsula was Torone, or Toron, which gave name to the Sinus Toronæus; and on the Eastern was Singus, giving name to the Sinus Singiticus. In the third and last peninsula, called Acta, between the Sinus Singiticus and Strymonicus, or Gulf of Contessa, was the celebrated mountain Athos, now called Monte Santo, from the number of religious houses there. The Southern promontory of Athos was called Nymphæum, the Eastern Acro-Athos. A narrow tongue of land which connects the North-west of Athos with the continent. near the cities of Acanthus, on the East, and Sana, on the West, was the spot so memorable for having been dug through by Xerxes, to afford a passage for his fleet, and save it from doubling the dangerous promontory of Acro-Athos. Above this on the Sinus Strymonicus, is Stagyra, now Stauros, the birth-place of Aristotle, who is hence called the Stagyrite, near to which was the tomb of Euripides. The river Strymon flows into the Northern extremity of the Sinus Strymonicus, separating Macedonia from Thrace. At its mouth was the city of Amphipolis, another of the causes of contention between Philip and the Athenians, as also between the Athenians and Spartans, for it was an Athenian colony. also called Ennea Hodoi, or the nine ways, because Phyllis, who had been deserted by Demophoon, made nine journeys here to watch for his return; and it was predicted that the Athenians should suffer here as many

defeats. It is now called Iamboli. It is unnecessary to mention many of the obscure and inconsiderable towns in the interior and North of Macedonia. In the central parts (Pl. IX.) were Heraclea, North-west of Pella, and Northwards of this, Stobi; and to the South-west of this was Lychnidus, now Akrida, in the district of the Lyncestæ. The Western coast of Macedonia, above Epirus, we have already said, was properly Illyricum. Immediately above Epirus was Apollonia, now Polina, on the river Aous, or Lao; and North of it Epidamnus, afterwards called Dyrrachium, which was greatly frequented by the Romans, as being nearly opposite to Brundusium, in Italy. We may call the latter the Dover, and the former the Calais, of antiquity. The rest of the Eastern shore of the Adriatic was occupied by the Illyrica gentes, or Illyricum, already described.

East of Macedonia was Thracia, now, together with the upper part of Macedon, called Roumelia, which, though a barbarous country in the interior, had many Greek colonies on the coast. But the geography of Thrace, as well as Macedonia, is by no means accurately ascertained. It was separated from Macedonia by the Strymon and the ridge of Mount Pangæus and Mount Rhodope \* on the West, from Mæsia by Mount

· Flerunt Rhodopeiæ arces, Altaque Pangæa, et Rhesi Mavortia tellus, Atque Getæ, atque Hebrus, et Actias Orithyia. Hamus on the North; on the East was the Euxine, and on the South was the Ægean Sea.

The principal nations of Thrace were the Bessi, a very savage people, in the North-west, and the Mædi below them, in the South-west, at the top of the Ægean; their maritime parts were inhabited by the small tribes of the Bistones and Ciconii. In the centre were the Odrysæ, in the South-east the Pæti, and in the North-east the Astæ. We have considered the Strymon as the Eastern boundary of Macedonia, but in its utmost extent it reached as far as Mons Pangæus and the river Nessus, or Mestus, now Mesto, which flows into the Ægean a little East of the island of Thasus; the Strymon, however, is the more antient and natural boundary.

East of Amphipolis was Philippi, the celebrated scene of the defeat of Brutus and Cassius by Antony and Augustus, B.C. 42, A.U.C. 712. The poet Horace was a tribune in the vanquished army †, but afterwards found a more congenial and more profitable employment in the service of the muses and his patron Mecænas. This city is also well known in the travels and epistles of St. Paul. At the mouth of the river Nessus was Abdera, the birth-place of the philosopher Democritus. East-

Quod mihi pareret legio Romana tribuno.
 Hor. Sat. I. 6. 58.

——— Philippos et celerem fugam Sensi, relicta non bene parmula. Hor. Od. II. 7. 9.

ward are Maronea, Mesembria, Sarrum, or Serrhium, and Ænos, now, respectively, Marogna, Miseira, Saros, and Eno. Ænos is at the Eastern mouth of the river Hebrus, now the Maritza. Inland, on the Western side of the Hebrus, was Scapta-hyla, or, as Lucretius calls it, Scaptesula \*, where Thucydides, who had some gold and silver mines there in right of his wife, retired, after his banishment from Athens, to write his History of the Peloponnesian War; it is still called Skepsilar. The river Melas runs into the small gulf called Melanis Sinus, at the top of which was the city of Cardia, destroyed by Lysimachus when he founded the city of Lysimachia, a little South of it: it was afterwards called Hexamilium. now Hexamili, because the isthmus is six miles across. The peninsula contained between the Melanis Sinus and the Hellespontus was called the Chersonesus Thracius, of which we have frequent mention in Demosthenes. The Hellespontus, which was so called from Helle, the sister of Phryxus, who was drowned there, is now called the Straight of the Dardanclles. The town of Sestos was on its Western or European shore, nearly opposite to Abydos, on the Eastern or Asiatic: this was the place where Xerxes built his famous bridge of boats, and where Leander was drowned in swimming from Abydos in the night to visit his mistress Hero, who was priestess of Venus here. It is now called Zermunic, and is the first place that was seized by the Turks in passing from Asia to Europe. Above it is the fatal little stream of Ægos Potamos, where the Athenian fleet was totally defeated by Lysander, Dec. 13. B.C. 405, Ol. 93, 4., which put an end to the Peloponnesian war. Still North is Callipolis. now Gallipoli. At the North part of the Hellespont the sea widens again, and was antiently called the Propontis, because it was before the Pontus Euxinus, or Black Sea; it is now called the White Sea, or Sea of Marmora, From the little island of Proconnesus, now Marmora, which it contains. At its North-western angle was Bisanthe, or Rhædestus, now Rodosto. About one-third along the Northern coast was Perinthus, afterwards Heraclea, now corrupted into Erekli, from which a wall, called Macron Tichos, was built across to the Euxine by the Emperor Anastasius. East of it was Selymbria, now Selibria; and at its North-eastern extremity, called from its beauty Chrysoceras, or the Horn of Gold, was the renowned city of Byzantium, fixed on by Constantine the Great as the seat of the Roman Empire, A.D. 330, and from him called Constantinople, a name which it has always preserved, though, by a familiar corruption already noticed, it is called, by the Turks, Estamboul. \* That part of the city which was the antient Byzantium is now the seraglio. The Turkish sultan, Mahomet the Second, took Constantinople, May 28. A.D. 1453, and it has ever since been the seat of the Turkish empire. On this occasion many of the captive Greek inhabitants fled into Italy and the West; and this event, with the invention of printing, which was nearly contemporary, may be considered as instrumental, under Providence, to the restoration of learning and pure religion in the world. A very narrow strait, antiently called the Thracian Bosphorus, now the Channel of Constantinople, connects the Propontis with the Pontus Euxinus, or Black Sea, which it enters near

<sup>&#</sup>x27;Ες τὰν πόλιν.

some well-known rocks, antiently called the Cyaneæ, or Symplegades \*, which, from their appearing more or less open or confined, according to the course of the vessel, were said by the poets to open and shut upon the ships which entered, and crush them to pieces; the Argo had a narrow escape, as we are told by Apollonius Rhodius, with the loss of her rudder. Proceeding along the North coast of the Euxine we find Halmydessus or Salmydessus, a place celebrated for its shipwrecks; it is still called Midjeh. A little above it is Bizya, the residence of Tereus, the husband of Procne. Above it is the promontory of Thynias, whence came the Thyni, who settled afterwards in Asia, and gave name to Bithynia. Above it, was Apollonia, afterwards Sozopolis, now Sizeboli: above it, at the North-eastern extremity of Thrace, was Hæmi-extrema, now Eminch-borun; and almost at the North-western extremity was Philippopolis, so called from Philip, the father of Alexander, which preserves its name. In the centre was Adrianopolis, or Adrianople, near the confluence of the three rivers, the Hebrus, Tonsus, and Ardiscus, by whose waters Orestes was purified from the pollution of his mother's blood, whence the place was formerly called Orestias.

Compressos utinam Symplegades elisissent.

Ovid. Epist. Her. Med. Jas. 119.

† Lamprid. in Elagab.

## CHAPTER X.

# GRECIAN ISLANDS.

## A.G. Plates XII. XIII.

These we shall describe, beginning from the North of the Ægean Sea, or Archipelago, along the coast of Greece; and afterwards those on the coast of Asia Minor. South-west of the mouth of the Hebrus (Pl. XII.) was the island of Samothrace, or Samothraki, remarkable for the sanctity of its asylum, and the mysterious worship of four deities called the Cabiri. Its reputation even continued to the time of Juvenal. \* Below it was Imbrus, or Imbro, where also the same deities were worshipped. North-west of Samothrace, and a little West of the mouth of the river Nestus, was Thasos,

\_\_\_\_ Jures licet et Samothracum
Et nostrorum aras. \_\_\_\_

now Thapso, remarkable for its fertility, its wines, and its marble quarries. South-west of Imbrus, and about midway in the Ægean sea, between the coast of Greece and Asia Minor, was the island of Lemnos, fabled to have received Vulcan when he fell from heaven, who is therefore called the Lemnian god. It is now called Stalimine, according to a corruption which we have frequently noticed. Lemnos was infamous for the massacre committed by the Lemnian women on their husbands and all the male inhabitants of the island, a full account of which is given by Valerius Flaccus, in the second book of his Argonautic expedition. Its principal town was Myrina, now Palæocastri, in whose forum was the famous statue of the ox, made by Myron; the back of which, at the winter solstice, was overshadowed by Mount Athos, though 87 miles distant. South-west of Lemnos was the small island of Peparethus, or Piperi; and South-west of it Halonesus, or Dromo. Westward of which, off the coast of Magnesia, were the islands of Scopelos and Sciathos, which keep their names. South of these, below the Maliacus Sinus, was the large island of Eubœa, lying along the coast of Locris, Eccotia, and Attica. Opposite to Aulis, in Bœotia, the channel between the continent and the island of Eubœa is very narrow, and receives the name of Euripus. Chalcis, one of the principal cities of Eubœa, was opposite to Aulis; from a corruption of Euripus, it is now called Egripo; and then corrupted by mariners into Negropont. The next principal city in Eubœa was Eretria, now Gravalinais, a little below Chalcis. At the South extremity of Eubœa are two celebrated promontories; the Western, called Carystus, now Caristo, remarkable for its fine marble quarries; the

other, on the Eastern, or Ægean side, called Caphareus \*, memorable for the shipwreck of the Grecian fleet on their return from Troy. At the Northern extremity of Eubæa was Istiæa, or Oreus, now Orio. This part of the coast of Eubœa was called the Artemisium littus. East of this part of Eubœa was the island of Scyros, or Skyro, where Achilles was brought up in the court of Lycomedes, disguised as a female, to avoid being sent to the Trojan war. Below Eubœa, inclining towards the East, we find a cluster of islands, called the Cyclades. island nearest to Eubœa is Andros, or Andro; and below it Tenos, or Tine, which is separated from it only by a narrow channel. A little to the West, lying as it were between Andros and Tenos, is the little island Gyarus +, or Joura, where the Roman exiles were sent; and a little South-west of Tenos is Syros, or Syra. West of Tenos. off the coast of Attica and promontory of Sunium, is Ceos, or Zia; a little South-east of which is Cythnus, now Thermia; and a little below it is Seriphus, now Serpho. South-east of Seriphus is Siphnus, or Siphanto; and South-west of Siphnus is Cimolus, now Argentiera, and Melos, or Milo. East of Melos are the inconsiderable islands of Pholegandros, Sicinos, and Ios, now Polecandro, Sikino, and Nio. Below Ios is Thera, or Santorin, whose inhabitants colonized Cyrene, in Africa; East of which is Anaphe, or Namphio; and North-east of it

Scit triste Minervæ
Sidus, et Euboïcæ cautes, ultorque Caphareus.

Virg. Æn. XI. 260.

<sup>†</sup> Æstuat infelix angusto limite mundi Ut Gyaræ clausus scopulis parvaque Seripho.

Astypalæa \*, or Stampalia. North-west of Astypalæa is Amorgus, now Amorgo; North-west of which is Naxos †, now Naxia, celebrated for its worship of Bacchus; and adjoining it to the West was Paros, and the smaller island of Olearos, or Antiparos, which retain the names of Paro and Antiparo: this was the celebrated region of the finest white marble. ‡ Above Paros was the small but celebrated island of Delos, the birth-place of Apollo and Diana; it was held so sacred, that all sick persons were transported to the neighbouring island of Rhenea, lest it should be polluted by their death. On the opposite or North-eastern side, was the island of Myconus, or Myconi. Thus we may see that the Cyclades were spread in a semicircular form round Delos, as the centre, whence they derive their name.

The antient names of Delos were Asteria and Ortygia, the latter being derived from the number of quails which frequented the island. The antients believed the island to have been moveable formerly, and carried about by the waves, but that when Apollo was born there it became fixed. §

Virg. Æn. III. 73.

Below the Cyclades, was the great island of Crete, now Candia, renowned among the antients as having been the birth-place of Jupiter. The Western extremity of Crete was a promontory called Criu Metopon, or the ram's forehead, now Crio; its Eastern was called Samonium, now Salmone; its Northern was called Cimarus, now Spada. About the centre of Crete was the celebrated Mount Ida \*, where Jupiter was nursed, whence came the worship of Cybele, and the priests called the Curetes, or Idæi Dactyli. On the Northern coast, towards the Western end of the island, was Cydonia, now Canea. The Cretans were celebrated archers, and the Cydonians +, were the best, or most esteemed among Towards the Eastern part, where the shore bends to the South, was the city of Gnossus, the kingdom of Minos, so celebrated for his justice as to have been made one of the judges in the infernal regions: with this place we shall, of course, associate the names of Ariadne, Theseus, Dædalus, the labyrinth, and Minotaur. South of it was Lyctos, now Lassite. Dicte ‡ was a mountain at the Eastern extremity of the island, sometimes giving name to the whole island. In a cave of this mountain

> Creta maris magni medio jacet insula ponto, Mons Idæus ubi, et gentis cunabula nostræ.

† — Dictæa negat tibi Jupiter arva.

Virg. Æn. III. 171.

Jupiter is said to have been fed by the bees with honey.\* Along the South shore, at the narrowest part of the island, Hiera pytna, is now Gira petra; West of which is Gortyna, near to which are said to be some ruins resembling a subterraneous labyrinth. Off the North shore of Crete is the little island of Dia, now Standia; and below the South shore is Gaulos, now Gozo of Candia, to distinguish it from the Gozo of Malta. North-west of Crete, and off the promontory of Malea, we find the island of Cythera, now Cerigo, sacred to Venus, who was supposed to have risen from the sea in its neighbourhood, and is hence called Cytherea.

Off the coast of Elis, on the Western side of Greece (Pl. XI.), is Zacynthus, now Zante; South of which are the islands of the Strophades †, now Strivali, so called because Calais and Zethus here turned back-from pursuing the harpies. Above Zacynthus, almost opposite the Sinus Corinthiacus, is Cephallenia, now Cefalonia; on the Eastern coast of which the city of Same still retains its name. The island of Ithaca (Pl. X.), lies to the Northeast of it, and is now called Theaki. Above these, off the coast of Thesprotia, lies the island of Corcyra, now Corfu. It was originally colonized by the Corinthians, and is memorable for having given occasion to the Peloponnesian wars, and for a dreadful sedition which prevailed there

<sup>————</sup> Pro qua mercede, canoros Curetum sonitus Corybantiaque æra secutæ, Dictæo regem superum pavere sub antro.

Virg. Georg. IV. 150.

during part of that war, which is finely described by Thucydides, in his third book. This island was called Phæacia by Homer, who describes the gardens and orchards of its king Alcinous.

We shall now proceed to describe the Grecian Islands adjoining the coast of Asia. \* A little below the Hellespont (Pl. XII.), off the coast of Troas, is a small island which keeps its name, Tenedos †, the fatal station to which the Grecian fleet retired for concealment while awaiting the result of their stratagem for the capture of Troy. Below it, off the coast of Mysia, is Lesbos, now called Mitylin, from Mitylene, its antient capital, on its Eastern coast. It was the birth-place of Sappho, and Alcæus. Above Mitylene, in the North-eastern extremity of Lesbos, was Methymna, now Porto Petera. Below Lesbos, off the coast of Ionia, was Chios, or Scio, one of the reputed birth-places of Homer, where his school is still shown ‡: the Chian and Lesbian

- \* Asia itself has not yet been described, but it is thought more convenient to commerate these islands in this place; and the section itself may be reserved, at the option of the teacher, for the conclusion of the chapter in Asia Minor.
  - † Est in conspectu Tenedos notissima fama Insula, dives opum Priami dum regna manebant, Nunc tantum sinus, et statio malefida carinis. • Huc se diversi, secreto in littore condunt, Nos abiisse rati, et vento petiisse Mycenas.

Virg. Æn. II. 21.

† The places which contended for the birth-place of Homer are enumerated in those well known lines —

Scptem urbes certant de stirpe insignis Homeri, Smyrna, Rhodos, Colophon, Salamis, Chios, Argos, Athenæ. Of these Chios and Smyrna have the best claim. I am not one of wines \* were antiently, and still are, in high repute. West of it is Psyra, now Ipsara. Below Chios, off the Southern extremity of Ionia, is Samos, which keeps its Juno + was worshipped here with peculiar honours. A little West of Samos was Icaria, now Nicaria. Below these, off the coast of Caria, are a number of scattered isles, called from that circumstance the Sporades. Below Icaria is Patmos, to which St. John was banished. Below it is Leros, which also keeps its name, and Calymna, now Calmina. Below this was Cos, a larger island, off the coast of Doris, now Stan Co, the birth-place of Apelles and Hippocrates. Below it. Nisyrus and Telos, are now Nisiri and Procopia; and under Doris, where the shore of Asia Minor turns to the East, is the celebrated island of Rhodus, or Rhodes, so well known in the history of the Grecians, Persians, Romans, and Mahometans. Its principal city was Rhodes, where was the celebrated Colossus of the Sun, the legs of which are commonly but falsely supposed to have stood on each side of the harbour, and admitted between them ships in full sail. It was the work of Charcs, the pupil of Lysippus, erected about 300 B.C., and

those who doubt his existence. The uniformity of plan and diction convinces me that the Iliad, with possibly a small exception, is the work of one man. The Odyssey is perhaps attributable to a different hand, and to a somewhat later but very early age.

<sup>†</sup> Quam Juno fertur terris magis omnibus unam Posthabita coluisse Samo, —

says Virgil, speaking of Carthage.

thrown down by an earthquake about 120 years after; in which state it continued till it was sold by the Saracens, after their conquest of Rhodes, A.D. 672, to a Jew, who broke it up, and loaded 900 camels with the brass. About midway between Rhodes and Crete, the island of Carpathus, now Scarpanto, gave name to the Carpathian In the Eastern part of the Mediterraneau, off the coast of Cilicia (Pl. XIII.), was the island of Cyprus, sacred to Venus. Its principal city was Salamis, towards the East, founded by Teucer\*, when banished by Telamon from the island of Salamis in the Sinus Saronicus; it was overwhelmed by the sea, afterwards rebuilt in the fourth century, under the name of Constantia, and is still called Constanza. A little below it is the present capital of Cyprus, called Famagosta, from the antient promontory of Ammochostos, or the sand-hill. west of this was Citium, now Cito, the birth-place of the great Stoic philosopher Zeno. South-west of which was Amathus; whence Venus, who was worshipped there, was called Amathusia. West of this was Curium, now Piscopia; and in the Western extremity was the much famed city of Venus, Paphos, now Limmgson Antica. On the Northern coast, Soli is now Solia, Lape-

thus Lapeto, and Chytrus Cytria; Idalium is thought to have been about the centre of the Eastern part of the island.

The Grecian Seas (Pl. XII.) were distinguished by various names: the Southern part of the Hadriatic, washing the Western coast of Greece, was called Mare Ionium; the sea between Crete and Africa was called Libycum; Pelagus; above Crete, Mare Creticum; between Crete and Rhodes, Carpathium Pelagus; near the island of Icaria, Icarium Mare ¶; between Attica and the Cyclades, Myrtoum Mare \*\*; all the rest of the Archipelago was called by the general name of the Mare Ægæum. The modern term of Archipelago is rather of moubtful and somewhat curious derivation. It is doubted whether Egio Pelago or Agio Pelago be the original modern term; the former a corruption of the word Ægæum, and the latter derived from the sanctity of the monasteries on Mount Athos and in the islands.

From one or the other of these, mariners are thought to have adopted the corruption of Archipelago, which having itself a manifest similarity to another Greek root, has been generally supposed to be derived from it. Even the most illustrious of geographers, D'Anville, to whom I owe so many obligations, falls into the vulgar error.

# CHAPTER XI.

#### ASIA MINOR.

#### Plate XIII.

The country which we call Asia Minor (a term not in use among the Antients, who called it simply Asia,) is now called Anatolia, or rather Anadoli, from ἀνατολή, the East. It comprises the provinces between the Euxine and Mediterranean Seas. Along the shore of the Pontus Euxinus, adjoining the Propontis, is Bithynia; next to which is Paphlagonia; and East of it Pontus, reaching to the river Ophis, where the shore of the Pontus Euxinus begins to turn to the North. Below the Eastern part of Bithynia and Paphlagonia is Galatia. South of the Propontis is Mysia, below it Lydia, and below Lydia is Caria. These three provinces lie along the Eastern shores of the Ægean, but their coasts

are chiefly occupied by Grecian colonies. Below the Hellespont, the coast of Mysia is called Troas, the celebrated scene of the Iliad of Homer. The South coast of Mysia and a little of the North of Lydia is called Æolis, or Æolia. The remaining coast of Lydia is called Ionia. There were also some Ionian cities on the coast of Caria; and the South-west coast of Caria was called Doris. East of Caria was Lycia; and East of Lycia, Pamphylia; with Pisidia to the North, and to the North-east Isauria and Lycaonia. East of Pamphylia was Cilicia. In the centre, East of Lydia, was the large province of Phrygia; and East of Phrygia was Cappadocia.

Bithynia was originally called Bebrycia: two Thracian nations, the Thyni and Bithyni, who settled there, gave it the name of Bithynia. It is separated from Mysia by the Rhyndacus on the West, and from Paphlagonia by the Parthenius on the East; on the North it is bounded by the Pontus Euxinus, and on the South by Phrygia and Galatia. On the Western frontier, the great mountain of Olympus gave the name of Olympena to the surrounding territory. At the foot of Olympus was the city Prusa, or Bursa, which gave the title of Prusias to the kings of Bithynia. One of this name was the betrayer of Hannibal to the Romans, who poisoned himself to escape falling into their hands, B.C. 183, A.U.C. 571. The next city we shall mention is Nicaea. now Isnik, on the banks of the lake Ascanius, Northeast of Prusa. Here was the famous General Council held under Constantine the Great, when the Nicene

Creed was drawn up, A.D. 325. North of Nicæa is Nicomedia, now called Isnickmid; and West of it, towards the Bosporus, is Libyssa, now Gebise, which derived its name from containing the tomb of the great African general, Hannibal. At the point where the Propontis begins to contract was Chalcedon, called the city of the blind, in derision for its founders having overlooked the more delightful and advantageous situation of Byzantium: it is now Kadikeui. Opposite to Byzantium, or Constantinople, was Chrysopolis, now Scutari. On the Bosporus was a celebrated temple of Jupiter Urius, the dispenser of favourable winds: it is now called Ioron. The Thyni, a Thracian nation, were settled on this part of the shore of the Euxine, extending from the Bosporus to the river Sangarius, or Sagaris, now the Sakaria. On the East of the Sangarius were the Mariandyni, in the North-eastern part of whose district was the powerful city of Heraclea Pontica, now Erekli; a small peninsular promontory to the North-west is called Acherusia, and it is said-that Hercules dragged Cerberus from hell through a cavern in this promontory. North-east of the Mariandyni are the Caucones, adjoining Paphlagonia.

Paphlagonia extends from the river Parthenius, or Partheni, to the great river Halys, now called Kizil-Ermak, or the red river.\* In the North were the Heneti, who are said to have passed over into Italy after the Trojan war, where they established themselves under

<sup>\*</sup> The river Halys was the boundary of the dominions of Cræsus King of Lydia, to whom the celebrated oracle was given, Κροῖσος Αλουν διαθάς μεγάλην ἀρχὴν καταλύσει, a line which might well have been applied to the late Emperor of France when he crossed the Vistula.

the name of Veneti. The principal cities were on the coast of the Euxine: Amastris, now Amastreh, and Cytorus, now Kitros; North-east of which was the Promontory of Carambis, now Cape Karampi, which we have noticed as opposite to Criu Metopon in the Tauric Chersonese; and just as the shore has bent downwards is Sinope, a celebrated Grecian colony, founded by the Milesians, and the birth-place of the philosopher Diogenes; it was the capital of Pontus in the reign of the great Mithridates, and is still called Sinub.

Under the Eastern part of Bithynia, and Paphlagonia, is Galatia. A colony detached from the great Gaulish emigration, under Brennus, B.C. 270, crossed the Hellespont, and settled themselves in the North of Phrygia and Cappadocia, where, mingling with some Grecian colonies, they caused the country to obtain the name of Gallo-Græcia, or Galatia; and, what is singular, they continued to speak the Celtic language even in the days of St. Jerome, 600 years after their emigration. On the confines of Phrygia and Bithynia was the city of Pessinus, originally Phrygian, and Mount Dindymus, remarkable for the worship of Cybele, hence called Dindymene+, whose image was brought from this place to Rome, with a remarkable miracle attending it‡, in the

Amastri Pontica et Cytore buxifer.

† Non Dindymene, non adytis quatit

second Punic war. A little East of Pessinus was Gordium, also originally in Phrygia, where Alexander cut to pieces the Gordian knot, respecting which there was an antient tradition, that the person who could untie it should possess the empire of Asia. Still East was Ancyra, now Angora, from whence the celebrated shawls and hosiery made of goats' hair were originally brought. Near this place Bajazet was conquered and made prisoner by Timour the Great, A.D. 1402. North-east of this, on the confines of Paphlagonia, Gangra, now Kankiari, was the residence of Cicero's friend, Deiotarus, one of the tetrarchs or princes of Galatia, in whose favour we have an oration of Cicero to the senate. This city, however, was also sometimes considered as one of the principal in Paphlagonia. It is not necessary to enter into the detail of the other cities in Galatia; but we may observe in proof of the Gaulish origin of the people, that the Northern part of them were called the Tectosages.

East of Paphlagonia and Galatia is Pontus, extending along the coast of the Euxine, from the mouth of the Halys to the Ophis. It was originally part of Cappadocia, and was formed first into a Satrapy, and then into an independent kingdom, about B.C. 300. Leaving the mouth of the Halys, the first important city we shall notice is Amisus, now Samsun, a Greek colony, aggrandised by Mithridates. The sea here forms a gulf called Amisenus Sinus, into which the river Iris flows, called now Jekil-Ermark, or the green river. Upon its banks, considerably inland, was Amasea, now Amasieh, the most considerable of the cities of Pontus, and the birth-place of the great Mithridates and Strabo the geographer. North of it was Magnopolis, built by Pompey the Great;

and below it, in a direction nearly South, was Zele, where Cæsar overcame Pharnaces, son of the great Mithridates, with such rapidity, that he wrote his account of his victory to the senate in those three famous words, "Veni, vidi, vici." North-east of Zele was Comana, now perhaps Almons, or Tocat, called Pontiea, to distinguish it from another of the same name in Cappadocia: both were celebrated for their temples, and college of priests, consecrated to Bellona, who was however worshipped by those oriental nations rather as the Goddess of Love than of War. North of it is Neo-Cæsarea, now Nik-Advancing towards the sea we find the river Thermodon, or Terme, which runs through the plains of Themiscyra, the antient residence of those warlike females the Amazons.\* East of this was Polemonium. now Vatija, built by Polemon, who was established in the kingdom by Marc Antony, and East of it was Cerasus, now Keresoun, from which Lucullus introduced the first cherries into Italy in the Mithridatic war. Considerably East of it, almost on the confines of Colchis, was Trapezus, or Trebisond, so famous antiently as the first Greek colony which received the 10,000 Greeks in their immortal retreat under Xenophon, and subsequently as the seat of Grecian Emperors, so well known in romance, and so little read of in history. South-east of Trapezus, above the banks of the river Ophis, (Pl. XVII.) was Teches, or Tesqua, now Tekeh, the mountain from which the troops of Xenophon had their first view of the sea, the account of which is so finely

· Cum flumina Thermodontis
Pulsant, et pictis bellantur Amazones armis.

described by him in the latter part of the fourth book of the Añabasis. The South-eastern part of Pontus was occupied by the tribes of Chalybes, or, as Strabo calls them, the Chaldæi.

Returning to the coast of the Ægean, (Pl. XIII.) the first province is Mysia, bounded by Bithynia on the East, the Propontis on the North, the Ægean on the West, and Lydia on the South. The Rhyndacus, often mistaken by modern travellers for the Granicus, separates it from Bithynia. Proceeding from thence Westward, along the shore of Propontis, we come to the island of Cyzicus, now a peninsula, which preserves its name; it was antiently a very flourishing city. A little West of it is the river Granicus, the famous scene of the first great battle between Alexander and the armies of Darius, May 22., B.C. 334., Ol. 111. 3., where 30,000 Macedonians are said to have defeated 600,000 Persians; it is now a torrent called Ousvola. The city of Lampsacus, now Lamsaki, is on the Hellespont. It was famous for the worship of Priapus, hence called the Hellespontian, or Lampsacan God.\* Alexander resolved to destroy this city on account of the vices of its inhabitants, but it was saved by the philosopher Anaximenes, who, knowing that Alexander had sworn to deny his request, begged him to destroy it. A little below is Percote, which was given by Artaxerxes to Themistocles, to maintain his wardrobe. Below it is Abydos, which we have already mentioned as nearly opposite to Sestos, but a little more to the South. South of it, towards the

mouth of the Hellespont, is the sacred plain of Troy, immortalized by the first and greatest of poets.' The coast of Mysia, between the Hellespont and the Promontory of Lectum, has received the names of Troas, from Troy, and, in its Northern part, Dardania, from the city of Dardanus, at the entrance of the Hellespont, which, though now destroyed, still gives to the Hellespont the name of the Dardanelles. Modern travellers very much differ in their accounts of this celebrated plain, and in the position they assign to the antient city of Troja, or Sir W. Gell, in his accurate and interesting survey of the Troad, accompanied with many beautiful and faithful coloured engravings, thinks he has discovered some vestiges of this most famous city near the village of Bounarbachi; but the fact probably is, that though some great and strong outlines, such as Ida, and the promontory of Rhætæum and Sigæum, may remain, the lapse of 3000 years may have caused so great a change in the general face of the country, as to have obliterated every vestige of the antient city, and even several of those minor features, which may be said to have outlived even nature herself in the immortal poem of Homer. Troy was more than once rebuilt under the names of Troja and Ilium, generally in a situation nearer the than the antient city is supposed to have occupied. stood between two rivers, the Scamander, or Xanthus, and the Simois, which formed a junction before they entered the Hellespont. The Simois rose in Mount Ida, a very lofty range of mountains East of Troy. The sources of the Scamander were hot and cold springs near Troy. The summit of Ida was called Gargarus. The Northern promontory of the shore, at the entrance of the Hellespont, was called the promontory of Rhætæum, and the

Southern that of Sigæum; between these the Grecian camp and ships were stationed. South of the island of Tenedos was Chrysa or Sminthium, where was the temple of the Sminthian Apollo, and the residence of his priest Chryses, the father of Chryseis. Below it is the promontory of Lectum, now called Cape Baba. South-east of it is Assus, now Asso; South-east of which was Antandrus, now Antandro. Inland, about the middle of the Troad, was Scepsis, memorable as being the place where the original writings and library of Aristotle were discovered, as we are told by Strabo, much injured by having been buried carelessly in a damp place by the descendants of Neleus, the scholar of Theophrastus, to whom Aristotle had left them, in order to preserve them from being seized by Eumenes, king of Pergamus, for his library: they were at length dug up and sold to Apellicon of Teios, for a large sum. North-east of \* Scepsis was the city of Zeleia, mentioned in Homer, and South-west of it the Hypoplacian Thebes, the birthplace of Andromache, which was occupied by a Cilician colony in the time of the Trojan war: a little below, the shore begins to turn to the South. The remainder of the coast of Mysia, and part of Lydia, to the river Hers \*, whose sands were mingled with gold, was called Lolia, or Æolis, being occupied, after the fall of Troy, by Æolian Greeks. Here is Adramyttium, or Adramitti, an Athenian colony, mentioned in the Acts, ch. xxvii. 2. Inland, South-east of Adramyttium, was Pergamus, now Bergamo, the capital of a kingdom which the Romans considerably enlarged in favour of Eumenes, after they had defeated Antiochus, king of Syria, and which was

<sup>\*</sup> \_\_\_\_ Auro turbidus Hermus.

left to the Roman people by Attalus, the last king, B.C. 133, A.U.C. 621. Here was the famous library founded by Eumenes in opposition to that of Ptolemy at Alexandria, who, from motives of jealousy, forbad the exportation of Egyptian papyrus; in consequence of which Eumenes invented vellum, called hence Pergamena. This library, having contained 200,000 volumes, was transported to Alexandria by Antony and Cleopatra. Pergamus is one of the churches mentioned in the Revelation of St. John, ch. ii. 11. Here also the great physician Galen was born. It stood on the banks of the Caicus, and its port Elæa is now Ialea. Between Adramyttium and Elæa were the cities of Lyrnessus, the original country of Briseis, Atarneus, and Pitane, the first of which is inland, the two others are on the coast; and a little below Elæa was the promontory of Cana, or Coloni, near which were the little islands called Arginusæ, where the Lacedæmonian fleet was completely defeated by the Athenians, B.C. 406, Ol. 93. 3., who afterwards ungratefully put their victorious generals to death.

Below the river Caicus was Lydia, called antiently Mæonia, having Mysia on the North, Phrygia on the East, Caria on the South, and the Ægean on the West. The coast of Lydia, nearly to the Hermus, or Sarabat, was called Æolis, and below the Hermus, having been occupied by Grecian colonies about B.C. 900, obtained the name of Ionia, the cities of which we shall first describe, before we give an account of the interior, or Persian part of it. Below the Caicus was Cyme, or Cumæ, the most powerful of the Æolian colonies, now affording but a few vestiges at a place called Nemourt a colony from hence founded the city of Cumæ, on the coast of

Campania, in Italy, the residence of the Cumæan Sibyl. Below it is Phocæa\*, . now Fochia, an Ionian colony, whose inhabitants deserted it, to avoid being subject to the power of Cyrus, and having sworn never to return till a mass of iron, which they sank, should rise to the surface, founded the city of Marseilles, in Gaul, about Below Phocæa was the celebrated city of 540 B.C. Smyrna, now called Ismur, one of the reputed birth-places of Homer, and a flourishing city of Anatolia. The little river Meles, which flows by Smyrna, has given to Homer the name of Melesigenes, he having been said to have been born on its banks; he is also called Mæonius +, from having been born in Lydia. Smyrna stands at the Eastern extremity of a Gulf called the Smyrnæus Sinus, which forms a peninsula, near the entrance of which is Clazomenæ, now Vourla, the birth-place of the philosopher Anaxagoras and other great men; North-west of it is Ervthræ, the residence of one of the Sibyls, opposite to the Island of Chios. At the Southern entrance of this peninsula was Teos, the birth-place of Anacreon, hence called the Teian bard, and below it Lebedus, which was ruined by Lysimachus, and continued so in the days of Horace. † Below it was Colophon, another of the cities

Velut profugit execrata civitas. Hor. Epod. XVI. 25.

I have reversed the order of the lines in Horace, for the convenience of shortening the quotation.

Hor. Od. IV. 9. 5.

Sed juremus in hæc; simul imis saxa renarint
 Vadis levata, ne redire sit nefas:
 Nulla sit hac potior sententia, Phocæorum

<sup>†</sup> Non si priores Mæonius tenet Sedes Homerus.

<sup>\*‡</sup> Scis Lebedus quid sit, Gabiis desertior atque Fidenis vicus. Hor. Epist. I. 11.6.

which contended for the birth of Homer: it was the native city of Mimnermus and Nicander. The Colophonian cavalry generally turned the scale on the side on which they fought: hence Colophonem addere became a proverb for putting an end or finish to a business, and in the early periods in the art of printing, the account which the printer gave of the place and date of the edition, being the last thing printed at the end of the book, was called the Colophon. Below Colophon, on the banks of the Cayster, was the renowned city of Ephesus, celebrated for its temple of Diana, one of the wonders of the antient world. It is now a mass of ruins, under the name of Aiosoluc, a corruption of Agio-Tzeologus, the modern Greek epithet for St. John the founder of the church here. It is almost unnecessary to add, that this city is memorable in the writings and travels of St. Paul, and is the first of the churches mentioned by St. John in the Revelation, ch. ii. 1. The Cayster flowed through a marsh called the Asian marsh, much frequented by water fowl \*, and mentioned by Homer and Virgil: this river is now called the Kitchik-Minder, or little Maan-Below Ephesus, inland, was Magnesia on the Mæander, to be distinguished from another city of the same name near Mount Sipylus, in the inland parts of Here Themistocles died, B.C. 449, Ol. 82. 4... Lvdia. West of it, and opposite the island of Samos, is Mount Mycale, so celebrated for the defeat and destruction of the Persian fleet by the Grecians, Sept 22, B.C. 479, Ol. 75. 2., on the very same day that their land army,

Virg. Georg. I. 383.

<sup>\*</sup> Jam varias pelagi volucres, et quæ Asia circum Dulcibus in stagnis rimantur prata Caystri.

under Mardonius, was defeated at Platææ. At the foot of this mountain was Priene, the birth-place of Bias, one of the seven contemporary sages of Greece. The river Mæander, so celebrated for its windings, is the boundary of Lydia and Caria. We shall now quit the Ionian coast of Lydia, and take a short view of the interior, or Persian part. Beginning at the North, nearly East of Cume, is Thyatira, one of the churches mentioned in the Revelation of St. John. ch. ii. 18, now Ak-hisar; South of which is Magnesia, or Magnisa, where the Romans gave a signal defeat to Antiochus King of Syria, A.U.C. 564. B.C. 190. This Magnesia is called Magnesia Sipyli, or Magnesia at the foot of Mount Sipylus, to distinguish it from the other Magnesia ad Mæandrum, now Guzel Hissar. Mount Sipylus was the residence of Niobe, hence called Sipyleian \*; it is on the Southern side of the Hermus. Nearly East of it was Sardis, the capital of Lydia, and royal residence of Crossus +, the last and proverbially rich King of Lydia, who was taken by Cyrus, B.C. 548, Ol. 58.1. Sardis was at the foot of Mount Tmolus, now Bour-dag, or the cold mountain, and watered by the river Pactolus, whose sands, like those of the Hermus, were mingled with gold. It is one of the churches mentioned in the Revelation of St. John, ch. iii. 1, and is now a small village, called Sart.

> Nec tantum Niobe bis sex ad busta superba Solicito lachrymas depluit e Sipylo.

> > Propert. II. 20. 7.

Hor. Fpist. I. 11. 1.

Quid tibi visa Chios, Bullati, notaque Lesbos, Quid concinna Samos? quid Crœsi regia Sardis? Smyrna quid et Colophon? majora minorane fama?

South of Sardis, near the confines of Caria, a little North-east of the Mæandrian Magnesia, was Tralles, antiently a strong city, but now only a small place called Sultan-hisar. South-east of Sardis, towards Phrygia, was Philadelphia, now Allah Shehr, another of the Seven Churches, Rev. iii. 7, which, together with Sardis and ten more of the principal cities of Asia, was overwhelmed by an earthquake, in the reign of the Emperor Tiberius, A.D. 17. A great tract of this and the adjoining country of Phrygia was called Catakekaumene, or the burnt country, in consequence of these frequent earthquakes and subterranean fires.

Caria is separated from Lydia by the Mæander, and is bounded on the West by the Ægean, on the South by the Mediterranean, and on the East by Phrygia and The inhabitants of Caria were proverbially considered as barbarous and despicable among the Greeks, and the name of Carian was synonymous to that of slave. The name of Ionia was continued to the Northern part of the coast of Caria, and here we find the city of Miletus, once a great and flourishing state, which sent out many colonies, and had a leading influence in the Ionian affairs, but its actual site is now unknown, except that it must be somewhat inland, the sands brought down by the river Latmus having choked up its harbour.- Thales, one of the wisest of the seven contemporary Grecian sages, was a native of this place, as were also Anaximenes, Hecatæus, Timotheus, the celebrated musician, and several other great men. This was the last of the Ionian cities, but Grecian colonies still occupied the Western coast. Below Miletus was Iassus, now Assam Kalasi, and in a

peninsula, formed\*by the Iassian and Ceramic gulfs, was Myndus, now Myndes, and opposite to it, on the Ceramic gulf, was the celebrated city of Halicarnassus. now Bodron, a Grecian colony, once the residence of the Kings of Caria. Here was the splendid tomb, built by Artemisia, Queen of Caria, for her husband Mausolus, which was one of the wonders of the antient world, and has given to all magnificent sepulchres the name of mausoleums. It was the birth-place of Herodotus the father of history, of Dionysius Halicarnassensis, of Heraclitus, and many other great men, and is memorable also for the long siege it maintained against Alexander, under the skilful command of Memnon, the general of Darius. The peninsula between the Sinus Ceramicus (so called from the city of Ceramus, or Keramo,) and Sinus Doridis, was called Doris, being peopled by Dorian colonies. Here was the city of Cnidos, sacred to Venus \*, near a promontory called Triopium, now Cape Crio. In the interior of Caria, Alabanda was a principal city, situated near the Mæander. Towards the Southern coast was Stratonicea, or Eski Shehr, so called from Stratonica, the wife of Antiochus Soter; and on the confines of Phrygia was Aphrodisias, now Gheira.

Lycia was bounded by Caria on the West, by Phrygia on the North, by Pisidia and Pamphylia on the East, and by the Mediterranean on the South, and indeed, in great measure, on the West and East. At the head of the Western gulf was Telmissus, now *Macri*, the inha-

- Quæ Cnidon

Junctis visit oloribus.

Hor. Od. III. 28, 13.

bitants of which were reputed skilful magicians; the gulf has taken, both in antient and modern times, the name of the city, but was also called Glaucus, from the celebrated Lycian hero of that name in Homer. Cragus\*, sacred to Diana, runs along this gulf: the fabulous monster Chimera, said to have been subdued by Bellerophon, was a volcano in this ridge, which he cultivated. South of it was the river and city of Xanthus, now Eksenide +, and a little below it Patara, now Patera, remarkable for having been thought the residence of Apollo during one half the year. # East of Patara is Myra, now Cacamo, the ruins of which are magnificent; East of which was the Lycian mountain and city of Olympus, near the Promontorium Sacrum, and the Chelidoniæ Insulæ, now Cape Kclidoni; this is considered as the commencement of the great ridge of Mount Taurus. Above it is Phaselis, now Fionda, where is a passage along the sea, so contracted by a

> Vos lætam fluviis, et nemorum coma, Quæcunque aut gelido prominet Algido, Nigris aut Erymanthi Sylvis aut viridis Cragi.

Hor. Od. I. 21, 5.

+ Xanthus is memorable for the obstinacy of the defence which its inhabitants made against Brutus, having set their city on fire, and rushed into the flames with such resolution, that although he offered a reward for every Xanthian that was brought to him alive, he could save only 150, and those much against their will.

# Hence Horace -

Phœbe, qui Xantho lavis amne crines.

— Qualis ubi hybernam Lyciam Xanthique fluenta Deserit, ac Delon maternam invisit Apollo.

Virg Æn. IV. 143.

steep ridge of Mount Taurus, called Climax, that the army of Alexander, which passed it in the winter, were in the utmost danger, being compelled to wade a whole day up to their middles in water.

East of Lycia are Pamphylia and Pisidia, two countries whose respective limits we cannot ascertain, farther than by observing that Pamphylia lay on the coast, and Pisidia more inland. The first place of importance in Pamphylia is Perga, its antient metropolis, now Karahisar, or the black castle, a little inland, on the river Cestrus. South-east of it was Aspendus, on the river Eurymedon; South of Aspendus is Side, on the river Melas, and still South-east is Coracesium, where Pompey destroyed the formidable Isaurian and Cilician pirates, B.C. 67. A.U.C. 687. Advancing inland, in the Northwestern angle, which meets the confines of Lycia and Phrygia, are the Solymi, against whom we are told in Homer, Bellerophon was sent, with the hope of his being killed in a combat. Their city was Termessus, in the indeterminate frontier of Pamphylia and Pisidia. North-east of it, in the interior of Pisidia, was Cremna, a strong Roman colony, now called Kebrinaz; and South-east of it was Selga, the greatest city of Pisidia, of Lacedæmonian origin, and still called Isparté.

North-east of Pisidia was Isauria: the inhabitants were a fierce and rapacious people, conquered by Publius Servilius, the Roman general, in the time of the Mithridatic war, who thence obtained the surname of Isauricus. Their capital was Isaura, on a lake, now called *Bei-sheheri*. Below it, in the Eastern angle of Isauria, are two cities, mentioned in the Acts of the Apostles, ch. xiv., Lystra and Derbe, the latter derives

its name from the word Darb, a gate, and was perhaps one of the passes of Mount Taurus, now called Alahdag, or the pass of the high mountains.

Cilicia is bounded by Pamphylia and Pisidia on the West, by Cappadocia on the North, by Syria on the East, and by the Mediterranean on the South. It was divided into two parts: the Western, adjoining Pamphylia and Pisidia, was extremely mountainous and rugged, hence called Cilicia Trachea, or the rugged Cilicia, which was subsequently considered as a continuation of Isauria; and Cilicia Campestris, or the level Cilicia. In Cilicia Trachea, the first place East of Pamphylia, on the coast, is Selinus, now Selena, where the Emperor Trajan died, A.D. 117. South-east of it Anemurium, on a promontory opposite Cyprus, is still called Anemur, or Anemurieh. North-east of it is Seleucia (called Trachea, to distinguish it from other cities of that name,) on the river Calvcadnus, now Kelikidni, or Yersak: it was antiently the principal city of Cilicia Trachea, and maintains its rank under the name of Seletkeh. Inland, on the confines of Isauria, was a strong fortress called Homonada, now Ermenah.

In Cilicia Campestris the first place that presents itself is Corycus\*, now Curco, a place greatly celebrated amongst the antients for its saffron, and for a cave inhabited by the monstrous Titan Typhon. North-east of it is Soli, an antient but decayed town in the time of

Ut cum scena croco Cilici perfusa recens est.

Lucret, II, 421.

Pompey, who established there the Cilician pirates, whom he admitted to a capitulation, and gave it the name of Pompeiopolis: it stands on the river Lamus, whence the adjacent territory was called Lamotis, now Lamuzo. North-eastward is Anchiale, said to have been built, as well as Tarsus, in one day, by Sardanapalus\*, the last and most effeminate of Assyrian kings, who burnt himself, with his palace, B.C. 820. At the Northern point of the shore, at the mouth of the river Cydnus, was the city of Tarsus, the birthplace of St. Paul, and so much celebrated for the learning and refinements of its inhabitants, as to be the rival of Athens and Alexandria. It was here that Alexander nearly lost his life, by bathing when hot in the cold stream of the Cydnus, and here that Cleopatra paid her celebrated visit to Antony, in all the pomp and pageantry of Eastern luxury, herself attired like Venus, and her attendants like Cupids, in a galley covered with gold, whose sails were of purple, the oars of silver, and cordage of silk, a fine description of which may be seen in Shakspeare's play of Antony and Cleopatra, Act. II. Scene 2. It is still called Tarsous, but is subject to Adana, a city somewhat to the East, which still preserves its name, on the Sarus, or Scihoun. Above Adana is the famous pass of Mount Taurus called the Pylæ Ciliciæ, or gates of Cilicia, on the frontier of Cappadocia. South-east of Adama, is the city of Mopsus, or Mopsuestia, now Messis, North-east of

Et potiores

Herculis ærumnas ducat sævosque labores

Et venere et cænis et plumis Sardanapali.

which is Anazarbus, or Anzarbe, of considerable importance under the Eastern emperors. South-east of it is Castabala, and below it Issus, now Aiasse, the evermemorable scene of the victory of Alexander over Darius, Oct. B.C. 333, Ol. 111. 4. and afterwards of another most important victory obtained by the Roman emperor Severus over his rival Niger, A.D. 194. river Pinarus, which runs through the plain of Issus into the Issian Gulf, is now called the Deli-sou. At the point where the Mediterranean bends Southward were the Pylæ Syriæ, a very difficult and strong pass, on the frontiers of Syria and Cilicia, between Mount Amanus and the sea. We must not forget that Cicero was proconsul of Cilicia, and was vain enough to hope for the honours of a Roman triumph, in consequence of some successes obtained by himself and his lieutenant over the neighbouring barbarous tribes.

We are now to describe the two inland provinces of Asia Minor, Phrygia, and Cappadocia. Phrygia received the appellation of Major to distinguish it from a part of Mysia, near the Hellespont, which was occupied by some Phrygians after the Trojan war, and from them called Phrygia Minor.\* It is bounded on the North by Bithynia and Galatia, on the West by Mysia, Lydia, and Caria, on the South by Lycia, Pisidia, and Isauria, and on the East by Cappadocia. In the North, adjoining Bithynia, on the river Thymbrus, is the city Dorylæum, now Eski-shehr. Southward is Cotyæum, now Kutaich, and still South, Peltæ, mentioned by Xenophon

<sup>\*</sup> Hence it appears that the term Phrygians is applied improperly or by anticipation, to the Trojans in Virgil.

in his Anabasis, now Uschah. On the Southern confines of Lydh was Laodicea, now Ladik, and a little North-east of it is Colossæ, now Chonos. In the Southern angle, between Caria and Lycia, is Cibyra\*, a considerable trading city, now Buraz; to the North-east, is Themisonium, or Tescni, and above Themisonium, to the North, is Anamea Cibotus, antiently a very rich and flourishing city, which occupied the site of a more antient city called Celænæ: it is situated near the sources of the Mæander, on the river Marsyas, on whose banks the celebrated musician of that name is said to have been flayed alive by Apollo, and his skin was shown at Celænæ. North-east of Celænæ, on the confines of Galatia, was Synnada, whose marble was held in great estimation among the Romans; a little South-east is the plain of Ipsus, where the famous battle was fought between the surviving generals of Alexander, Antigonus and his son Demetrius on the one side, and Lysimachus, Seleucus, Ptolemy, and Cassander on the other, in which Antigonus was defeated and died of his wounds, B.C. 301, Ol. 119.4. South of Ipsus was an Antiochia, called, for the sake of distinction, Antiochia ad Pisidiam, or Antiochia near Pisidia; it is now called Ak-shehr, or the White City: and East of Ipsus is Thymbrium, mentioned by Xenophon in his Anabasis, now Tshaktelu; but later writers give this name to Tyriæum a little South of it. The remaining Eastern part of Phrygia was called Lycaonia; the first place of importance in which was Laodicea Combusta, or Ladikie, and South-east of it was Iconium, now Konieh, mentioned in the Acts of the

Cave ne portus occupet alter, Ne Cibyratica, ne Bithyna negotia perdas.

Apostles, ch. xiii. 51. In the North of Lycaonia was a long and salt pool called Tatta Palus, now Tuzla, or the salt.

Cappadocia was bounded on the West by Phrygia, on the North by Pontus, on the East by the Euphrates, and on the South by Phrygia. The Cappadocians are remarkable for having refused liberty when offered them, preferring to live under their kings, who seem to have had a number of slaves on the royal domains, somewhat like our feudal barons. \* Cappadocia was divided into a number of districts, which it is hardly necessary to enumerate. On the confines of Lycaonia, Archelais was a Roman colony, founded under the Emperor Claudius, now Erkeli. East of it was Nazianzus, the birthplace of Gregory, one of the early fathers of the church, who died A.D. 389. East of it was Tyana, the birthplace of a celebrated impostor called Apollonius, whose life and miracles are recorded by Philostratus: he flourished A.D. 90: it was in a district called Cataonia. North-east of Tyana was Comana, celebrated for its temple of Bellona, reputed the richest and most sacred in the East; it was plundered by Antony. South-east of which, on the confines of Cilicia, was Cucusus, or Cocsan, a remarkably gloomy and retired place, among the mountains of Taurus, to which the great St. Chrysostom was banished. And North-eastward, on a small stream between the rivers Melas and Euphrates, was Melitene, now, Malatia, the antient capital of Armenia Minor. Returning to the confines of Phrygia, in the

 <sup>\*</sup> Hence Horace —
 Mancipiis locuples eget æris Cappadocum rex.

North of Cappadocia, is Nyssa, or Noris-shehr, the birth-place of another Gregory, also a father of the church, who died A.D. 396. East of it is Mazaca, the capital of Cappadocia, called Cæsarea in the time of Tiberius, with the addition of ad Argæum, to signify its position at the foot of the very lofty Mons Argæus, from which both the Euxine and Mediterranean seas might be discovered; it is now called Kaisarich, and the mountain Argæus is Argeh-Dag: the river Melas, now Korah-Sou, or the Black Water, rises in it; one source of the Halys rises not far distant. The North-eastern part of Cappadocia, on the Western bank of the Euphrates, was called Armenia Minor. Towards the confines of Pontus is Sebaste, now Sivas, more antiently called Cabira; it was taken from Mithridates by Pompey; and a little North-east of it was an almost impregnable fortress called Novus, now Hesen-Now, where Mithridates kept his principal treasures. Still North-east is Nicopolis, or Tephrice, now Devriki, built by Pompey, after he had forced Mithridates across the Euphrates: and in the extreme North-eastern angle, on the confines of Pontus and Armenia Major, was Satala, now Arzingan.

## CHAPTER XII.

### ORIENS.

PART I. - SYRIA; CONTAINING PHŒNICIA, PALÆSTINA.

Plates I. XIV. XV. XVI. XVII.

The remainder of Asia shall be described under the general title of Oriens, or the East.

Below Cilicia, on the Eastern coast of the Mediterranean, is Syria (Pl. XV.), but the Southern part of the coast is called Phœnicia, and below it Palæstina, or Holy Land, in the upper part of which was Galilæa, in the middle Samaria, and the lower Judæa. Below Judæa, at the top of the Sinus Arabicus, or Red Sea, (Pl. I.), was Arabia Petræa, or the Stony Arabia; lower, towards the entrance of the Sinus Arabicus, was Arabia Felix, or the Fruitful, and

the rest of the vast plain between the Arabian and Persian Gulfs was Arabia Deserta, or the Desert Arabia. East of Arabia, near the mouth of the Euphrates, at the top of the Persian Gulf (Pl. XIV.), is Chaldea, and above it, Babylonia. Between the rivers Euphrates and Tigris, is Mesopotamia; on the East of the Tigris is Assyria, East of which is Media, and South of it Persia; that part of Persia near the Tigris is called Susiana. North of Mesopotamia is Armenia Major, on the East bank of the Euphrates; Armenia Minor (Pl. I. XVII.) was on the Western bank of the Euphrates, being originally part of Cappadocia. Above Armenia, on the Eastern coast of the Pontus Euxinus, was Colchis, and East of it Iberia, and, still East, on the shore of the Caspian, Albania. Above them, between the Palus Mæotis and Northern part of the Caspian, was Sarmatia Asiatica. East of Persia (Pl. XIV.) was Carmania, and South-east of it Gedrosia, reaching nearly to the river Indus. The great country between the Indus and the Ganges (Pl. I.) was India intra Gangem, and that East of the Ganges, which was very little known, was India extra Gangem, South-east of which were the Sinæ. East of Media was Aria and Bactriana. North of Media, at the Southern extremity of the Caspian, was Hyrcania and Parthia, and North of Hyrcania the Chorasmii, to the North-east

of whom were the Massagetæ, and to the South-east Sogdiana, and still Eastward the Sacæ. All the country to the North was called Scythia intra Imaum, or Scythia within the mountain Imaus, and South-east of it was Scythia extra Imaum, somewhat North-east of which was Scrica, which approached to the North-western frontier of China.

We may consider Syria (Pl. XV.), including the coasts of Phœnicia and Palæstina, as bounded by Cilicia on the North, by the Euphrates and Arabia on the East, by Arabia and Egypt on the South, and by the Mediterranean on the West. Immediately on the Cilician confines was Alexandria, now Alexandretta, or Scanderona. South-east, but somewhat inland, is the famous city of Antiochia, or Antioch, now almost depopulated, and called Antakia. It was built by Seleucus Nicator, the son of Antiochus, who called it after his father's Seleucus was one of the most powerful of Alexander's generals, who obtained Syria for his share in the dismemberment of the Macedonian empire, and the kings of Syria, his descendants, were called Seleucidæ. We learn from the Acts of the Apostles, ch. xi. 26., that the disciples were first called Christians in Antioch, and after the prevalence of Christianity it received the appellation of Theopolis, or the divine city. It was built on the river Orontes, or El Aesi, the only important river in Syria, if we except its Eastern boundary, the Euphrates. About five miles below it was a delightful grove and fountains, called Daphne, celebrated for the worship of Venus, and the licentiousness

of its visitors; it is now called Beit el Ma, or the House of Water. 'Near the mouth of the Orontes was Seleucia, founded by Seleucus Nicator, now Savedia, and south of it was Mons Casius, said to be so high that the sun-rising might be seen from the summit when the bottom of the mountain was yet enveloped in darkness. Considerably South, near the small river Marsyas, which flows into a lake on the Orontes, was Apamea, now Famieh, an important city, founded by Seleucus Nicator, who kept five hundred war elephants there; and below it is Epiphaneia, or Hamah. South-east of Epiphaneia is the city of Emesa, or Hems, where was a famous temple of Elagabalus, or the sun, the priest of which, a youth of fourteen, was made Emperor by the licentious Roman soldiers, A.D. 218, and disgraced himself and the purple, during a reign of almost four vears, by the most horrid cruelties and unheard-of licentiousness. South-west of Emesa, on the opposite side of the Orontes, is Heliopolis, or Balbec, where are still to be seen the ruins of a most magnificent temple of It is in a valley between two parallel ridges of mountains, Libanus and Anti Libanus. This valley was called Aulon, or the hollow, by the Greeks, and all this part of Syria was called Cœle Syria, or the Hollow Almost South of Heliopolis, but with a little Syria. declination towards the East, was Damascus, or Demesk, one of the most celebrated cities of Asia, both in sacred and profane geography. It was beautifully situated in a valley, still called Gouteh Demesk, or the Orchard of Damascus, and watered by a river called by the Greeks Bardine, or Chrysorrhoas, the Golden Stream, now Baradi. We shall next describe the interior of Syria to its Eastern boundary, the Euphrates. The Northern

extremity of Syria, on the declivity of Mount Taurus and Amanus, was called Comagene: its principal city was Samosata, now Semisat, on the Euphrates, the birthplace of Lucian. Somewhat South-west of it is Pindenissus, now Behesni, which was besieged and taken by Cicero, when proconsul of Cilicia, after a siege of twenty-five days, A.U.C. 702, B.C. 52. South-east of it is Zeugma, the principal passage of the Euphrates; South of which is Hierapolis, so called from its being the seat of worship of the Syrian goddess Atergatis; by the Syrians it was called Bambyce, or Mabog, now Menbigz. Near it was Batnæ, now Adanch, the delightful situation of which rivalled the Antiochian Daphne. South-west of it was a city antiently called Chalybon, but by the Macedonians of Alexander, Bercea, now celebrated under the modern name of Haleb, or Aleppo. South-west of this was a city called Chalçis, now Old Haleb, and North of it Cyrrhus, now Corus. These three cities gave the name of Chalybonites, Chalcidice, and Cyrrhestica, to the surrounding districts. Considerably to the East of Berœa is Resapha, which preserves its name; and South-east of it are the celebrated fords of the Euphrates at the city of Thapsacus, now El-Der. This ford was first passed by Cyrus, in his expedition against Artaxerxes, immortalized by Xenophon, B.C. 401, Ol. 94. 4.; afterwards by Darius, after his defeat by Alexander at Issus, B.C. 333. Ol. 111. 4.; and near three years after by Alexander. in pursuit of Darius, previous to his final and decisive victory of Arbela. Below it is Orouros, or Gorur. which was fixed by Pompey as the boundary of the Roman Empire, when he reduced Syria to a Roman province. To the West about midway between Orouros

and Emesa, in the vast desert which connects Syria with Arabia, is Palmyra, or Tadamora, (the city of Palmtrees,) said to have been founded by Solomon, now Tadmor in the wilderness. It was a most powerful city under its celebrated Queen Zenobia, the wife of Odenatus. She opposed the Emperor Aurelian, in the plains of Syria, at the head of 700,000 men, and had nearly defeated him, but was overthrown and carried captive to Italy, A.D. 273, where she had large possessions assigned to her near Tibur. She was no less an accomplished than brave princess, and had for her secretary the celebrated Longinus, the author of the well-known treatise on the Sublime.

That part of Syria which occupied the coast of the Mediterranean, with the exception of the Northern district, was called Phoenicia, and is most justly memorable for having made the earliest progress in civilization and the arts. Navigation was invented and greatly cultivated by the Phœnicians, who are thought to have visited the Scilly Islands at a period unknown to history. The Greeks ascribe the origin of letters to Cadmus, a Phœnician; and we know from the sacred books that Tyrian, that is, Phœnician artists, presided over the most glorious building recorded in Scripture, the Temple of Solomon. Nearly opposite the Eastern promontory of Cyprus was Laodicea, now Ladikieh, below it is Aradus, now Ravad; below it is Tripolis, now Taraboli, or Tripoli; below which is the little river Adonis, now Nahr Ibrahim, the streams of which, at the anniversary of the death of Adonis, which was in the rainy season, were tinged red with the ochrous particles from the moun-

tains of Libanus, and were fabled to flow with his blood. Below it is Berytus, now Berut; below it is Sidon, so renowned in sacred and profane history, now Sayda; and a little below it, Sarepta, the scene of Elijah's miracles; and still lower, the city of Tyre, now Sar, so greatly celebrated by all writers, sacred and profane. was a colony of Sidonians, founded before the records of history, and consisted of two cities, one on an island, and the other, called Palætyros, on the shore; the two were about nineteen miles in circumference, but Tyros alone was not more than four. It was taken after a siege of seven months, and a most obstinate resistance, attended with innumerable difficulties, by Alexander, Aug. 20., B.C. 332, Ol. 112. 1., who thus fulfilled the many predictions of its destruction delivered by the prophets in the Scriptures: it is now almost in ruins.

Palæstina, or *Palestine*, (Pl. XVI.), derived that name from the Philistari, who inhabited the coast, but as it was the promised inheritance of the seed of Abraham, and the scene of the birth, sufferings, and death of our Redeemer, we are accustomed to designate it by the more religious appellation of the Holy Land. It is bounded on the North by Phænicia and Cælesyria, on the East by Arabia Deserta, on the South by Arabia Petræa, and on the West by the Mediterranean, called

The story is told by Milton:

Thammuz next came behind,
Whose annual wound in Lebanon allur'd
The Syrian damsels to lament his fate
In amorous ditties all a summer's day,
While smooth Adonis from his native rock
Kan purple to the sea, supposed with blood
Of Thammuz yearly wounded.

Par Lost, Book 1.

in the Bible the Great Sea. It will be most convenient to invert the order of time, and first describe it as it existed in the time of our Saviour, and then to state briefly the settlement of the twelve tribes under Joshua. river Jordan, which rises in Mount Hermon, a branch of Anti-Libanus, flows into the North end of a lake called the Lake of Gennesareth, or Sea of Tiberias, and issuing from its Southern extremity passes through a long, spacious, and fertile valley called Aulon, or Magnus Campus, at the end of which it enters a much larger lake called the Lacus Asphaltites, or Mare Mortuum, in the sacred writings the Dead Sea, or Salt Sea. On the Western side of Jordan were the three countries of Judæa in the South, Samaria in the middle, and Galilæa in the North: on the Eastern side of Jordan was Peræa. like this we can only take a brief review of the principal cities of this most interesting country. In the kingdom of Judæa, about midway between the Mediterranean and the Northern extremity of the Dead Sea, stood the sacred city of Hierosolyma, or Jerusalem, thought to have been the Salem of which Melchisedec was king. It was sometimes called Jebus, from having been possessed by the Jebusites, a Canaanitish people, from whom it was taken by David, and made his residence. It was built on several hills, the largest of which was Mount Sion, which formed the Southern part of the city. A valley towards the North separated this from Acra, the second, or lower city, on the East of which was Mount Moriah, the site of the temple of Solomon. Still North of which was Bethesda, where was the pool at which the cripple was healed by our Saviour, as related in the Gospel of St. John, chapter v. Northeast of Mount Moriah was the Mount of Olives, lying

beyond the brook and valley of Kedron, which bordered Jerusalem on the East: this valley is also thought to be the valley of Jehoshaphat; on the South was the valley of Hinnom, and at the North was Mount Calvery, the scene of the crucifixion of our Lord. Near Jerusalem, on the North-east, was Bethany, and on the South, Bethlehem. Jerusalem was utterly destroyed by Titus, according to the prophecy of our Saviour, Sept. 8. A.D. 70.

Beginning at the South, along the coast of Philistæa was Gaza, and above it, Ascalon, which preserve their names, and above that, Azotus, or Asdod; still North of this, but rather more inland, is Acraron or Ekron, which preserves its name, and a little South-east of it is Gath. Returning again to the South of Judæa, which in the time of the second temple was called Daromas, now Darom, extending to the North and North-west of Idumæa, or the antient Edom, we find Gerara, or Gerar, and Bersabe, or Beersheba, the well of the oath, so often mentioned in Scripture as the Southern limit of the country possessed by the children of Israel. North-east of it was Hebron, the original name of which we find from the books of Moses was Kirjath-Arba. This was the burial-place of Abraham and his family, and is now called Cabr Ibrahim, or the Tomb of Abraham. North-west of Jerusalem was Emmaus, recorded in sacred history as the place to , which the two disciples were going to whom our Saviour showed himself after his resurrection, and in profane, as the place where Vespasian defeated the revolted Jews. Directly North of Jerusalem was Bethel: a rugged mountainous country lay between Jerusalem and Hierichus, or Jericho, to the North-east. Below Jericho, towards the top of the Dead Sea, was Engaddi, celebrated, like Jericho, for its palm-trees, as was all Judæa and Idumæa.\*\*

Samaria and Galilee lie above Judæa. In the former, the original royal city was Sichem, North of Jerusalem, afferwards called Neapolis, now Nablous; it lay in a valley enclosed by Mount Ebal on the North-east, and Mount Gerizlm on the South-west, from the former of which the curses, from the latter the blessings, attached to the law were read to the people by Joshua. At the foot of Mount Gerizim was the temple of the Samaritans. The city of Salaaria itself had been destroyed by the Asmonean princes, and was fortified and embellished by Herod, who called it Sebaste, in honour of Augustus: it was North of Sichem. But the principal city of Samaria was North-west of Samaria, in the plain of Megiddo, on the coast, called Cæsarea, which was the seat of the Roman governors; it was antiently called Turris Stratonis, but was made a magnificent city and port by Herod, who called it Cæsarea, in honour of Augustus Cæsar. Considerably below it, on the coast, was Joppa, now Jafa, known also in profane history, or fable, as the spot were Andromeda is said to have been chained to a rock to be devoured by a sea-monster, from which she was rescued by Perseus. Inland, East of Joppa, but within the Judæan frontier, is Lydda, now Lod, called by the Greeks Diospolis, and South-west of it is Arimathea.

Virg. Georg. III. 12.

Præferat Herodis palmetis pinguibus.

<sup>\*</sup> Primus Idumæas referam tibi, Mantua, palmas.

Above Samaria is Galilee, the lower part of which was called Galilæa Inferior, being principally inhabited by Jews, the upper part, or Galilæa Superior, adjoining Cœlesyria, was called Galilæa Gentium, or Galilee of the Gentiles, or foreign nations. At the entrance into Galilee from Samaria was the city of Jesrael, situated in a spacious plain, to which it gave name, and which is still called the Plain of Esdrelon; North-west of it. along the coast, is Mount Carmel. At the North of Mount Carmel is the brook Kison, which rises in Mount Tabor, or Itabyrius, and flows into the sea a little below Ptolemais, so called from the Ptolemies, kings of Egypt. but antiently Aco, and so memorable in the time of the crusades, under the name of Acre, for the exploits of our king Richard the First, and in our own time for the defeat of Buonaparte by Sir Sidney Smith. South-east of Ptolemais was the strong city of Sepphoris, afterwards called Dio Cæsarea, now Sefouri; South of it was Nazareth, and a little South-east of Nazareth was Mount Tabor, or Itabyrius, thought by some to have been the scene of the Transfiguration, a little North of which was Cana of Galilee. Considerably South-east of Mount Tabor, near the Jordan, is Bethsan or Scythopolis, now Baitsan; it was the chief of the cities of Decapolis, or the ten confederate cities, which being not inhabited by Jews, formed a confederation for mutual protection against the Asmonean princes of Judæa. Mount Tabor and Scythopolis was Endor, near Mount Hermon, which must not be confounded with the great range of the same name East of the Jordan. South-east of Endor, was Gelbus or Gilboa, where Saul perished after his interview with the witch of Endor. The city Tiberias or Tabaria, so named by Herod Antipas in honour of Tiberius Cæsar, stood on the Western shore

of the lake to which it gave name, which is also called the Sea of Gennesareth, from a pleasant district called Gernesar, near Capernaum, at the Northern extremity of the lake. A little North of Tiberias was Magdala, West of which was Bethulia, or Saphet, where the Jews were delivered by Judith from the power of Holofernes. Capernaum stood about midway between Bethsaida, to the South, and Chorazin, upon the Northern point of the lake. North-west of the lake is Jotapata, where the Jewish historian Josephus sustained a siege against Vespasian. On the Northern confines of Palestine was the district of Trachonitis, in which was the city of Paneas, antiently Laish, which Herod's son Philip called Cæsarea, and which received the addition of Philippi to distinguish it from the Cæsarea already noticed. A little West was Dan, the Northern boundary of the kingdom of Israel, as Bethel was, on the South.

The country on the East of Jordan, between the two lakes, was called Peræa, perhaps from πέραν, beyond, extending from the brook Arnon, which flows into the North-eastern end of the Dead Sea, to the mountains of Galaad, near the sea of Tiberias. At some distance from Jordan, and almost opposite to Jericho, are Mounts Abarim and Nebo, from which Moses had a view of the Promised Land. A little East of Mount Nebo is Hesbon, and North-west of it the very strong fortress of Amathus, or Assalt, commanding the plain of Aulon, or El-Gour, along the banks of the Jordan, considerably above North-east of Peræa is the district which is Bethahara called Galaaditis, from Mount Galaad, in which, on the brook Jabbok, is to be found Ramoth, or Ramoth Gilead. North of Galaaditis is \*Batanæa, or Batania, the antient

territory of Og, king of Basan, South of which lay the possessions of Sihon, king of the Amorites. A strong fortress called Gaulon gave the name of Gaulonitis to the Eastern shores of the lake Gennesareth, at the Southern extremity of which was the impregnable fortress of Gamala; and near it Gadara, or the country of the Gadarenes, on the torrent Hieromax, or Yermak, so signalized by the fatal defeat of the Christian forces by the Saracens, under Abu Obeidah, November 9. A.D. 636. East of Gadara is Adraa, or Edrei, now Adreat. Southward of this is Gerasa or Jerash, which contains many splendid remains of antiquity. North of the lake, Mount Hermon separates Palestine, properly so called, from the adjacent countries of Trachonitis, (a rugged district, as its name imports, adjoining Cœlesyria,) Ituræa, and Auranitis, the chief city of which, Bostra, now Bosra, was the metropolis of a province formed under the name of Arabia. Below Auranitis was Ammonitis, or the land of the children of Ammon, whose chief city was Rabbath Ammon, called afterwards Philadelphia, but now Amman; and below it was Moabitis, or the land of Moab, the chief city of which was Areopolis, or Rabbath Moab, now Maab, or El-Raba, and a little above it Aroer, near the river Arnon.

We shall now briefly review the situation of the tribes of Israel when settled under Joshua. The largest portion was that of Judah, along the Western side of the lake Asphaltites, and West of Judah was Simeon, bordering on the Philistines, who occupied the Mediterranean coast. North of Judah was the smaller tribe of Benjamin, in which was Jerusalem; and West of Benjamin, the still smaller tribe of Dan, reaching to the coast, having the

Philistines to the South. Above Dan and Benjamin was a considerable district, from the coast to Jordan, the portion of Ephraim; above Ephraim, extending in a like manner, was half the tribe of Manasseh. then became that of Syro-Phœnicia, along which, but rather inland, lay the tribe of Asser, forming a Western barrier to the three following tribes: - Issachar, (which lay above Manasseh, reaching to the Southern extremity of the sea of Tiberias,) Nephtali, and Zabulon. The whole North-western coast of the sea of Tiberias, and as far as Dan, considerably North of it, was occupied by the tribe of Nephtali, and between Nephtali, Issachar, and Asser lay the tribe of Zabulon. The whole Eastern side of Jordan, to the Southern extremity of the Sea of Tiberias, was occupied by the other half tribe of Manasseh; below it was Gad, reaching about half way between the two lakes; and below it Reuben, reaching to the plains of Moab at the North-eastern corner of the Lacus Asphaltites. These two tribes and a half were the first settled, though their warriors crossed over Jordan 'to assist their brethren in subduing the Canaanites on the Western side.

# \* CHAPTER XIII.

#### ORIENS.

PART II. - CONTAINING THE REMAINDER OF ASIA.

## A. G. Pl. I. XIV. XV. XVII. XX.

A MORE succinct description may suffice in a work like this for the remainder of Asia.

Arabia (Pl. I.) is divided into Arabia Petræa, Arabia Felix, and Arabia Deserta. Arabia Petræa extends from the South of Holy Land along the two gulfs which form the extremity of the Sinus Arabicus, being bordered by Egypt on the West, and Arabia Deserta on tha East. That part of it which borders on Judæa was called Idumæa, or Edom, and was possessed by the posterity of Esau. The Arabians in general recognize for their ancestors Jectan, or Kahtan the son of Eber, and Ismael, the son of Abraham by his concubine Hagar. In Arabia Petræa were Mount Sinai and Horeb (Pl. XX.), between

the two gulfs, but nearer the Eastern gulf, which branches from the extremity of the Red Sea, and which was called Ælanites, from the city of Ælana, or Ailath, at its Northern point. The other gulf was called the Sinus Heroopolites, or the Gulf of Suez, from the city of that name built on it. The Nabathæi (Pl. I.) were a nation of Arabia Petræa, deriving their name from Nebaioth, the son of Ismael. Here was Madian, the country of Jethro, the father-in-law of Moses. Towards Diræ, or the Straights of Babel Mandeb, were the Sabæi, in Arabia Felix, or Yemen, East of which is the thurifera regio. The best frankincense being white, in Arabic Liban, Libanos also became a Greek name for it, corrupted among the modern merchants into Olibanum. A little island, South of this region, called Dioscoridis Insula, is now Socotora, whence the best aloes are brought. Off the coast of Arabia Deserta, in the Sinus Persicus (Pl. XIV.), was the little island of Tylos, or Bahram, celebrated for its pearl fishery.

At the top of the Persian Gulf, on each side of the Euphrates (Pl. XIV.) is Babylonia; the part nearest the gulf is Chaldæa, which is sometimes taken for the name of the whole country. It is properly called Irak, a name which has extended to the adjacent country of Mesopotamis and part of Media, now Irak Arabi. The principal city of Babylonia was Babylon, one of the most antient in the world, built by Belus, who is thought to have been the same with Nimrod. It is near a place now called Hellah, on the East bank of the Euphrates, about 47 miles South of Bagdad. It was surrounded with a prodigious strong wall, said to have been 480 stadia in cir-

cumference (an exaggeration probably for the surrounding region, as this would give an enclosure of 60 miles), 50 cubits thick, and 200 cubits high. It was built by the celebrated Queen Semiramis, of bricks baked in the sun, and cemented with bitumen, abounding in the country. It was the residence afterwards of Nebuchadnezzar, who destroyed Jerusalem, June 9, B.C. 587, and transplanted the Jews to this country, and was taken by Cyrus, B.C. 538, according to the prediction of the Jewish prophets, after he had diverted the waters of the Euphrates into a new channel, and marched his troops by night into the town through the antient bed of the river. The city is said to have been so large that the inhabitants at the opposite extremity did not know of its fate till the next evening. However, when we consider that the Eastern cities contained enclosures for the pasture and protection of cattle during a siege, there is not reason to think that the inhabited part of Babylon was larger than London. A full account of the siege is to be seen in Herodotus. Babylon also is memorable for the death of Alexander the Great, April 21, B.C. 323. It is now in ruins; but the vestiges of the temple of Belus remain. After the death of Alexander, Seleucus Nicator founded a city called Seleucia a little above it. on the Tigris, which he designed for the capital of the East, and the kings of Parthia founded one on the other side called Ctesiphon, which they made their ordinary residence: they are now called Al Modain, or the two cities. A little below Ctesiphon is the river Gyndes, which was an impediment to Cyrus in his march to Babylon, who lost his favourite horse there: in revenge he divided it into 360 channels, so that it might be

forded only knee-deep. The Chaldeans or Babyloniahs, as is well known, were greatly addicted to astrology.

Above Babylon is Mesopotamia (Pl. XV.), lying, as its name imports, between the two rivers, the Euphrates, which divides it from Syria on the West, and the Tigris, which separates it from Assyria on the East. Towards the Southern boundary of Babylonia, the rivers approach each other so as to make it considerably narrower than on the confines of Armenia, its Northern frontier. The lower part of Mesopotamia is now Irak Arabi, the upper Diar Bekr. The North-western part of Mesopotamia was called Osroene, from Osroes, a prince who wrested from the Seleucidæ a principality here, about B.C. 120. Its capital was called by the Macedonians Edessa, now Orha, or Orfa. South-west of Edessa, at the pass of Zeugma, was a city called Apamea, and South-east of it Carrhæ, a very antient city, the Charran of Scripture, from which Abraham departed for the land of Canaan, and the fatal spot at which Crassus +, the Roman triumvir, lost his life, in his expedition against the Parthians, who cut off his head, and poured melted gold down his throat, B.C. 53, A.U.C. 701. The inhabitants were

	Assyrias Latio maculavit sanguine Carr	as.

greatly addicted to Sabaism, or the worship of the host of heaven, particularly the moon, under the masculine denomination of the Deus Lunus. The antient name of Charran is still retained in Haran. Descending toe Euphrates, nearly opposite to Thapsacus in Syria, we find Circesium, on the river Chaboras: the emperor Dioclesian fortified this city, and made it a frontier of the empire; it is now called Kirkesieh. In Xenophon's account of the expedition of Cyrus the Chaboras is called the Araxes. A little below Circesium is the tomb of the younger Gordian, who was killed there by Philip, who himself succeeded to the Roman empire, A.D. 245. Below it, at a bend of the Euphrates, is Anatho, or Anah: below this, on the confines of Babylonia, near a cana. which joined the Euphrates and Tigris, was the celebrated plain of Cunaxa, where Cyrus was defeated and slain by Artaxerxes, B.C. 401. Ol. 94. 4. From this spot the 10,000 Greek auxiliaries of Cyrus commenced their immortal retreat, of which so interesting a history is given by Xenophon, who was himself one of their generals, and ultimately their chief. Nearly opposite to Edessa, but East, and rather nearer the Tigris than the Euphrates, was Nisibis, or Nisbon, the most important station in Mesopotamia, and long a frontier of the Roman empire, till it was ceded to Sapor, king of Persia, by the treaty which was made after the death of Julian, A.D. 363, and below it was Singara, now Singar.

Above Mesopotamia is Armenia (Pl. XVII.), bounded towards the South also by Assyria, on the West by the Euphrates, which separates it from that part of Cappadocia called Armenia Minor, after which a ridge of Anti-Taurus separates it from Pontus; on the North it is

bounded by Colchis and Iberia, and on the East by the barbafous nations North of Media. It was a province particularly fluctuating between the Persians and Romans, lying as it were between the two empires. Northeast of the river Lycus, which flows into the Euphrates, was Arza, now Erze-Roum, signifying that it belonged to the empire of the Greeks or Roumelia. Eastward is a district called Phasiana, through which the Araxes\*, or, as Xenophon calls it, the Phasis, flows, giving name to the country: the beautiful birds which we call pheasants still preserve in their name the traces of their native country. The Araxes, or Aras, flows from West to East till it falls into the Caspian, a little South of the river Cyrus, now the Kur or Terck; and the Euphrates flows from East to West, from its fountains in Mount Ararat, till its approach to the Syrian frontier. \* Still proceeding Eastward, along the Araxes, South-east of Mount Ararat, was Artaxata+, a celebrated and strong royal city. Returning Westward, between the principal stream of the Euphrates and Mount Masius, which forms the barrier of Mesopotamia and Armenia, the district was called Sophene, now Zoph. In this district, a little above Mons Masius, was Amida, now Kara-Amid, or Diar-Bekr, a celebrated city in the lower Roman empire. East of it, at the foot of Mons Niphates, among the Carduchi, was Tigranocerta t, built

<sup>\* —</sup> Pontem indignatus Araxes. Virg. En. VIII. 728.

<sup>†</sup> Sic prætextatos referunt Artaxata mores.

Juv. Sat. II. 170.

<sup>‡</sup> Horace has been thought to allude to it in his story of the soldier of Lucullus, who having been robbed of his accumulated savings,—

by Tigranes in the Mithridatic war: it was taken by Lucullus, who found a great treasure there. We should not forget that Niphates \* has been thought by some to be the Ararat on which the Ark rested after the Deluge, which, however, is much more to the North-east. Eastward of Mons Niphates is the Arsissa Palus, a large salt lake now called the lake of Van.

Colchis, the celebrated scene of the fable of the Golden Fleece and the Argonautic expedition, is bounded by Armenia on the South, by the head of the Euxine on the West, by Iberia on the East, and by Mount Caucasus on the North: it is now called *Mingrelia*. Its principal river was the Phasis, or Faz-Rione, preserving both its own name and that of the Rheon, a stream which flows into it. Its principal cities were Æa, on the river Phasis, and Cyta, within land, on the Rheon, where Medea was born, who is hence called Cytæis.

Iberia, now called *Imeriti* and *Georgia*, is bounded on the West by Colchis, on the North by Mount Caucasus,

Præsidium regale loco dejecit, ut aiunt, Summe munito et multarum divite rerum.

Hor. Epist. II. 2. 30.

But I cannot think this interpretation sufficiently authorised by the words of the poet.

• Horace, speaking of the conquests of Augustus, says-

Cantemus Augusti tropæa Cæsaris, et rigidum Niphatem, Medumque flumen gentibus additum Victis minores volvere vortices.

Hor. Od. II. 9. 18.

+ Non hic herbe valet, non hic nocturna Cytæis.

Propert. Eleg. II. 4.

on the East by Albania, and on the South by Armenia. This country and Albania contained some very strong passes, which were fortified against the inroads of the more Northern and still more barbarous tribes of Mount Caucasus; that in Iberia was called Pylæ Caucasiæ, or the gates of Caucasus, and was about midway between the Euxine and Caspian seas; that in Albania, between Caucasus and the Caspian, was called Pylæ Albaniæ, or Caspiæ, which was afterwards the celebrated strong city of *Derbend*. The country beyond Caucasus, between the Palus Mæotis and the Caspian, was called Sarmatia Asiatica, and was inhabited by barbarous and roving tribes, who, after the lapse of ages, seem but little civilized.

Immediately above the Sinus Persicus, or Persian Gulf, is Persia (Pl. XIV.), bounded by it on the South, by the Tigris and Babylonia on the West, by Media and Assyria on the North, and by Carmania on the East. It is called in Scripture Paran, and preserves that name in its modern term Fars. That part of it which approaches Babylonia is called Susiana, or Khuristan, which was divided into two districts, the larger to the North, called Elymais, from the Elymai, who inhabited it, and the more Southerly and maritime, but smaller district, Cissia, in which was its capital Susa, or Susan, a word signifying, in the language of the country, Lilies; it is now Suster. This was generally the winter residence of the Persian kings, who in summer retired to the cooler situation of Ecbatana. The river Choaspes\* whose waters were so excellent that the kings of Persia would drink no other, runs by Susa; and below it is the

Eulæus, or *Ulai* of Scripture, which is joined by the Pasi-Tigris near the mouth of the united rivers Tigris and Euphrates. In Persis, or Persia properly so called, was Persepolis, burnt by Alexander; its ruins are still very magnificent, and are known by the name of *Tshelminar*, or the forty, i.e. the many columns. Below it was an ancient royal city called Pasargada, where was the tomb of Cyrus; it is still called *Pasa Kuri*. North of Persepolis, towards Media, was Aspadana, now *Ispahan*.

Carmania, now Kerman, is bounded by Persia on the West, Media and Aria on the North, Gedrosia on the East, and the Sinus Persicus on the South. The limit between it and Persia was fixed by Alexander's admiral, Nearchus, at the island of Catæa, or Kais, in the Persian Gulf, remarkable as a great emporium of commerce till it was superseded by Ormus, or Ormuz, a little East of it. The capital of Carmania was Carmana, or Kerman, South-east of Persepolis.

Gedrosia is bounded by Carmania on the West, Arachosia on the North, the Indus on the East, and the Erythræum Mare on the South. It is now called *Mekran*. In passing through this country the army of Alexander underwent very great hardships from want of provisions and water, and from columns of moving sand, which had previously destroyed the armies of Semiramis and Cyrus. Its principal city was Pura, now Fohrea.

Assyria (Pl. XV.) is separated by the Tigris from Mesopotamia on the West, and is bounded by Arme-

nia on the North, Media on the East, and Babylonia on the South. It is now called Kurdistan, from the Carduchi, a people in its Northern parts, between Media and Armenia. It was the most antient of the four great empires of the world, and had for its capital Ninus, or Nineveh, so often mentioned in Scripture, founded by Ninus, on the Tigris. Its site is now supposed to be occupied by a village called Nunia. South-east of Ninus was Arbela, or Erbil; and on the opposite side of the Zabata, or Zab, somewhat North-east of Ninus, was the fatal plain of Gaugamela, where the third and decisive battle was fought between Alexander and Darius, Oct. 2. B.C. 331, Ol. 112, 2, which put an end to the Persian empire. Gaugamela being an obscure place, this battle was generally called the battle of Arbela.

Media (Pl. XIV.) is bounded by Assyria on the West, and is separated from Armenia by the Araxes, and is farther bounded on the North by the shore of the Caspian, on the East by Aria, and on the South by Persia. Media is now called Irak-Ajami, or Persian Irak, to distinguish it from Irak-Arabi, or Babylonian Irak. The Northern part of Media, which borders on Armenia, was called Atropatene, from Atropates, a satrap of this province, who erected it, after the death of Alexander, into an independent kingdom. Its capital was Gaza, or Gazaca, now called Tebris or Tauris. capital of Media was Ecbatana, or Hamedan. The Persian, and afterwards the Parthian monarchs, made Ecbatana their summer residence, to avoid the excessive heat of Susa and Ctesiphon. On the road between Bagdat and Hamedan was an antient monument, said to be that of Semiramis, at a place called Bagistana.

North-east of Echatana was Ragæ, or Rages, mentioned in the history of Tobit. Under the Parthian dynasty of the Arsacidæ, it was Arsacia, but is now called *Rei*.

Aria was properly a particular province, but the name was given to a country of large extent \*, answering to the present Khorasin, comprising several provinces, and bounded on the West by Media, on the North by Hyrcania and Parthia, on the East by Bactria, and on the South by Carmania and Gedrosia. The capital of Aria was Artacoana, now Herat, on the Western side, situated on the river Arius, now Heri. From hence Alexander passed Southward to the country of the Zarange, or Drangæ, whose capital, Prophthasia, on the river Elymander, is still called Zarang. Below them the Ariaspæ, who were called Euergetæ, from the succours they afforded to Cyrus, are still known by the name of East of these is Arachosia, now Arrokage, Dergasp. from which region Alexander crossed the Paropamisus, one of the highest mountains in Asia, to invade Bactriana: the Macedonians, in order to flatter him, called it Caucasus.

North of Media and Aria, along the South-eastern coast of the Caspian, is Hyrcania, whose capital bore the same name, now Jorjan or Corcan. The Eastern part of Hyrcania was Parthiene, the original seat of a nation which, under the name of Parthians, founded an extensive empire over Persia, Media, and Aria. Its principal city was Nysæa, still called Nesa.

<sup>\*</sup> The Medes, as we learn from Herodotus, were originally called Arii.

Bactriana is bounded by Aria on the West, the mountains of Paropamisus on the South, a chain called the Emodi Montes on the East, and Sogdiana on the North. The capital was Zariaspa Bactra, now Balk. East of it was the rock of Aornos, thought to be impregnable; it is now Telekan, situated on a high mountain called Nork-Koh, or the mountain of silver.

The river Oxus, or Gihon, separates Sogdiana from · Bactriana. The country is now Al-Sogd; in which was Maracanda, the celebrated Samarcand of Tartar history, which was the royal city of Timur-leng, whose name has been corrupted by European writers into Tamerlane. South of this was Oxiana, or Termid, and North-west was Petra, a strong rock besieged by Alexander, now called Shadman. North-east of this was Gabæ, or Kaous, also named from the conquest of Alexander. Eastwards on the Jaxartes, Shion, or Sir, was a city called Cyroschata, or Cyropolis, built by Cyrus, and re-founded by Alexander under the name of Alexandria Ultima, now Cogend. The Chorasmii, or Kharasm, were between Sogdiana, and the North-eastern shore of the Caspian; their capital was Gorgo, now Urgheng. East of Sogdiana were the Sacæ or Saketa.

The country to the North of these already described is called Scythia, or Tartary (Pl. I.). It was divided into Scythia intra Imaum\*, or Scythia on the West of the Imaus, and Scythia extra Imaum, to the East of it. The ridge of mountains called Imaus is connected with

Imaus, Emodus, and Himmuleh are all derived from the Sanscrit word Hem, snow

the Paropamisus or Indian Koosh, or Caucasus, which separates Bactriana from India. To the South-east this chain takes the name of Emodus or Imeia Pambadam. Another chain of the Imaus runs North-east, dividing Scythia intra and extra Imaum in this direction also. The principal Scythian nation were the Massagetæ, or Great Getes, in Turkistan, North of Bactriana.

North-east of Scythia extra Imaum was Serica, now Gete, or Eygur, which last denomination is derived from , the Ithaguri and Mons Ithagurus, in this district. The principal nation in Serica were the Issedones, who had two towns called Issedon; but their most interesting town is Sera, the metropolis, now Kan-tcheon, in the Chinese province of Shefi-si, without the great wall of This city has been erroneously confounded with Pekin, the capital of China, 300 leagues distant; but some think that the antients had no immediate knowledge of China properly so called. They knew, indeed, by name, a nation called Sinæ, East of Serica, who were probably settled in the province of Shensi, the most Westerly province of China, immediately adjoining the great wall, in which there was a kingdom called Tsin, which probably gave name to these Northern Sinæ, who are not to be confounded with the Sinæ hereafter to be mentioned in the description of India.\*

It remains only to give some account of India, in

<sup>\*</sup> But we learn from the Chinese Historians, on the authority of M. De Guignes, that An-toun, i. c. Antoninus, Emperor of the West, sent a commercial Embassy to Oan-ti, who reigned in China about A.D. 150, and this is confirmed by later researches. See Mr. Murray's Memoir, published in the Edinburgh Philosophical Transactions, Vol. VIII. p. 171.

which we shall briefly notice a few remarkable positions. India derived its name from the river Indus, or Sind, which forms its Western boundary. The great stream of the Ganges divided it into two parts, called India intra Gangem, or India to the West of the Ganges, and India extra Gangem, or India to the East of it.

East of Bactriana (Pl. XIV.) is Indo Scythia, above Little Thibet, and the Indian Caucasus, or Koosh, and West of the junction of the Indus and Suastus is Taxila, now Attock, North-west of which is Aornos, now Renas, a fortress thought to be impregnable, from the capture of which Alexander assumed to himself so much glory. From Taxila Alexander advanced across the Hydaspes, or Shantrou, to give Porus battle, and on its banks he built the cities of Nicæa in honour of his victory, and Bucephala in memory of his horse Bucephalus; he then crossed the Acesines, or Ravci, the Hydraotes, or Biah, and the Hyphasis, or Caul. \* These five rivers give to the adjacent country the name of Punjab. On the Eastern shore of the Hyphasis he erected altars in memory of his progress Eastward, and wept that he could advance no farther. + Towards the mouth of the Hydraotes he found the warlike nations of the Oxydracæ and Malli, and then, descending the Indus, came to the royal city of the

<sup>\*</sup> According to Major Rennel and Robertson, higher authorities in this case than D'Anville, the Hydaspes is now the *Betah*, and the Hyphasis the *Biah* or Bajah.

<sup>†</sup> Yet Timur-leng in this respect surpassed Alexander, for he boldiy entered the Desert, and took the city of Delhi; but Timur was familiar with Deserts. Indeed, Seleucus, after the death of Alexander, seems to have reached the Ganges with an army. He had a minister at Palibothra.

Sogdi, now Bukor; having then visited the city of Patala, now Tatta, and the mouths of the Indus, he returned through Gedrosia to Babylon.

Many places were known to the antients on the coast of the peninsula of Hindoostan, a particular enumeration of which is unnecessary in a work of this nature. The promontory of Comaria (Pl. I.) was unquestionably Cape Comorin, and Taprobane was the island of Ceylon: the Maldiv's also were known to the antients. The river Chaberis is the modern Cavery: and North of it Arcati regia, is Arcot. Maliarpha is Maliapur, near Madras. The Magnum Ostium of the Ganges was the Hugley; and to the West of it, in the interior, was Palibothra, perhaps Patna or Allahabad; though this latter city seems to correspond with Helabas, and is venerated among the Indians as the traditional residence of the first parent of mankind. In India beyond the Ganges, the Aurea Chersonesus, is now Malaya; the Southern promontory of it was called Magnum Promontorium, now the Cape of Romania, beyond which was the Magnus Sinus, or Gulf of Siam; and beyond the river Serus, or Menan, was the country of the Sinæ, or Cochin China, to be distinguished from those already mentioned East of Serica. West of the Chersonesus Aurea was Jabidii Insula, now perhaps Sumatra, and the antients knew also the smaller islands lying above it in the Sinus Gangeticus, or Bay of Bengal.

<sup>\*</sup> A pot of Roman gold coins, principally of the reigns of Trajan and Antoninus Pius, was found by a peasant at Nellore, in 1787.

### CHAPTER XIV.

### AFRICA.

#### A. G. Plate I. XVIII. XIX. XX.

Africa (Pl. I. and XVIII.) was called Libya by the Greek and Roman poets, the name which we give to the whole continent being more generally, though not absolutely, confined by the Romans to a particular province. Very little of this division of the globe was known to the antients, except the parts adjacent to the coast of the Mediterranean: the interior of Africa they thought uninhabitable from the excessive heat, or peopled it with fabulous monsters, of which Africa was proverbially the nurse. \* The first province of Africa, on the Western side, below the Fretum Gaditanum, or Herculeum, now the Straights of Gibraltar, was Mauritania,

now Morocco and Fez. East of it was Numidia, now Algiers, and East of Numidia was Africa Propria, or the province of Africa properly so called, now Tunis, lying along that part of the coast which bends from North to South. The bay formed by the Southern part of this bend was the Syrtis Minor, a dangerous quicksand, and in that formed by another sweep of the sea, after which the coast again takes a North-easterly direction, was the Syrtis Major: between the two Syrtes was Tripolis, now Tripoli. East of the Syrtis Major was Cyrenaica, now Barca, and East of it Marmarica; and still East at the Mouths of the Nile, was Ægyptus, or Ægypt, divided into Ægyptus Inferior, or Lower Ægypt, on the coast, and Ægyptus Superior, or Upper Ægypt, towards the interior of Africa, Below Numidia was Gætulia, now Beledulgerid: below Cyrenaica and Marmarica was Libya properly so called; below Ægypt was Æthiopia; and West of Æthiopia the Garamantes.

Mauritania (Pl. XIX.), now the Empire of Fez and Morocco, was bounded on the North by the Straights of Gibraltar and the Mediterranean, on the East by Numidia, on the South by Gætulia, and on the West by the Atlantic Ocean. It was, properly speaking, in the time of Bocchus, the ally and betrayer of Jugurtha, bounded by the river Mulucha, or Molochath, now Malva, and corresponded nearly to the present kingdom of Fez; but

in the time of the Emperor Claudius, the Western part of Numidia was added to this province, under the name Mauritania Cæsariensis, the antient kingdom of Mauritania being called Tingitana, from its principal city Tingis, or Old Tangier, on the West of the Straights. Opposite to Calpe, or Gibraltar, in Spain, is the other column of Hercules, Mount Abyla \*, near Ceuta, in Mauritania. The remotest Roman city on the Western shore of the Atlantic was Sala, now Sallee, a well-known piratical port. In the South of Mauritania is the celebrated Mount Atlas, which gives name to the Atlantio Ocean. Mauritania Cæsariensis contained many Roman colonies, but it may be sufficient for us to notice Siga, which was the antient residence of Syphax, before he invaded the dominions of Masinissa: it is situated Northeast of the river Mulucha.

Numidia is bounded by Mauritania on the West, the Mediterranean on the North, Africa Propria on the East, and Gætulia on the South, corresponding nearly to the present state of Algiers. It was occupied by two principal nations, the Massyli, towards Africa Propria, in the Eastern part, and the Massæsili, towards Mauritania, in the Western; they were separated by the promontory of Tretum, now Sebda-Ruz, or the seven capes. The Massyli were the subjects of Masinissa, the Massæsili of Syphax. This latter prince, having invaded the kingdom of Masinissa, the ally of the Romans, in the second Punic war, was overcome and taken prisoner by Masinissa and the Romans, and was carried to Rome by Scipio, to adorn his triumph, where he died in prison,

<sup>\*</sup> Maura Abyla, et dorso consurgit Iberica Calpe.

B. C. 202, A. U. C. 552. The Romans confirmed Masinissa in the possession of the kingdom of Syphax, and the history of those transactions, together with an account of the heroic death of Sophonisba, is to be found in the 24th book of Livy. After the death of Masinissa and his son Micipsa, it was divided between his grandsons Hiempsal and Atherbal, who were successively murdered by Jugurtha, and thus Numidia became again united under one sovereign, and the Romans having resolved to punish the crimes of Jugurtha, gave occasion to the Jugurthine war, the history of which is written by Sallust. Jugurtha was taken, having been betrayed by Bocchus, to whom he had fled for refuge. and carried to Rome to adorn, the triumph of Marius, B. C. 106, A. U. C. 648, after which he was starved to death in prison. Numidia was subsequently under the dominion of Juba, who took part with Pompey and his adherents against Cæsar, but was conquered in the battle of Thapsus, and Numidia was reduced to a Roman province; but a part of it was restored by Augustus to the son of Juba, who bore his father's name, and who also received in marriage from Augustus, Cleopatra, the daughter of Antony. The capital of Numidia was Cirta, on the branch of the river Ampsagas, or Wad-il-Kiber: it was afterwards called Sittianorum Colonia, from a general of the name of Sittius, who greatly assisted Cæsar in the African war, and was rewarded with this district: but subsequently it took the name of Constantina, which it still retains. . North-east of Cirta, on the coast, was Hippo Regius, of which St. Augustine was bishop; it was near the present town of Bona; and in a bay, Northwest of Hippo, was the mountain of Pappua, now Edoug, to which Gelimas, the last king of the Vandals

retreated after his fatal defeat by the great Belisarius, A. D., 534.

Africa Propria, or the province of Africa properly so called, was bounded by Numidia on the West, by the Mediterranean on the North and East, and by Getulia and the extremity of Tripolis on the South. It corresponds to the present state of Tunis. Its Eastern boundary was formed by a sudden bend of the Mediterranean to the South from the Promontorium Hermæum. or Cape Bon, to the Syrtis Minor, or Gulf of Cabes. The first place adjoining to Numidia is the little island of Tabraca or Tabarca, which we notice only because it is mentioned in Juvenal. \* A little inland, is Vacca, now Veja, a city of much note in the Jugurthine war. East of Tabraca, is Utica, the capital of the province after the destruction of Carthage, and memorable for the last stand made by the friends of freedom, under the conduct of Cato, against Cæsar. Metellus Scipio, the father-in-law of Pompey, had been defeated by Cæsar, at the battle of Thapsus. Cato, hence called Uticensis, retired to this city, and on the appearance of Cæsar, stabbed himself, in the 59th year of his age, B.C. 46, A.U.C. 708. The river Bagradas, or Megerda, flows between Utica, and the renowned city of Carthage, the queen of Africa and great rival of Rome. It had a citadel named Byrsa, so called from the stratagem used by Dido, who agreed to purchase as much land as she

<sup>———</sup> Et tales aspice rugas, Quales umbriferos ubi pandit Tabraca saltus, In vetula scalpit mater jam simia bucca.

could surround with a bull's hide \*, which she cut into very narrow stripes. It was a colony of Tyrians †, and by them called Carthada, or the New City, by the Greeks Carchedon, and by the Latins Carthago; and is immortalized by the Roman poets and historians on account of the three wars it sustained against the republic. The first began B.C. 264, A.U.C. 490, and ended B.C. 241, A.U.C, 513, having lasted twenty-three years. Amongst its most remarkable events are the capture and cruel death of Regulus the Roman general, the establishment of the Roman marine, and the defeat of the Carthaginians by Lutatius Catulus, off the Ægates Insulæ, B.C. 242, A.U.C. 512. The second Punic war began in consequence of the siege of Saguntum by Hannibal, B.C. 219, A.U.C. 535, and was ended in consequence of the victory of Scipio over Hannibal at the battle of Zama, B.C. 202, A.U.C. 552, having lasted eighteen years: this was memorable for the severest defeats the Romans ever experienced, especially in the battles of Ticinus, Trebia, Trasymenus, and Cannæ, all gained by Hannibal, who maintained himself in Italy sixteen years. The third Punic war began B.C. 149, A.U.C. 605, and lasted only three years, being terminated by the total destruction and demolition of Carthage, by Scipio Africanus Minor, B.C. 145, A.U.C. 609;

> Mercatique solum, facti de nomine Byrsam. Taurino quantum possent circumdare tergo.

Virg. Æn. I. 367.

† Urbs antiqua fuit, Tyrii tenuere coloni,
Carthago, Italiam longe Tiberinaque contra
Ostia, dives opum studiisque asperrima belli;
Quam Juno fertur terris magis omnibus unam
Posthabita coluisse Samo.

Virg. Æn I. 12.

it was much excited by the elder Cato, who never ended a speech in the Senate, on any subject, without the words "Delenda est Carthago," and is remarkable for the cruel and oppressive exactions of the Romans, the patient submission, but at last the obstinate desperation of the injured Carthaginians, and the conflagration of their city, which was twenty-four miles in circumference, and continued burning seventeen days. It was afterwards rebuilt by Augustus, and became a flourishing city, till it was finally destroyed by the Arabs under the Kaliphat of Abdel-Melek, towards the end of the seventh century. A little below it was Tunetum, now Tunis. Below the Hermæum Promontorium is Aspis, or Clypen, now Akiliba: below this place the coast takes the name of Zeugitana; and not quite half-way between the Promontorium Hermæum and Syrtis Minor was Hadrumetum, a very considerable city of that part of Africa Propria called Byzacium, or Emporiæ, which comprized the fertile country adjacent to the Syrtis Minor, and may be considered as the principal granary of Rome. \* Below Hadrumetum is Leptis Minor, or Lemta, and below it Thapsus, now Demsas, memorable for the victory we have already mentioned, obtained there by Cæsar over Metellus Scipio and the remnant of Pompey's party who escaped from the wreck of Pharsalia. Thapsus was Turris Hannibalis, from which Hannibal departed for Asia, when he was barished by his factious and ungrateful countrymen from Carthage. In the interior of Africa, on the Numidian side, are two cities, not far from each other, the one, Tagaste, or Tajelt, in

fact a Numidian city, which was the birth-place of St. Augustine, the other Madaurus, the birth-place of Apuleius; near to which is Sicca, and South-east of it, about the centre of the province, is Zama, the memorable scene of the victory obtained by Scipio Africanus the elder over Hannibal, B.C. 202, A.U.C. 552. In the interior of Byzacium was Capsa, now Cafsa, in which Jugurtha deposited his treasures. We find from Sallust that it was a very strong city, in the midst of deserts very difficult of access, and below it were two lakes, much celebrated in antiquity under the names of the Palus Tritonis and Palus Lybia, now Faro-oun and El-Loudeah. On the former of these Minerva is said to have first appeared, whence she is called Tritonia. Near the latter the Gorgons are feigned to have had their abodes. \* These lakes are in the neighbourhood of what is now called Beled-ul-Gerid, Beledulgerid, or the Region of Grasshoppers.

Tripolis (Pl. XVIII.) was bounded on the West by Africa Propria, of which it originally formed a part, by the Mediterranean on the North, by Cyrenaica on the East, and by Phazania, or Fezzan, on the South. It still retains its name which it originally received from three cities on the coast, Sabrata, now Sabart, CEa, now Tripoli, and Leptis Magna, the ruins of which are still called Labida. It lies between the Syrtis Minor, or Gulf of Cabes, so called from the city Tacape, which was at the head of it, and the Syrtis Major, or, as it is now corruptly called,

Jam summas arces Tritonia, respice, Pallas Insedit nimbo effulgens et Gorgone sæva.

Virg. Æn. II. 615.

the Gulf of Sidra. The Syrtes were very dangerous to mariners, from the shoals and quicksands, and a peculiar inequality in the motion of the waters, by which they drew in and ingulfed vessels, whence they derived their name. \* Towards the Syrtis Major is the small river Cinyphs, the goats of which are mentioned by Virgil, as proverbially shaggy +: it is now called the Wad-Quaham. Inland is the town of Gerisa, or Gherze, fabled to be petrified, with its inhabitants, which probably arose from some statues of men and animals remaining there, which have been thus misrepresented by the ignorant natives. South of the Syrtis Major, in the interior, were the Garamantes, who derived their name antiently from the city of Garama, now Gharmes. were faintly known to the Romans under Augustus, in whose time some claim was made to a triumph over them, on which account they are mentioned by Virgil. ‡ At the extremity of the Syrtis Major are the Philæ-

### \* 'Ατό τού σύρειν.

The Syrtis Minor is mentioned by Virgil, in his account of the storm which dispersed the fleet of Æneas.

Tres [naves] Eurus ab alto In brevia et Syrtes urget, miserabile visu, Illiditque vadis atque aggere cingit arenæ.

Virg. Æn. I. 110.

- † Nec minus interea barbas incanaque menta Cinyphii tondent hirci. Vurg. Georg. III. 311.
- † Hie vir, hie est, tibi quem promitti sæpius audis, Augustus Cæsar, divum genus: aurea condet Sæcula qui rursus Latio, regnata per arva Saturno quondam. Super et Garamantas et Indos Proferet imperium; jacet extra sidera tellus, Ultra anni solisque vias, ubi cælifer Atlas Axem humero torquet stellis ardentibus aptum.

Virg. Æn. VI. 791.

norum Aræ, altars erected to mark the boundary between the territories of Carthage and Cyrene, on the spot where two Carthaginian brothers suffered themselves for this purpose to be buried alive. The story may be seen in Sallust Bell. Jugurth. C. 79.

Next to Tripolis is Libya properly so called, which contained the two countries of Cyrenaica and Marmarica, together with a very extensive unknown region in the interior. Cyrenaica is bounded on the West by Tripolis, on the North by the Mediterranean, on the East by Marmarica, and on the South by the deserts of Libya, the North-western part of which was inhabited by the Nasamones, a barbarous people, who lived by the plunder of the vessels shipwrecked in the syrtis Major, and who almost destroyed the nation of the Psylli, so celebrated in antient and even modern times for the power they appear to possess in charming serpents, and curing the bite by sucking the wound. They are mentioned by Lucan, in his noble description of the serpents which infested the army of Cato during his march between the Syrtes. \* The province of Cyrenaica was called Pentapolis, from five principal cities which it contained. After the coast of the Syrtis Major has bent towards the North-east, is Berenice, or Hesperis, now Bernic, where some have placed the gardens of the Hesperides. Above it is Barce; or Barca, and Ptolemais, now Tolo-

Vix miscris scrum tanto lassata periclo
Auxilium fortuna dedit: gens unica terras
Incolit a savo serpentum tuta veneno,

Lucan. IX : 890, &c.

meta. The extreme Northern point of the coast was called Phycus Promontorium, now Cape Rasat; East of it was Apollonia, now Marza Sana or Sosash, which was the port of Cyrene, that city be g a little inland: it was founded by Battus, who led thither a Lacedæmonian colony from Thera, one of the Cyclades, B.C. 630, Ol. 37. 3, and the kingdom was bequeathed to the Romans, B.C. 97, A.U.C. 657, by the last of the Ptolemies, surnamed Apior; it was by them formed into a province with Crete. Some vestiges of it still remain under the name of Carract East of it, on the coast, is the fifth city, Darrice trans. Derrac

A place calea to Catabathmus Magnus, now Akaa parated Marmarica from Cyrenaica on the It was bounded by Egypt on the East, the Mediterranean on the North, and the Hammonii and Libya Interior on the South. We need only notice here Parætonium, now Al-Barctown which was considered as a sort of advanced frontier of Egypt. South of Marmarica, in the midst of the sands of the Libyan Desert, was a small and beautiful spot, or Oasis, as it is called, refreshed by streams and shade, and luxuriant with verdure, in which was the celebrated temple of Jupiter Hammon, said to have been founded by Bacchus, in gratitude to his father Jupiter, who appeared to him in the form of a ram, and showed him a fountain, when himself and his army were perishing with thirst. Here was the Fons Solis, whose waters were cold at noon and hot at ight.\* Here was the antient and much-famed

> Esse apud Ammonis fanum fons luce diurna Frigidus, at calidus nocturno tempore fertur.

oracle so difficult and dangerous of access through the Libyan Deserts \*, consulted by Alexander the Great, who, by the flattery of the priests, was saluted as the son of Jupiter, and whose head, on some of his medals, bears a ram's horn in token of this descent. The site of this temple, which had been long unknown, has been at length discovered by an English traveller, Mr. Browne, in the year 1792, in a fertile spot called the Oasis of Sawah, situated in the midst of deserts, five degrees nearly West of Cairo. †

Ægypt (Pl. XX.) is bounded on the West by Marmarica and the Descris of Libya, on the North by the Mediterranean, on the East by the Sinus Arabicus, or Red Sea, and a line drawn in a North-east direction from Arsinoc, or Sucz, to Rhinocorura, or Fl-Arasig

\* I cannot avoid quoting a sublime passage in the first part of the Botanic Garden of the late Dr. Darwin, descriptive of the availing army of Cambyses overwhelmed by those mighty columns of saud, which may be called the waves, or rather the moving incumtains of the desert.

Wave over wave the driving desert swims, Bursts o'er their heads, inhumes their struggling limbs

And one great earthy ocean covers all.

Then ceased the storm,—Night bowed his Æthiop brow
To earth, and listened to the groans below.

\* awhile the living hill

Heaved with convulsive throes—and all was still.

Bolanie Garden, Part I. Canto II. v. 489.

† Considerable confirmation is given to this discovery by the visit of Mr. Horneman, to the same spot, A. D. 1798, and the question seems to be fully decided in an able memoir written by Sir William Young. Bart. Horneman appears to have discovered the Fons Solis.

which separates it from Arabia, and on the South by Æthiopia. It is one of the most antient countries known, highly memorable both in sacred and profane history, and the mother of all the arts and sciences of the antient civilised world. Ægypt was governed from time immemorial by kings, the earliest of whom recorded in Scripture had the general name of Pharaoh. It is called in Scripture Misraim (traces of which are still clearly to be found in its modern Turkish appellation of Misr) from its first king, one of the sons of Ham, B.C. 2188: it was conquered by Cambyses, B.C. 525, afterwards subject to its native kings, and again to the Persians till after the death of Alexander, it was refounded into a kingdom by Ptolemy, one of his generals, B. C. 323, and continued under the government of the Ptolemies till, after the battle of Actium and the death of the celebrated Cleopatra, it was reduced by Augustus into a Roman province, B.C. 31, A.U.C. 723. The original natives are called Copts, to distinguish them from the Arabs and Turks, and in the proper modification of this word, Kypt, we can plainly discover the elements of the antient classical term Ægyptus.

Except on the coast, there are few positions but those on the bank of the Nile, whose annual inundations fertilize the adjacent country, and are the source of its prosperity.

Ægypt is divided into Ægyptus Inferior, or Ægypt towards the sea, and Ægyptus Superior, or Upper Ægypt, being more inland, called also the Thebais, from the great city Thebes in this district. Between Ægyptus Inferior and Ægyptus Superior was a small district called

Heptanomis, as containing seven of those Nomes, or Prefectures, into fifty-three of which the whole country was divided.

Ægyptus Inferior extends along the sea from the Sinus Plinthinetes, or Arabs Gulf, to the Sirbonis Palus, or Sirbonian Bog, and even somewhat beyond it. The celebrated city of Alexandria, built by Alexander the Great, B.C. 332, the capital of Egyptus Inferior, stood on the Western side of the Delta, or large triangular island formed by the Nile, which comprised almost the whole of Egyptus Inferior. Here was the celebrated library, consisting of 700,000 volumes, which is said, but without any very positive proof, to have been destroyed by the Saracens, at the command of the caliph Omar. Alexandria, before the discovery of the passage round Africa by the Cape of Good Hope, was the great mart for all the merchandise between Europe and the East Indies, which was transported from thence to Arsinoe, or Suez, at the top of the Red Sea, and so to The island of Pharos, which had a celebrated light-house, was joined to the continent by a dike, or causeway, called from its length the Heptastadium. On the South-eastern side of the city was the lake Mareotis\*, or Mariout. At the Western mouth of the Nile, a little beyond Alexandria, was Canopus + whence that

\* The wine made in its vicinity was celebrated.

Mentemque lymphatam Marcotico.

Hor. Od. I. 57, 14.

† Hence Canopus, from its vicinity to Alexandria, was called Pellman.

Nam qua Pellæi gens fortunata Canopi Accolit effuso stagnantem gurgite Nilum.

Virg. Georg. IV. 287.

branch is called the Canopic, now Maadi. Near to it was a city called Nicopolis, built in commemoration of a victory obtained by Augustus over Antony: but the modern victory of Aboukir, gained by Lord Nelson over the navy of France, Aug. 1. 1799, will render the same spot infinitely more celebrated among succeeding gener-The next mouth of the Nile is called Bolbitinum ations. Ostium, where is now Raschid, or, as the Europeans call it, Rosetta. In the interior of the Delta, nearly below Rosetta, was Sais, now Sa, antiently the capital of Lower Ægypt. The Sebennytic mouth of the Nile, now lost, was so called from the city Sebennytus, an inland city, now Semenud. Next to it was the Phatniticum Ostium. one of the principal mouths of the Nile, near the city of Tamiathis, or Damiata. The Mendesian mouth was so called from Mendes, now Ashmur-Tarah; the Tanitic from Tanis, the Zoan of the Scriptures, now San. The Eastern branch of the Nile was called the Pelusiotic, from the strong city of Pelusium, now Tirch, one of the keys of Ægypt at its mouth. These three last mouths of the Nile are now hardly traceable, and are principally lost in the lake Menzaleh. East of Pelusium is Mount Casius, and East of it the Palus Sirbonis, or Sirbonian Bog, now called Sebakel Bardoil. Here Typhon, the murderer of Osiris, is fabled to have perished; and the country being covered with deep and moving sands, is called Al-Giofar, and has always rendered the approach to Ægypt on this side very difficult and dangerous to an invading enemy. \* North-east of the Sirbonis Palus

A gulf profound as that Sirbonian bog
'Twixt Damiata and Mount Casius old,.
Where armies whole have sunk. ——

is Rhinocorura \*, now El-Arish, the remotest Eastern limit of Egypt and of Africa. At about an equal distance between Pelusium, the apex of the Delta, and the Western branch of the Sinus Arabicus is Heroopolis, now perhaps Abookesheyd, which gave to that branch the name of the Sinus Heroopolites; it was the residence of the antient shepherd kings of Ægypt. South-west of it the Jews had a city called Onion, and a temple which continued from the time of Onias, who built and called it after his own name, to that of Vespasian. Onias was nephew to Menelaus, and the rightful successor to the priesthood of Jerusalem, but being rejected by Antiochus Eupator, who made Alcimus high priest, he fled to Egypt, and persuaded Ptolemy Philometor to let him build this temple there, about 173 years B.C., which subsisted 243 years. At the very apex of the Delta was Heliopolis, or On, the city of the sun, and a little below it was the Ægyptian Babylon, probably built during the time of the Persian power in Ægypt: it occupied the site of Old Cairo. On the Western bank of the Nile fifteen miles South of the Delta, was the renowned city of Memphis, the antient metropolis of all Ægypt. Near it are those stupendous and immortal works, the Pyramids: the largest of these is, at the lowest, 481 feet in perpendicular height, and covers eleven acres of ground; it is built of hewn stones. the smallest being not being less than thirty feet in length. The pyramids are thought to have been intended for royal sepulchres: they are of so remote antiquity that

Or rather Rhinocolura, the noses of the inhabitants having been cut off by the Æthiopians for their bad faith.

their foundation is utterly unknown. There is a room which contains a sarcophagus in the greatest pyramid.\* South-west of Memphis is Arsinoe, or Crocodilopolis, now Feium, near the lake Moris, at the South end of which was the celebrated labyrinth, which contained 3000 chambers, 1500 above and as many below, in which the kings and sacred crocodiles were buried: it contained twelve principal halls, built by as many kings, and its ruins are still very magnificent. Another Moris was a canal now called Bathen, running North and South below that already described, and was excavated by human industry, being 900 stadia in length, and four in breadth. Proceeding Southwards along the Nile, we find Hermopolis Magna, now Ashmuncim, the last city of Heptanomis. We then proceed to Ægyptus Superior, in which we may notice Ptolemais Hermii, antiently a powerful city, now an inconsiderable village called Girge. South of it was the great city of Abydos, the palace of Memnon, now a ruin called Madfune. West of it was a fertile spot, in the midst of the desert, called the Oasis Magna, now El-wah. South of Abydos was Tentyra, now Dendera, a city at variance with Ombos, the former killing, the latter adoring the crocodile: a horrible instance of religious fury, which took place in consequence of this quarrel, is the subject of the 15th satire of Juvenal. A little South of Tentyra, on the other side of the Nile, is Coptos, or Kypt, from which a road was made by Ptolemy Philadelphus 258 miles in length, across the desert to the port of Berenice on the Sinus Arabicus, by which the merchandise of India was trans-

<sup>\*</sup> Many rooms and interesting particulars have been recently discovered in the pyramids by the enterprising sagacity of Mr. Belzoni.

ported to the Nile. South of Coptos was the magnificent city of Thebes, called by the Grecks Diospolis, from the worship of Justier there, and distinguished by the epithet of Hecatompylos, or the Hundred-gated, from the city of Bœotia, which had seven gates. The ruins of this astonishing city occupy a space of twenty-seven miles in circumference on either side of the Nile, containing several villages, the chief of which are Karnak and Luxor. That part on the western side of the Nile, which was called Memnonium, now Habou, contains many stupendous monuments. In the adjacent Lybian mountains are hewn sepulchres of the Ægyptian kings. Near Thebes was the celebrated statue of Memnon, which was said to utter a sound when struck by the first beams of the sun. It still exists \* though broken, and is covered with the names of many illustrious antient writers and monarchs, or generals, who have thus recorded, with their own hands, their attestation to the fact of having heard the sound. + Some idea of the strength of this antient city may be obtained from the account given us by Herodotus, who tells us, that it could send out from each of its hundred gates 20,000 footmen and 200 chariots to oppose an enemy ‡: it was ruined by Cambyses the Persian. Considerably below Thebes is Ombos, already mentioned, and below it was Syene, or Assouan, the extreme town of Upper Ægypt, where was a celebrated well, the bottom of which at the

A smaller Memnon has been brought to London in 1818.

Juv. Sat. XV. 5.

<sup>+</sup> Hence Juvenal -

Dimidio magicæ resonant ubi Memnone chordæ

<sup>\*</sup> Atque vetus Thebe centum jacet obruta portis.

<sup>&</sup>lt;sup>†</sup> See also Homer, Iliad IX. 383.

time of the summer solstice was exactly illuminated, the sun being perpendicular over it. Juvenal was sent into a kind of honourable exile to this place. Near it is the Mons Basanites, or mountain of touchstone, from which the Ægyptians used to make ornamental vases and household utensils. Opposite to Syene, on the Sinus Arabicus, was Berenice, already mentioned. extreme Northern point of the Sinus Heroopolites was Arsinoe, called afterwards by the celebrated Cleopatra after her own name; it is now Suez. Midway, on the coast, between Arsinoe and Berenice, which were so called from the names of two of the queens of Ægypt, is Myoshormus. About a mile South of Syene were the smaller cataracts of the Nile; the greater cataracts were more to the South, in Æthiopia.

It is not necessary to take more than a very rapid view of the remainder of Africa. The natives living along the Southern part of the Red Sea (Pl. I.) were called Troglodytæ, and inhabited caves in the earth. On this coast was Adulis, or Arkiko, and westwards the city of Auxume, which is still Auxum, in Abyssinia: North-westwards, on the Western or true branch of the Nile, was Meroe. The river Astapus, or Abawi, which flows through Nubia to a place called Coloe Palus, or Bahr Dembea, was known to the antients, and was mistaken by Mr. Bruce for the Nile: the real Nile, or Bahr cl Abiad, flows far to the South-west of this, and its sources are still unknown, but are placed in a chain of mountains called the Mountains of the Moon, South of the Nubæ Memnones; and by the Arabian geographers, our only authority, the Niger or Gir of the antients, called by them the Nile of the Negroes, empties itself into an immense lake in which the Nile rises. Under the names of Agyzymba and Azania the antients seem to have known the coasts of Zanguebar and Ajan; nor ought we to omit mentioning that the Ophir of Solomon

The Niger has been ascertained to flow from West to East, and in the interior of Africa to form a very considerable river. In order to enable it to form a junction with the Nile in some great lake in the interior, we must suppose some practicable passage by which the Niger may descend regularly from West to East, and by the continuance of which the Nile may also descend from West to Northeast till it takes its Northern direction through Egypt, where it flows nearly from South to North. In other words, no chain of mountains must be so situated between the Niger and the Nile as to prevent their meeting, by breaking the level. This was asserted to be the case by the antient geographers, but being contrary to general experience on such an extent of the earth's surface, was contradicted by the most intelligent of the later geographers; yet it appears from the late discoveries of Mr. Park, that the Niger undoubtedly flows from West to East, and I therefore hope I may be allowed, with becoming diffidence, to express an opinion of the possibility of a fact which has nothing but presumptive evidence to contradict it, and which has some, though certainly weak authority, in its favour. 1 merely mean to say, that it is not impossible; and that as the Apurimac flows from the Western side of South America to the Northeastern, the Niger may flow from the Western side of Africa to the Eastern, till stopped by the mountains of Abyssinia and Æthiopia, when it would naturally form an immense lake, from which its course may be continued under the name of the Nile; and the increase of that lake and its tributary waters by periodical rains may cause the periodical inundations of the Nile; and the latest discoveries tend to confirm this opinion.

Since this note was first written in 1812, an immense lake, called *Tsad*, has been found in Bornou, into which a great river, called the *Shary*, flows; and although the identity of this river with the Niger is questionable, and also the existence of any outlet from the lake which may form the Nile, I cannot consider the negative as distinctly proved, and the very existence of this lake at least gives a colour to the hypothesis above mentioned.

has been thought to be the modern Sofala. The Garamantes have been already mentioned, and it merely remains to notice their western neighbours, the Nigrita, in Negroland, or Nigritia, and the Hesperii Æthiopes, in Guinea.

On the Western coast of the Atlantic the Fortunatæ Insulæ, or Canary Islands, were known to the antients, and were thought to be the residence of the blessed after death.\* Below them were the Hesperidum Insulæ, either the Cape Verde Islands, or, if these are thought too far from the coast, possibly some small islands called the Bissagos lying a little above Sierra Leone. Here was the famous garden of the Hesperides, and the Golden Apples, the attainment of which was one of the labours of Hercules, who carried them off, having slain the watchful dragon that guarded the fruit.
